BOARD OF TRUSTEES

Michigan State University operates under the jurisdiction of a constitutional body known as the Board of Trustees. The eight elected members serve eight-year terms. Two are elected biennially from the state at large.

The President of the University is appointed by the Board and is by constitutional provision the presiding member of the body.

The Board likewise appoints a Secretary and a Treasurer.

The Board has general supervision of the University and the control and direction of all expenditures of University funds.

ACADEMIC COSTUME

The pageantry and color at commencement exercises reveal a record of academic achievement of the various individuals taking part in the exercises. The following brief description is given so that the audience may more readily interpret such achievement.

In 1895, the Intercollegiate Commission, a group of leading American educators, met at Columbia University to draft a code which would serve to regulate the design of gowns and hoods indicating the various degrees as well as the colors to indicate the various faculties. This code has been adopted by most of the colleges and universities in America and its use has made identification of scholastic honors an immediate activity.

Three types of gowns are indicated by the code. Those worn by the bachelors have long, pointed sleeves. Those worn by masters have long, closed sleeves with the arc of a circle near the bottom. The arm goes through a slit, giving the appearance of short sleeves for the master's gown. Doctor's gowns are faced with velvet. The sleeves are full, round and open with three bars of velvet on each sleeve. The velvet facing of bars on the sleeves may be black or the same color as the binding of the hood.

Hoods are made of material identical with the gown and are lined in the official academic color of the institution conferring the degree. If the institution has more than one color, the chevron is used to introduce the second color. Colored velvet or velveteen binds the hoods and indicates the department or faculty to which the degree pertains.

Historical associations of color have been continued to signify the various faculties. Arts and letters can be recognized by the white, taken from the traditional white fur trimming of the Oxford and Cambridge Bachelor of Arts hoods. Red, long traditional of the church, indicates theology. The royal purple of the King's court signifies law. The green of medicinal herbs immediately identifies a medical degree. Philosophy is signified by the color of wisdom and truth, blue. Because through research untold wealth has been released to the world, science is identified by golden yellow. Oxford pink indicates music, and russet brown, the color of dress worn by ancient English foresters, indicates forestry.

The color of the velvet of the hood is distinctive of the subject to which the degree pertains. For example, the trimming for the degree of Master of Science in Agriculture should be maize, representing agriculture, rather than golden yellow, representing science.

At Michigan State University, it is customary to identify the bachelors graduating from the different departments of study by tassels of the official department color as established by the Intercollegiate Code.

COLLEGE OF AGRICULTURE AND NATURAL RESOURCES <i>Maize</i>	COLLEGE OF HUMAN MEDICINE <i>Green</i>

MICHIGAN STATE UNIVERSITY

Michigan State University, one of the leading land-grant universities and the first agricultural college in America, strives for excellence in affording liberal and practical education for its students in a broad range of human endeavor.

MSU also serves people of the state, nation and world through its numerous research, extension and international programs.

Now in its 121st year, Michigan State University has grown from three buildings and six faculty members to one of the largest universities in the nation. It has more than 3,000 faculty engaged in teaching, research and public service, 409 campus buildings, and more than 5,100 acres of land of which 2,010 acres are in existing or planned campus development.

Founded in 1855 to educate youth for the major occupation of that day — farming — MSU has broadened its offerings to meet the educational needs of today. The University now has a Graduate School and 17 colleges — Agriculture and Natural Resources, Arts and Letters, Business, Communication Arts, Education, Engineering, Human Ecology, Human Medicine, James Madison, Justin S. Morrill, Lyman J. Briggs, Natural Science, Osteopathic Medicine, Social Science, University College, Urban Development, and Veterinary Medicine. Some 165 programs of instruction are available to undergraduates; 76 departments offer graduate studies.

MSU is unique nationally in that the Colleges of Human Medicine, Osteopathic Medicine, and Veterinary Medicine are located on the single campus.

The Honors College, which enables superior undergraduate students to waive normal graduation requirements and undertake individual programs, attracts many of the nation's finest young scholars. Michigan State University also is a prominent sponsor of the National Merit Scholarship Program, comprised of an unusually select group of scholars.

One of the many innovations in higher education made by Michigan State University is its system of academic-residence halls. Incorporation of classrooms and faculty offices with living, dining and recreational facilities has given these giant dormitories a stimulating academic environment. Each of these nine halls is the center of curricular and noncurricular activities, creating a "college within a college" atmosphere.

The "small college within the larger university" concept was introduced at MSU by the establishment of the Justin S. Morrill College, which offers a limited enrollment liberal education program with an international emphasis. The concept was expanded by the establishment and opening of the James Madison College and the Lyman J. Briggs College. James Madison offers a curriculum for the study of public policy problems within the framework of the social sciences and related disciplines. Lyman Briggs makes available a liberal curriculum for students especially interested in science and mathematics.

Today, more than 43,000 students attend the University at East Lansing. About 85 percent are from Michigan; the remainder includes nearly 1,200 foreign students from 89 countries.

MICHIGAN STATE UNIVERSITY (continued)

In the land-grant tradition it pioneered, Michigan State University is concerned with research and service as well as teaching. All colleges and the Agricultural Experiment Station are engaged in a wide range of research. Approximately 3,000 individual projects are in process. The University's research tools include the Control Data 6500 computer, a cyclotron of the sector-focused type capable of accelerating protons to 50 MeV (60,000 miles per second), and the MSU Observatory which houses a 24-inch reflecting telescope, a computer and related equipment. Modern facilities include the following buildings: chemistry, biochemistry, psychology research, veterinary medicine, plant science research, natural resources, food science, pesticide research, and life sciences.

Through an agreement with the Atomic Energy Commission, MSU has become a national center for basic research on plants and their reactions to radiation; involved is a \$2 million building, a staff of approximately 90 persons and an annual budget of approximately \$1 million.

Benefits of the University are brought to every county in Michigan by the Cooperative Extension Service and the Continuing Education Service. Their programs, on and off campus, provide a wide range of technical information and formal course work for hundreds of thousands of Michigan citizens. The Kellogg Center for Continuing Education, one of the finest conference centers in the nation, annually hosts nearly 50,000 adults who come to the campus for some 600 conferences and other educational meetings.

In broadening the scope of educational opportunity, MSU is building on its long experience in continuing education to develop a Lifelong Education Program which will offer University resources to persons who are educationally or economically excluded from the traditional campus programs; to those who seek new skills or wish to update present skills; and to those who wish through education to make their leisure time more productive. The Program also will enable the University to cooperate with local communities in assessing, developing, and expanding their continuing education projects.

Michigan State University's land-grant concept of service is international. Supported by grants from the federal government and private foundations, Michigan State University maintains research and educational assistance projects on a world-wide basis. International projects have given many faculty members overseas experience, adding a new dimension to their teaching.

With more than a century of educational achievement behind it, Michigan State University continues to apply its academic and physical resources to the problems of today and the challenges of the future.

HONORARY DEGREES

JAMES FRANKLIN HYDE

During your remarkable career as a research scientist, you have exhibited not only the insight of the skilled scientist, but also the vision of the man dedicated to human welfare. For three decades you have been a leader in fundamental as well as practical research in the field of organosilicon compounds. More than any other person, you are responsible for the establishment of an industry which employs thousands of chemists and chemical engineers and contributes markedly to the efficiency of America's industrial enterprises. During your long career with the Dow Corning Corporation, your painstaking research has resulted in numerous inventions and important extensions of theoretical concepts in your specialized field. Because of your outstanding record, you have been singularly honored by the American Chemical Society and other professional organizations. In recognition of your many valuable contributions to the economic progress and scientific advancement of Michigan and the nation, Michigan State University is pleased to grant you the degree of Doctor of Science.

JAMES G. O'HARA

Throughout your career as a lawyer and U. S. Congressman from Michigan's 12th District, you have earned an enviable reputation for integrity and statesmanship. You have continuously devoted your knowledge and energy to the economic and social betterment of the citizens of this state. As a member of the House Committee on Education and Labor, and especially as chairman of its Subcommittee on Post-secondary Education, you have exerted your leadership in the resolution of complex educational problems. This university, like others throughout the country, has benefited from your determination and concern with such issues as vocational education, student assistance programs and the need for greater public support of higher education. In all of your undertakings you have worked for democratic principles in our institutions and our public policy. Because of your exceptional record in legislative affairs, and your constant dedication to the educational and cultural progress of Michigan and the nation, Michigan State University is pleased to grant you the degree of Doctor of Laws.

HONORARY DEGREES

PEREZ M. OLINDO

In your relatively brief career since graduating from this university, you have written an important chapter in the history of wildlife management in your native Africa. As Director of the Kenya National Parks, you have devoted your energy and knowledge to the protection of wildlife from excesses of hunting and trading and destruction of natural habitat. Your expansion of national parks and your leadership in conservation have been recognized internationally, and you have frequently served as your nation's delegate to world conferences on resource ecology. Your studies of endangered species were instrumental in promoting the successful Convention on International Trade in Endangered Species of Wild Flora and Fauna concluded in Washington in 1973. In recognition of the distinction you have brought to yourself and this institution, and your valuable contribution to a world approach to conservation, Michigan State University is pleased to grant you the degree of Doctor of Science.

MARTIN DUNAWAY YOUNG

You have achieved a world-wide reputation as a scientist, educator and administrator. Your meticulous research and authoritative publications on tropical medicine, especially the treatment and control of malaria, are of great importance in the unending struggle against disease. As a consultant to India, Liberia and other foreign governments, and as a lecturer at international forums, you have demonstrated your deep concern for human welfare. Your administrative accomplishments with the U. S. Health Service and as Director of the Gorgas Memorial Laboratory in Panama reflect your unusual qualities of leadership. The students who have been privileged to work under your guidance confirm, by the success of their own careers, the enthusiasm and dedication which have marked your life and work. Because of the advancements which you have made in scientific knowledge and your humanity in laboring so diligently and unselfishly for the betterment of your fellow man, Michigan State University is pleased to grant you the degree of Doctor of Science.

DISTINGUISHED ALUMNI AWARDS

CLARE FISCHER

Class of 1951, M.A., 1955. Musician, composer, arranger, and conductor. An innovative musician who has influenced the likes of George Shearing, Cal Tjader, Dizzy Gillespie and others, Fischer ranks among the most creative and exciting forces in contemporary music. In 1957 he became writer, arranger, pianist and conductor for the Hi-Lo's, the Fifties' most sophisticated pop vocal quartet. In the 1960's he launched a recording career that began with Gillespie's famed album, *A Portrait of Duke Ellington*. By 1964, *Saturday Review* credited Fischer with paving the way to a new fusion in popular music of jazz, Latin and African rhythms. Actually he went one step further, incorporating classical music into his compositions. Now a free lance musician, he has done the background music for numerous films and TV programs, including the Andy Williams Show. Fischer, who has gone on many musical missions for the U.S. Department of State, is truly an ambassador of good will for his country, for his profession, and for his university.

ADMON GANEM

M.B.A., Class of 1962. Director of Personnel, Banco do Brasil. As one of nine directors of "the world's largest rural bank," with 800 branches and 50,000 employees, Ganem has established numerous programs and policies that have benefited people in the banking business. He developed a training program that has processed 22,000 personnel, created a bureau of health resources, and pioneered the Human Resources Center. During his 28 years with the bank, Ganem has also consulted for a number of firms and taught at several universities. From 1962 to 1964 he headed the marketing department of the University of Bahia, where he graduated with a degree in economics in 1948. Ganem also has a law degree from the Catholic Law School of Bahia. An active social planner as well as corporate executive, Ganem developed, among other projects, an economic development plan for the State of Bahia to renovate its slums. He was also the executive vice president of the Radio and TV Bandeirantes of Sao Paulo, from 1968 to 1969.
