The nonreappointed faculty member.. Should he be given written reasons?

In a memorandum to the Board of January, University Attorney Leland W. Carr Jr. suggested that an all - University committee be designated to implement a policy

regarding notice of nonreappointment along guidelines adopted at the 56th annual meeting of the American Association of University Professors.

In making the suggestion, he cited

with cases before the Michigan Employment Relations Commission.

The trustees did approve a motion from Don Stevens concurring with the Carr recommendation, and the matter was turned over to the University Faculty Tenure Committee. (News-Bulletin, April 1.)

The tenure committee decided last week to recommend that written reasons be given to faculty members "further appointment is whose inadvisable," if the faculty member submits a written request for the reasons. (The term "reappointment"

was avoided, according to Gabel Connor, because the committee thought it sounded automatic. Conner is tenure committee chairman and professor of large animal surgery and medicine.

The tenure committee recommendations are to be submitted to the provost, Conner said.

From the provost's office, the report is expected to be submitted to the Academic Council for discussion and action, according to Assistant Provost Herman King. The Board of Trustees will receive a progress report from the provost at its April meeting, King said.

At the annual meeting of the AAUP last year, the report from Committee A on "Procedural Standards in the Renewal or Nonrenewal of Faculty Appointments" was referred to local chapters for consideration.

The Committee A report deals with nontenured faculty members and is a supplement to the 1940 AAUP

(Continued on page 5)

Poll shows

More than 50 per cent of the faculty responding to a faculty affairs committee questionnaire expressed some opposition to collective bargaining for faculty at MSU.

The faculty were asked one question, with five possible answers. The question was: How do you presently feel about

Committee to collect data

In a brief 20 - minute session Tuesday, the Academic Council heard four status reports and a partial review of the annual report of the University Faculty Affairs Committee.

But it took the Elected Faculty Council, in a meeting following the Academic Council session, much longer to pass a resolution dealing with collective bargaining.

In the Academic Council, Gordon

(Continued on page 2)

bargaining opposition

collective bargaining for the faculty of

Of 2.167 opinionnaires sent out to faculty on the tenure track, 1586 were returned by yesterday morning.

The results were:

* 222 faculty, or 14 per cent of the return, said they were strongly in favor of collective bargaining.

* 239, or 15.1 per cent of the return, said they favor collective bargaining with reservations.

* 284, or 17.9 per cent, were undecided.

* 321, or 20.2 per cent, said they were against collective bargaining but with some interest.

* 516, or 32.5 per cent, said they were strongly against collective bargaining.

Four ballots were invalid.

Reporters from the State Journal, State News and MSU News - Bulletin served as observers for the ballot count Monday evening. Sandra A. Warden, associate professor in Justin Morrill College and chairman of the faculty affairs committee, and committee

members William J. Hinze, professor of geology, and Stanley K. Ries, professor of horticulture, conducted the ballot counting.

Mrs. Warden said she was pleased with the return, given the short period of time in which the opinionnaire was conducted. The ballots were received by faculty Monday, March 29, with a deadline of Monday, April 5.

Mrs. Warden also said that the results were significant because of the high percentage of return.

A number of faculty included comments on their ballots. One wanted to "wait and see what the Trustees do about salaries." Another said he had been a long - time MSU employe who had originally been opposed to collective bargaining, but having been the "victim of inequities," he now favored it. Others listed groups they would like to have represent them including the faculty affairs committee.

The Executive Council of the MSU Chapter of the AAUP was to have met yesterday morning to discuss the poll

A career that occupied a dissertation

By GAIL MORRIS Assistant Editor, News Bureau

The spirit of innovation arrived at Michigan State in 1943. He was a compact man, 5 feet 6 inches in stature, and conservatively dressed.

A 53-year-old professor of administration from the University of Chicago, he had been invited to MSC by President John A. Hannah to discuss post-war. problems of higher education.

Fresh from Washington and President Roosevelt's inner circle of advisors, he came with more than a decade of experience in two administrations, some 30 years of teaching and administrative experience, and success in such landmark public policy developments as the Tennessee Valley Authority and G.I. Bill of Rights. What he brought with him were fresh ideas on general education that became the cornerstone of MSU's Basic College-now University College.

This man-who grew up among Crow and Sioux Indians, who taught a U.S. senator to speak English, who as a one-room school teacher rebelled against the system-soon became known as the University's "idea man."

FLOYD W. REEVES' ideas were sometimes so new they were considered Paul L. Dressel, now director of institutional research, recalls that "he didn't mind coming out with very radical ideas; many weren't really accepted, but the fact that they were so different from what people were thinking moved them out of their ruts a little bit."

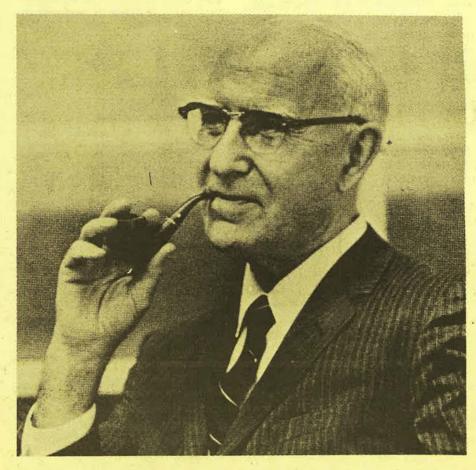

In committee meetings, his modus operandi often provided the jolt that made things happen, according to the late Edward B. Blackman of University College.

"He would almost never be among the first to speak in meetings. He would puff away at his pipe letting several other people voice their opinions and then Reeves would come in and you'd wait for the bombshell to go off.

"You'd know something very radical was about to be said. He would come out with some very far out idea, which at first seemed kind of crazy, but thinking about it for awhile, it seemed to be a reasonable idea.

(Continued on page 5)

"He wasn't bound intellectually or emotionally; he was a very liberated man,"

Floyd Reeves: The spirit of innovation.

Letters

Thanks for the King Series

An open letter to the sponsors of the second annual Martin Luther King Jr. Lecture Series:

Please accept my congratulations on, and warm thanks for, the Martin Luther King Jr. memorial program presented last week free of charge to the MSU community and the public. As one who took advantage of the opportunity to witness all three parts of the series, I must say I think we were extraordinarily privileged.

The excellent presentations on Wednesday were, of course, original, unique, and can never be repeated.

The filmed record of the civil rights movement in this country, however, is so enlightening that if it is not already in the University's permanent film collection, I urge its prompt acquisition. Its documentation of racism in the American Deep South, in the North, and finally in Memphis is a painfully brutal but valid and inescapable indictment of incredible impact. If it were not inseparable from the equally authentic record of Martin Luther King Jr.'s evolving moral leadership as a challenging modern - day prophet - demonstrating rare courage, deep faith in the common man, and a practical commitment to the highest ideals of this country regardless of personal cost - it would yield nothing but despair. But as it is, even the U.S. Information Agency should have the wit and the courage to use it with very telling effect.

The viewer is given intimate close up views (often better than those enjoyed by eyewitnesses of actual events) of Martin Luther King Jr., not only as one of the greatest pubic figures of our time, but as a warmly engaging and fully credible human being, with a little known, many - sided private life of his own.

Until a better film on this subject becomes available, inconceivable as that now is, I hope this one will be shown annually as part of the Martin Luther King Jr. Series. But making arrangements to expose oneself to so long a film — a full three hours — is not easy for any busy person. Nor does such a film fit easily into the regular

academic class schedule. The small size of the audience on the Auditorium last Thursday afternoon (there was also quite a bit of coming and going) suggests that this film should be offered more frequently than annually, and under viewing conditions which would make attendance more easily feasible and convenient for the many potential viewers in the various segments of the University community. I think faculty and staff as well as students should have the opportunity.

I trust the necessary arrangements can, and I hope that in due time they will, be made so that every student on this campus before graduation will have been enabled and motivated to undergo the impact of this tremendous documentary. If such a goal is or for any reasons seems too ambitious, I think at least all students enrolled in the instructional programs of the sponsoring agencies - to which I think the College of Education should by all means be added - could be required, as part of the regular curricular experience, to view this matchless "chronicle of the civil rights movement, from the Montgomery boycott in 1955 to the Memphis sanitation strike of 1968."

Edgar A. Schuler, professor of education and sociology

Committee

(Concluded from page 1)

Guyer, professor of entomology and chairman of the Steering Committee, said that the Report on Student Participation in Academic Governance had been moved to the University Student Affairs Committee (USAC) for review of recommendations made by the Board of Trustees in March. If USAC returns the report by April 12, a special council meeting will be held April 20.

Guyer reported that the educational policies committee had recommended no alternate representation on the Council and on standing committees. He also announced that the membership of the faculty affairs committee will automatically constitute the new Committee on Faculty Affairs and Faculty Compensation on July 1.

The new University Committee on Building, Lands, and Planning will be elected through the college advisory councils.

Details of the faculty affairs report are in the March 2 Faculty News.

THE ELECTED FACULTY Council heard a report by Mrs. Warden concerning collective bargaining, including fact - finding activities of the FAC and the results of the faculty poll.

The Elected Faculty Council passed a resolution requesting the Steering Committee to designate the FAC or an ad hoc committee to "carry on a

continuing effort to collect data and arrange for appropriate forums of discussions of the issues of collective bargaining by the faculty."

Introduced by Thomas H. Greer, professor of humanities, the resolution was a substitute for a motion made by James T. Bonnen, professor of agricultural economics, which included a proposal for "thorough and fair evaluation and discussion" of the issues of collective bargaining.

C. C. Killingsworth, professor of labor and industrial relations, spoke in favor of the substitute motion.

"If we look carefully at the contingencies," he said, "it is unwise to ask an organ of faculty government to evaluate (collective bargaining). It may prejudice future relationships."

- PAT GRAUER

A-P nominations

The nominating committee of the Administrative Professional Association is now accepting nominations for president, treasurer and three board members.

The committee will present a slate of candidates to the membership during the A-P Association's annual meeting in May. Nominations can be submitted to Forrest Kelsey, purchasing, 390 Administration Building (phone 355-0346)

HONORS OPTION. An alternative for honors study has been implemented this spring. The "Honors Option" allows students to receive recognition for work done beyond the requirements in a normal class.

Students who wish to participate in courses designed "Honors Option" can make arrangements at the beginning of the term with their instructors. Several formats are possible, such as a second track with alternative syllabus, group sessions by interest areas or individual study arrangements.

Those who complete an option course will receive honors designation on their transcripts.

INDIA PROGRESSING. An MSU soil scientist who spent 10 years in India says that nation and its recently reelected prime minister are on the right track, but large - scale starvation, will probably continue there for some time.

"Last year, thanks to improved grain varieties, India had its best year since the mid - fifties," reports Roy L. Donahue, "but the U.S. still gave or sold five million tons of food grains to India. Still, the Indians are making improvements. I have faith that technology can raise their food production and keep them fed forever."

But he says technology isn't the only concern facing India. "Change is sometimes more frightening than starvation," he says. "They're used to starvation."

AUTO POLLUTION. Lead emissions from automobiles are so minute they do not constitute a significant pollution hazard, says M.H. Chetrick chairman of chemical engineering. He reports that the major pollutants are unburned hydrocarbons, carbon monoxide and nitrogen oxides. The best way to reduce them is to keep a car well tuned.

VANDENBERG BOOK. The first political biography of a Michigan editor who became one of the most influential statesman of his time, has been published by the MSU Press. The work is "Senator Arthur H. Vandenberg: The Evolution of a Modern Republican." The author is C. David Thompkins, associate professor of history at Northeastern Illinois State College in Chicago. The book traces Vandenberg's career from his newspaper days in Grand Rapids at the turn of the century through 1945, with emphasis on the years after 1928 when he represented Michigan in the U.S. Senate.

KELLOGG GRANT. The W. K. Kellogg Foundation has awarded MSU a \$634,000 grant to help Michigan's rural communities and their public officials.

The funds will be used to develop Cooperative Extension Service programs in the areas of rural development and public affairs, according to Dale E. Hathaway, chairman of agricultural economics, who will admissister the grant.

"We have organized several programs to improve rural communities' ability to manage resources," he said. "We won't be telling local officials how to run their governments, but rather we will provide pipelines of information and other educational opportunities which will be readily accessible."

Alvin House, MSU specialist in public affairs and one of those involved in the program's execution, sees it as bringing about greater university involvement in studying, interpreting and organizing the flood of information pertaining to management decisions faced by local officials.

Academic records policy set

MSU has developed new procedures to insure that individuals are protected from misuse of information contained in their academic records.

The procedures cover requests for material to be used in research studies as well as access to individual student records.

Requests for aggregate academic data for use in research studies and for other purposes will go before a special screening committee for consideration,

Editorial offices: Rooms 323 and 324, Linton Hall, Michigan State University, East Lansing 48823, Phone 355-2285.

Published weekly during the academic year by the Department of Information Services.

Second - class postage paid at East Lansing, Mich, 48823 Provost John E. Cantlon said. The committee will determine the validity of the proposed use and give special attention to safeguarding against release of information which might reflect adversely on individuals.

Committee members are Paul Dressel, director of institutional research; Milton B. Dickerson, vice president for student affairs; Joseph McMillan, director of the office of Equal Opportunity Programs; and Horace King, registrar.

When requests involve data in a sensitive area, such as minorities, disadvantaged students, or women, the president will be asked to appoint two temporary additional voting members chosen for their special competence in that area, Cantlon said.

Excepted from screening committee approval will be requests for internal studies by the offices of the president, the provost and institutional research.

Procedures governing the release of individual academic records were approved by the Board of Trustees in

Volunteering to go to jail

By BEVERLY TWITCHELL Associate Editor, Faculty News

Girls must be pretty bad to get to the Ingham County Jail, Dick Poynton, director of the jail's rehabilitation program, was told. So why bother teaching them things like typing and shorthand?

Because three girls left the jail and enrolled in business education at Lansing Community College.

And because the purpose of the rehabilitation program is to build a momentum of desire not to return to the kinds of things that got them into Ingham County Jail (ICJ) in the first place.

So ICJ has developed a program involving some 48 persons — many of them volunteers, and many of them MSU employes, faculty, students or faculty wives — to work in both academic and in personal/professional capacities with the jail inmates.

THE WORK AT ICJ is one of several volunteer activities that could involve MSU faculty, staff, retirees, or faculty wives. John Cauley, director of volunteer programs at MSU, cites a need for permanent residents to work with volunteer programs, particularly in the spring and summer months when student volunteers are less available.

For example, some 65 students are working as volunteer probation officers, but many will be gone during the summer, Cauley says. This is a program where volunteers are needed on a one-to-one basis. Another such program is the Big Brother - Big Sister Program, which will lose many of its student volunteers during the summer.

Persons interested in doing volunteer work should contact Judy Sorum, assistant director of volunteer programs and coordinator of the volunteer bureau.

She said she is also interested in helping individuals start new programs. Jim Nevels, an instructor in American Thought and Language, began his own tutorial program (see related story) and received help through student volunteers referred to him through Mrs. Sorum's office.

The faculty or staff input into a program — be it counseling at Boys Training School, tutorials, day care or work at the jail — would be "sophisticated input," she said, and would provide the needed continuity.

MSU PEOPLE doing volunteer work

at ICJ serve in a variety of capacities. Some are practicum students; some began as volunteers and have since been hired as instructors; others assist in classes, or counsel or tutor.

Mrs. Lacy Cox, wife of an MSU faculty member, works as a volunteer teaching arts and crafts to female inmates. Dorothy I. Popejoy, assistant professor in health, physical education and recreation, developed a comprehensive proposal for the first physical education program at the jail.

Richard G. Johnson, associate professor of counseling and personnel services, is chairman of the ICJ Rehabilitation Advisory Board. He has been involved in volunteer work at the jail for four years.

Frank G. Dennis Jr., associate professor of horticulture, works as an instructor's assistant in teaching math. The instructor he assists is a graduate student in his department and Dennis serves on the student's dissertation committee.

Mrs. Louise Benson, works in the MSU library's circulation department and also serves as a volunteer librarian for the ICJ. three mornings a week.

Mrs. Benson, whose ICJ library includes 2,500 books from "Black Beauty" to "Catch 22" and "Is the World Our Campus?", says that inmates have encouraged her to read Herman Hesse and science fiction.

David H. Marin, an MSU student, has been instrumental in establishing an auto mechanics class for the inmates, for which the Lansing School District, after Marin's initial work, supplied an instructor.

Basil Stergios, a graduate student in horticulture, not only teaches math at the jail, but teaches it in Spanish to six Spanish - speaking inmates.

POYNTON AND Sherriff Kenneth Preadmore have high praise for MSU and its volunteers. Sheriff Preadmore refers to the "whole University of people" he has for resource, with the "expertise and sensitivities we need."

He talks about the kind of inmates he has: One - third first offenders; one - third second and third offenders; one - third sentenced; average age 21 to 24, with an estimated future average age of 17 to 21; 10 percent illiterate, 25 percent welfare - raised, 55 to 60 percent from broken homes, 9½ years average education.

He talks about what he is trying to do, ". . . challenge their minds and

L'ouise Benson: Bringing the library to inmates.

- Photos by Dick Wesley

imaginations and not put them back on the street where there's another kind of challenge."

And the difficulties: "It's a hard program to sell. Too many people still have the attitude that we should lock the door and forget about them (the inmates)."

And the importance of the volunteers: "The inmates know someone cares; they meet talent other than police; they get out of their cells (which are called dorms)."

For his efforts Preadmore recently received the Michigan Public School Educators award for outstanding service to adult education. And six other county jails have inquired about his rehabilitation program.

The program began in 1961 with group therapy sessions, Preadmore said, initiated with the assistance of an MSU professor. With growing concern about job employment (inmates couldn't get jobs either before or after their terms in jail because they couldn't read the job application), job application forms from businesses all over Lansing were obtained and used as "textbooks."

Eventually, the Lansing School District offered to provide an instructor for every 22 students the jail could provide, and the program was approved as an adult education program which can test and award high school diploma equivalencies. Federal funds have been obtained to support the program, and an \$85,000 proposal was submitted to the Lansing Model Cities program — because 52 percent of ICJ's inmates come from the Model Cities area, Poynton said.

Classes in math, English, social studies, physical education, and arts and crafts are being taught — in the chapel, in hallways, in small rooms, wherever space is available. Inmates participate on a voluntary basis.

Jerome Scott is a 20 - year - old high school dropout in ICJ on a larceny charge for a one - year sentence. He was in the jail eight months before he was sentenced, he said, and has been taking all of the classes, "to facilitate my time."

Scott says he is now ready to take his high school equivalency test, and speaks of "intellectual hungers" and a change

Dick Poynton: Opening the jail doors.

in attitude toward educational values. "You have a lot of time to think about it here."

Scott is also editor of RAPport, an inmate news - bulletin that he initiated.

Ondie Brum, 21, has four months to go on a one - year sentence on a drug charge. He also works with RAPport and serves as the inmate librarian. The classes, the library, the newspaper, he says, all serve to show that "we're not confined to mental vegetation."

Poynton sees the volunteers as the initiators, the innovators. He's open to new ideas, he says. "I view myself as attempting to open doors of the jail, rather than the traditional viewpoint of keeping the men in isolation.

"The volunteer personalizes institutionalization and prevents alienation."

If an inmate is a security risk (an example was a Black militant considered too disruptive to attend classes with other inmates), the instructor is allowed into security areas to meet with the inmate on an individual basis.

Poynton speaks further on volunteers: "It's therapeutical to talk with someone you respect and have confidence in — someone who is not a paid instructor or a guard. It's an opportunity for a redefinition of relationships."

He would welcome MSU staff people as volunteers, he said, because of their "stability, maturity, sense of commitment, professional attitude, and expertise in an area."

How one instructor started his own tutorial program

You can't begin talking about skills development until you talk about personal problems, says Jim Nevels, instructor in American Thought and Language. "Skills development is the easy part of education."

So Nevels, who is also a master's candidate in administration and higher education and a part - time counselor at Everett High School, volunteered his time to develop a program of tutoring for Lansing area high school dropouts and potential dropouts.

With about 13 MSU students who volunteered through the MSU Volunteer Bureau, Nevels meets every Monday and Thursday evening with some 30 kids, mostly black, at West Junior High School. The sessions are about half tutorial and half group work, "dealing with self - concepts, getting the students to see themselves in their role as students, developing positive attitudes toward that role."

It's a social event, it's a rap session, it's a "stay in school" push. Some are potential college students, but the program isn't designed just to prepare people for college, Nevels says. "You

get a conglomerate of people, you get all kinds of needs. We try to fit the needs that are there.

Nevels says he needs more people to work on various aspects of the program, but says it is difficult to find people "willing to give time and energy in working with kids on their own terms."

He'd like to see the program branch out, to become "a friendship thing," meeting other places. He'd like to have a psychiatrist or psychologist work with the program to identify behavioral problems. He'd like to meet with parents of the students, "to talk about what you have to do to help keep a kid in school." And he'd like to institute sensitivity training for teachers, so they can understand what it's like to be 75 black students in a student body of 2,200, as it is at Everett High School.

And he'd like to research the program, to make it an ongoing program, with funding sources. So "we need a program package," he says, "with objectives and an evaluative component to test the objectives."

"It just keeps getting bigger and bigger," he says.

Legislative report

Higher ed decisions stalled by \$

With Michigan's economy still in trouble, the State Legislature appears to be slowing its usual hearing procedures regarding higher education appropriations. Normally, colleges and universities attend hearings before the appropriation committees in the House and Senate by April. But this year's hearings haven't even started.

As has been true from the start, money problems continue to plague Michigan's 76th Legislature. Most observers see little hope for any increase in dollars for higher education without some kind of a tax package. There may still be a few hopes that the economy will pick up by the time money decisions for higher education have to be made; however, economic improvement has not come as fast as many in state government had hoped.

There are indications that if the legislative slowdown on money decisions continues, higher education appropriations could receive approval after July 1. This could mean that colleges and universities would be forced to operate on current budgets until new appropriations are available. So while the legislature wrestles with decisions on taxes, money for higher education will have to sit on the back burner.

THE LEGISLATURE can be expected to become increasingly involved in a wide range of higher education issues. Some topics of interest are:

* * *

1. Accountability — Many see the inclusion of faculty contact hours in last year's appropriation law as only the beginning of greater efforts to make state - supported universities and colleges more accountable to the taxpayer. There is increasing grassroots support for this kind of move.

In addition to contact hours, the

legislature may also take a look into faculty tenure. Again, the chief desire for such a study will be to make faculty more accountable to the public.

Several state legislatures have already taken such a look. In Florida, a bill was defeated which would have abolished tenure in state universities and colleges. A subcommittee in the Florida Senate, however, is currently studying tenure abuses and is expected to make suggestions as to how the tenure system can be improved.

In Utah, a similar bill to abolish tenure was killed. The University of Utah has started a study of tenure as a possible means of staying ahead of any future legislative actions concerning tenure.

Most observers feel that any action in the Michigan Legislature will probably be in the direction of studying faculty tenure practices. Some higher education spokesmen point out that tenure abuses in universities and colleges are not as great as abuses in the state civil service system and social security.

However, the folks back home want their legislator in Lansing to take a long, hard look at why university faculty are given permanence in their jobs when the average citizen does not have such arrangements.

2. Governance of Higher Education — As has been true for several years, feelings continue that the legislature should have greater control over the state - supported higher education institutions, especially the "Big Three," MSU, the University of Michigan and Wayne State University.

One senator recently sent a questionnaire to his constituents asking for their opinion on a variety of issues including whether the Michigan Constitution should be changed so as to reduce the power of the governing

boards of the "Big Three" universities.
Constituents were also asked if the
constitution should be changed so that
the governing boards would be

appointive instead of being elected and the state director of education or a board would be appointive rather than the elected State Board of Education.

3. Housing Options — Many Legislators report receiving mail indicating strong disapproval of proposed coed alternate living arrangements at MSU. Although the issue has been currently settled by the Board of Trustees, it may still have brought about Legislative attention to the question.

RECENT BILLS of interest to higher education include: A bill introduced by Rep. Brennan and Rep. Jim Brown calling for a change in the Michigan Constitution to allow for appointed members to the governing boards of the "Big Three" universities; a proposal by Rep. Geerlings requiring that collective

bargaining sessions of public agencies be opened to the public; and a bill introduced by Rep. Elliott to provide incentive awards to needy high school juniors seeking higher education.

Also of interest: A bill by Rep. Snyder which provides for a higher education loan fund; Rep. Vaughn has introduced three bills calling for student members on university governing boards and the State Board of Education, and a bill which would create a State Student Grievance Commission; Sen. Stamm has introduced a bill creating a State Educational Telecommunications Commission for coordinating educational television in the state; a proposal by Sen. Bishop which would place the Michigan Higher Education Facilities Authority under the State Department of Education; and two bills by Rep. Mahalak providing tuition - free higher education for children of disabled or deceased servicemen or -MIKE BORN

Pianists headline L-C Series

Van Cliburn and Jacques Loussier, two concert pianists with distinctly different keyboard styles, will be

JACQUES LOUSSIER

presented by MSU's Lecture - Concert Series next week.

At 8:15 p.m. Wednesday (April 14) in the Auditorium, Jacques Loussier, joined by bass player Pierre Michelot and drummer Christian Garros, will appear in "Play Bach," a live jazz concert based on improvisations of the music of Johann Sebastian Bach. This is a "Special" in the Lecture - Concert Series.

Van Cliburn, one of American's best-known concert pianists, will be heard in concert at 8:15 p.m. next Friday (April 16) as a Series "B" attraction.

His program will include Brahms' "Rhapsody No. 2 in G Minor" and Beethoven's "Sonata in E Flat Major".

MDs, osteopaths trying to make marriage work

The March 12 issue of Medical World News contained a report on the status of MSU's Colleges of Human Medicine and Osteopathic Medicine. Portions of that article follow.

It may have been a shotgun wedding — with the weapon pointed at both parties — but the two are going at it with a will to make the marriage work. Future doctors of medicine and of osteopathy will be studying this fall in separate colleges on the same campus — Michigan State.

"It's a crazy situation to have two medical schools on one campus, but we're determined to stay loose enough to take advantage of it," says Hilliard Jason, director of medical education research and development for the College of Human Medicine.

The "crazy situation" was forced by the State Legislature. A few years ago Michigan's DOs mounted a campaign for a state - supported college of osteopathy, and they have political clout, constituting as they do 17 percent of the state's medical practitioners and a third of the GPs. Over the bitter opposition of the MDs, the DOs won, but the 1969 law required that the Michigan College of Osteopathic Medicine be included in an existing state university. MCOM opened under private charter with 20 students in temporary quarters at Pontiac in the fall of 1969, but this year it becomes geographically integrated with the rest of MSU.

HOW MUCH integration of education can there be? Both sides are wary about discussing the matter, preferring to let things work themselves out in the course of time. So far, there has been only one dual appointment: Jason's associate in medical education research....

Magen (Myron S., dean of osteopathic medicine), hopes to use the University to broaden students' interest in the social aspects of medicine, using such resources as economists, insurance experts, social workers and the Center for Urban Affairs.

Both colleges will draw on the University for the basic sciences, and both will use the same instructors, but the two sides agree that the courses themselves may not be identical

* * *

DESPITE THIS INITIAL caution, some people hope that in the course of time the two schools will develop a fair degree of integration. "I see no reason why in some areas, say radiology and anesthesiology, they can't have one department," says Schuetz, (Robert D., acting director of the Institute for Biology and Medicine). "Yes, that raises questions about accreditation and the like, but this is the first chance we've had to ask those questions. Why don't we ask them? From which school would the chairman come? Would there be co-chairmen? Would MDs work

for DOs or vice versa? With questions like these to be answered, Mike Magen obviously can't go too far too fast."

Chemist Schuetz has even thrown a challenge to Magen that might conceivably end the separation of the professions: "The basic tenets of osteopathy are unproved. Here Mike has the University resources and backup to do the research and test it out. If he's got something good, the MDs ought to adopt it; if he hasn't the DOs ought to abandon it. Let's face the consequences as we find them and let's all accept them. It ought to end the separation of the DOs and the MDs in either case."

THE YOUNG AND energetic Magen takes up the gauntlet with a grin,, and he appears unworried about the outcome. "What we are teaching is a lot less empirical than what the psychiatrists are teaching," he says. "There's no question clinically that what we use works.

"We're setting up a department to bring together a multidisciplinary group for teaching and research. There's much evidence scattered through the literature in various places, and one of our first jobs will be to bring it together

Scheutz is convinced that "the best thing that could happen would be to get them altogether in one building, where they'll be sharing problems and seeing each other every day. I'd like to see Deans Hunt (Andrew G., of human medicine) and Magen even have adjoining offices."

Hunt is willing; he thinks medicine may have some things to learn from osteopathy. "Their hypothesis makes it impossible to practice medicine by telephone," he says. "You've got to use your hands and be involved. What they do differently, I think is very modest. After all, physiotherapists use massage; orthopedists use manipulation. It's the social and political differences that have to

"I think medical men expect us to cannibalize osteopathy. To my way of thinking, this isn't so. I don't expect it to happen in my lifetime."

To that thought, Magen adds a fervent amen. What he foresees is not amalgamation, but accommodation, a point he emphasized in his talk to the Joint MD-DO meeting.

"Both professions have a mandate from the people of this state to show that two primary health care professions can coexist," he said, adding that the time for recriminations has passed. "We have been forced by outside interests into a new maturity. Hopefully, what we do in this city will set a pattern for cooperation for both professions throughout the nation."

Reeves . . .

(Concluded from page 1)

THESE RECOLLECTIONS and many others, from educational leaders and former public servants, form a key chapter in the dissertation of recent MSU student Barbara A. Nicholas.

Unlike most dissertations—those forbidding books, bound in black and abandoned on library shelves—Barbara's is the compassionate story of one man's almost incalculable contributions to American education.

Her book opens on a picture of Reeves: Pipe in mouth (his trademark); strong chin thrust slightly forward; his steady gaze looking out through vintage eyeglasses under thick white eyebrow. His conservatively striped suit belies the innovator inside. Her work is dedicated: "To Floyd W. Reeves who had the ambition, the courage, the ego and the brilliance to make a difference."

That one sentence really sums it up. The details of the lifetime that made such a difference to Michigan State, to junior college curricula in Illinois, to the Philippines, to three presidents and to the nation's college-bound G.I.s. These details would fill a book.

Coincidentally, Barbara Nicholas received the Ph.D. the same day that MSU paid its highest tribute—the honorary doctor of laws degree—to a loyal servant, Reeves, age 80, distinguished professor emeritus of education.

IN 1922 he left elementary and secondary school teaching and administration, moved on to university teaching and his own advanced degrees, and in 1929 launched what was to be the most productive, important and longest phase of his career. He joined the faculty of the University of Chicago.

As professor of education and director of the University of Chicago Survey, he conducted a monumental study of more that 100 institutions of higher learning.

Reeves envisioned things happening today such as the expansion of adult education centers, use of television as a teaching aid, and student exchange programs around the world.

In a forecast placed in the cornerstone of the graduate education building at the University of Chicago in the early 1930s, Reeves stated:

"There will be a tendency to make more extensive use of mass production methods in education. This will result in a more highly centralized educational system. Educational centers will be established for the purpose of broadcasting lectures, music, art exhibits, and demonstrations of various kinds.

"Methods employed in broadcasting will include the filmophone and television. Travel will have an important place in formal school programs..."

While still serving on the Chicago faculty, Reeves began his long career as a public servant.

From 1933-35, he was director of personnel and of social and economic planning for the Tennessee Valley Authority.

He soon became known nationally and internationally, serving in key administrative positions for President Franklin D. Roosevelt: Chairman of the advisory committee on education; director of the American Youth Commission of the American Council on Education; chairman of the Conference on Post-War Readjustment of Civilian and Military Personnel in which he helped draft the "G.I. Bill of Rights."

He also headed the UNESCO Consultative Educational Mission to the Philippines.

JOHN E. IVEY, MSU's dean of education, was an associate of Reeves during the TVA years. It is his belief that Reeves is responsible for more things than he will be given credit for and that "he is probably one of the four or five most productive people who has developed in this country in the last 20 to 40 years."

Reeves, who has received honorary degrees from five universities and been asked to head three others, finally came to MSU as a full-time faculty member in 1953.

He continued to serve as a consultant to President Hannah in untold ways, including the selection of deans, revision of curricula, and innovations in administration.

"Reeves was probably as influential in relation to President Hannah as anyone on campus," Wilbur B. Brookover reports. "His recommendations were not always followed, but this University has a clear stamp of Floyd W. Reeves."

While conceding that every man must have weaknesses too, Nicholas contends that "Reeves never could have done the things he did without possessing a great number of strengths."

And she concludes: "The influence he has made on education is proof that he was a giant in the field-almost superhuman."

Business committee rejects 'Campaign GM' proposals

The University Business Affairs Committee has recommended that MSU vote its General Motors Corporation stock with management at the May 21 annual meeting of GM shareholders.

In a special meeting last week, the committee voted to reject three proposals raised by the Project on Corporate Responsibility's "Campaign GM, Round II."

The committee's recommendations have been given to the vice president for business and finance, and are expected to be presented to the board of Trustees. MSU holds 5,593 GM shares. Campaign GM's three proposals included:

* A bylaw amendment that would

provide "a process for shareholder nomination and election of directors" of the corporation. It would permit candidates nominated by shareholders to be listed together with management's nominees on the proxy. (The committee rejected this, 7-6.)

* A bylaw amendment to provide that "regardless of the size of the Board of Directors, three of the directors would be nominated by constituent groups of employes (including nonunion employes), consumers and dealers." (Rejected, 11-1).

* A requirement that GM disclose in its annual report "three areas of immense concern to shareholders and the public: Air pollution control, auto safety, and minority hiring and franchising practices." (Rejected, 7-5).

Willis Wood wins Sigma Xi award

The winner of this year's Senior Sigma Xi Award for Meritorious Research is Willis A. Wood, professor and chairman of biochemistry.

Chairman of the Sigma Xi Awards Committee, James H. Fisher, professor and chairman of geology, described Wood as a remarkable teacher and researcher.

"Any professor who can do an outstanding job of teaching and at the same time do an outstanding job of research — as Wood has — is an unusual faculty member in this day and age.

"His devotion to scientific research is matched by his attention to students at both the undergraduate and graduate levels. A man of intellect and wit, he brings a contagious enthusiasm to the lecture hall and the laboratory.

"His students regard him as a congenial friend and a gifted teacher whose concern for their personal success is unselfish and sincere."

In 1970 Wood received MSU's highest

honor, the Distinguished Faculty Award.

Wood's research centers on microbial enzymology, and he has done extensive work in development of automatic laboratory instruments.

In his pursuit of his special interest in applying electronics to biochemistry, he helped develop a spectrophotometer which is used in laboratories throughout the world. His contribution to the modification of the spectrophotmeter to measure enzyme reactions contributed to the success of the manufacture of that device.

Wood is also recognized internationally for his work on the metabolism of microscopic forms of life. Recently he has focused his work on how enzymes work and how enzyme activity is regulated.

He has authored more than 100 articles on metabolism and enzymes as well as a dozen chapters in books on biochemistry and microbiology.

Nonreappointment . . .

(Concluded from page 1)

statement on "The Standards for Notice of Nonreappointment," according to Sigmund Nosow, professor of labor and industrial relations and president of the MSU chapter of the AAUP.

The Committee A report, which will be voted upon by the AAUP membership at the 57th annual meeting April 16 and 17, recommends that written reasons for nonreappointment be given to a faculty member if he requests it.

This is already the practice at several institutions, according to the committee report.

Other recommendations in the Committee A report include:

*That faculty members be advised Faculty Handbook.

early in their appointments of the substantive and procedural standards employed in decisions affecting renewal and tenure.

*That the faculty members be advised of the time when decisions affecting renewal or tenure are ordinarily made, and that they have an opportunity to submit material which they believe will be useful in the consideration.

*That notice of nonrenewal be given in writing, and that the faculty member have an opportunity to request reconsideration by the decision - making body.

These recommendations are similar to recommendations approved by this University and now incorporated in the Faculty Handbook.

The Committee A report

Following are portions of the AAUP Committee A report on "Procedural Standards in the Renewal or Nonrenewal of Faculty Appointments:"

"Resolving the question of whether a faculty member should be given a statement of reasons, at least if he requests it, requires an examination of the needs both if the institution and of the individual faculty member.

"A major responsibility of the institution is to recruit and retain the best qualified faculty within its means. In a matter of such fundamental importance, the institution, through the appropriate faculty agencies, must be accorded the widest latitude consistent with academic freedom and the standards of fairness.

"Committee A recognizes that the requirement of giving reasons may lead, however erroneously, to an expectation that the decision - making body must justify its decision. A notice of nonreappointment may thus become confused with dismissal for cause, and under these circumstances the decision - making body may become reluctant to reach adverse decisions which may culminate in grievance procedures.

"As a result there is a risk that the important distinction between tenure and probation will be eroded.

"To be weighed against these important institutional concerns are the interests of the individual faculty member. He may be honestly unaware of the reasons for a negative decision,

and the decision may be based on a judgment of shortcomings which he could easily remedy if informed of thom.

"A decision not to renew an appointment may be based on erroneous information which the faculty member could readily correct if he were informed of the basis for the decision. The decision may be based on considerations of institutional policy or program development which have nothing to do with the faculty member's competence in his field, and if not informed of the reasons, he may mistakenly assume that a judgment of inadequate performance on his part has been made.

"In the face of a persistent refusal to supply the reasons, a faculty member may be more inclined to attribute improper motivations to the decision making body, or to conclude that its evaluation has been based upon inadequate consideration.

"If he wishes to request a reconsideration of the decision, or a review by another body, his ignorance of the reasons for the decision will create difficulties, both in reaching a decision whether to initiate such a request and in presenting his case for reconsideration or review.

"After careful evaluation of these competing concerns, Committee A has concluded that the reasons in support of the faculty member's being informed outweigh the countervailing risks . . ."

Private donations up by 30 percent

Unlike many Big 10 schools, MSU received a 30 per cent increase in private donations during the past year, according to John R. Kinney, executive director of the Alumni Association.

The total figure of more than \$1.3 million, says Kinney, represents an increase in dollars contributed to several types of giving programs. For example,

the Ralph Young Fund, which supports athletic scholarships, increased more than \$40,000, and the annual fund increased more than \$78,400.

Sixteen donors were added to the Presidents Club (eligibility requires a donation of \$10,000 cash or \$15,000 in deferred gifts), and 150 donors added their names to the Centurion Club (\$100 minimum) membership.

MSU DEVELOPMENT FUND DONATIONS

Serving MSU

The 'girl Friday' office

When your secretary calls to say she won't be in and the work is piled up, there's help available. Central Stenographic, the "girl Friday" office of MSU, provides departments with a helping hand with transcription, or, when necessary, a temporary secretary.

Some 170 company - maintained dictating machines are loaned by the office to departments which might otherwise have to employ an additional stenographer during overload peak periods.

A normal workday for Central Stenographic might include transcribing letters, rough drafts of speeches, outlines, abstracts, journal articles, monthly extension reports, notes, bibliographies, radio scripts, tables, minutes of meetings or research papers. The busiest time is usually between terms, when more than 200 people send dictation to the office at one time.

In accordance with a policy adopted by the Administrative Group, transcription is not received for theses, book manuscripts or manuscripts to be published and sold. For this reason, transcription of manuscripts more than 10 pages in length must be approved by

HAZEL BRICKLEY

the dean of the college. Work is not done for undergraduate or graduate students.

The Flexowriter, that will type back material in original form, is used for letters in quantities up to 200, free of charge. Beyond that limit, a department is charged 10 cents per letter.

Since letters are given priority, four Flexowriter machines with two operators type out a continuous flow of ready - to - mail letters.

A bulletin typewriter, providing extra large type, is also available for speeches. Pick-up and delivery service of dictation is available on the main campus.

In conjunction with the personnel office, Central Stenographic also provides assistance to departments needing a temporary secretary during vacation periods, illness or resignation of a departmental secretary.

Requests for transcription service should be directed to the office at 355-6620. If an office is in need of a temporary secretary, requests should be made to the personnel office at 353-4330.

Supervisor of the 14-girl office, located in Room 10, Berkey Hall, is Mrs. Hazel Brickley, an MSU employe since 1929.

'Requiem' slated for Good Friday

The MSU Chorus and Orchestra will present Dvorak's "Requiem" this Good Friday at 8:15 p.m. in the Auditorium.

The performance, free to the public, will be directed by Harold F. Brown, associate professor of music. Featured will be four soloists: Soprano Mrs. Giovanna Colonelli Burkh; alto Miss Ethel Armeling; tenor Loren Jones; and bass Keith Dearborn.

Mrs. Burkh is the wife of Dennis Burkh, director of the MSU Symphony Orchestra, and Miss Armeling and Jones are associate professors of music. Dearborn is a vocal music instructor for the Oak Park Schools.

Achievements

Space limitations dictate that material submitted for the "Achievements" section be considered for its general interest or importance. We hope to include such items as national or professional awards and honors; major publications, such as books; significant civic or public accomplishments. We don't have enough space to list all technical papers presented, journal articles published and professional meetings attended.

AXEL ANDERSEN, extension professor of botany and plant pathology, and CLIFFORD BEDFORD, professor of food science, have won Distinguished Service Awards from the Michigan Bean Shippers Association. They were cited for their research and educational contributions to the state's bean industry.

LESTER T. BELL, extension forestry specialist, won the 1971 Distinguished Service Award from the Michigan Forest Industries and the Michigan Tree Farm Committee. He was honored for contributions to private forestry in Michigan.

COLE S. BREMBECK, professor and associate dean of education, and director of the Institute of International Studies in Education, is president-elect of the 1,500 - member Comparative and International Education Society.

ANTHONY DeBLASI and IRVING TARAN of the art department have won awards for entries in an exhibit sponsored by the Detroit Institute of Arts' Founders Society.

DeBlasi's "Long Distance" won the top award, the Founders Purchase Prize. Taran received the Werbe Award for his acrylic polymer painting, "Mosie's Dream."

JOHN E. NELLOR, professor and assistant vice president of research development, is among five scientists

THURSDAY, APRIL 8

7 p.m. (FM) — "MSU Concert" presents variations on a Theme of Haydn, Op. 56b, by Brahms, and other music for piano performed by Ralph and Albertine Votapek.

SATURDAY, APRIL 10

1:30 p.m. (AM) – "Newspapers, TV, Radio: Can They Be Trusted?" is discussed on "Urban Confrontation." 2 p.m. (FM) – The live Metropolitan Opera is Offenbach's "Tales of Hoffmann."

SUNDAY, APRIL 11
2 p.m. (AM-FM) — The Cleveland Orchestra performs Symphony No. 8 by Haydn, Music for Prague 1968 by Husa, Overture and Arias by Rossini.

TUESDAY, APRIL 13

1 p.m. (AM) — "Transportation 1984; The Inner City Journey" is discussed by three transportation specialists. 7:30 p.m. (FM) — "Bookbeat" features Ramsey Clark, author of "Crime in America.

WEDNESDAY, APRIL 14
1 p.m. (AM) – Keith Groty, assistant professor of labor and industrial relations, discusses "The Prospects for Collective Bargaining in Higher Education in Michigan."

WMSB

SUNDAY, APRIL 11

11:30 a.m. — In the final episode of "The First Churchills, John and Sarah Churchill are banished from England. 1 p.m. — White House communications director Herbert Klein is interviewed by Elizabeth Drew. 3 p.m. — The National Ballet of Canada performs "Cinderella." 4:30 p.m. — Sammy Davis Jr. discusses the problems of being black in a white — controlled industry on "Black Journal." 10 p.m. — "Assignment 10" visits the 70 - year - old Owosso woman who for 23 years has helped servicemen overseas to call their families. 11 p.m. — "Much Ado About Nothing" Part 2.

MONDAY, APRIL 12
7 p.m. – Football coach Duffy Daugherty dicusses prospects on "Spartan Sportlite."

named to review and evaluate science programs in Puerto Rico.

JAMES NIBLOCK, professor and chairman of music, and H. OWEN REED, professor of music, have been named ASCAP Award winners again this year. The awards, designed "to assist and encourage writers of serious music," are from the American Society of Composers, Authors and Publishers.

VICTOR G. STRECHER, professor of criminal justice, has been selected as a 1971 - 72 intern by the American Council on Education. As one of 40 participants in the Academic Administration Internship Program, he will be assigned to the office of a university president or other high administrator to observe academic administration.

PRESIDENT CLIFTON. WHARTON JR. has been named to the 26 - member Commission on Non -Traditional Study. Funded through the Carnegie Corporation, the commission will explore the structure of post secondary education and make recommendations concerning educational of veterans. needs housewives, older persons individuals not served by higher education.

Books

WILBUR B. BROOKOVER, professor of education and sociology, is a coauthor of "Society, Schools and Learning," cited as one of 20 outstanding education books published last year. The book, coauthored with Edsel L. Erickson of Western Michigan, focuses on social factors involved in school learning. It was cited by the National Education Association journal "Today's Education."

BRYAN T. DOWNES, associate professor of political science, is the author of "Cities and Suburbs: Selected Readings in Local Politics and Public Policy." It is published by Wadsworth Publishing Company, Inc., Belmont, Calif.

A major study of John Calvin's secular thought by W. FRED GRAHAM has been published by the John Knox Press (Richmond, Va.). The work, "The Constructive Revolutionary: John Calvin and His Socio - Economic Impact," analyzes Calvin's social and economic influence on the Geneva of his time and the Western world today. Graham is associate professor and director of Studies in Religion, Justin Morrill College.

Pop culture opens today

The Popular Culture Association (PCA), today through Saturday at Kellogg Center, begins with a keynote program at 2 p.m. today with a speech on popular literature by David Madden of Louisiana State University.

At 8:45 tonight, Maurice Crane, professor of humanities, and the New Michigan Jazz Group will present "The Popular Musician and His Craft: Music and Commentary."

Panels, lectures, workshops and symposia will get underway at 9 a.m. Friday. Several sessions will begin each hour until 4:30 p.m. Friday and from 9 a.m. to 11 a.m. Saturday.

Registration is at Kellogg Center. The fee will be \$10 or \$5 for students.

Bulletins-

VET MED OPEN HOUSE The College of Veterinary Medicine will hold their eighth annual open house, entitled "Vetavisit 1971," at the Veterinary Clinic, Wilson Rd., 9 a.m.-5 p.m. this Saturday. More than 2,500 visitors are expected to attend.

NEW EVENING HOURS To accommodate students and faculty who have night classes, the Crossroads Cafeteria will be open for coffee 7:45-9 p.m. Monday through Thursday.

TROPICAL STUDIES The Tropical Studies group will meet at noon Wednesday, April 14, in Parlor C, Crossroads Cafeteria, for lunch. A lecture will follow in Room 106, International Programs Ctr. Dr. Jack King of zoology will speak on "Compatability of Agriculture and the Elephant in Ceylon."

TALK ON STUDY TOUR At 7:30 p.m. Wednesday, April 14, the Russian and East European Studies Center will hold a discussion on this summer's Yugoslavian study tour offered through the School of Journalism. Slides of last year's seminar will be shown at the meeting in the 1961 Room of Case Hall. Anyone interested is invited.

"The World's Education Crisis," a 5-week **EDUCATION SEMINAR** seminar covering global and domestic implications for education of changes in contemporary society, will begin April 14. Cosponsored by the Evening College and Edgewood United Church, the Wednesday programs will include many noted speakers. Using a 2-way conference telephone the first speaker will be world affairs educator Dr. Harold Taylor on "What is Happening to Mankind - our Contemporary Crisis." For information, contact the Office of International Extension, 8 Kellogg Ctr., 3-0682.

FAMILY MOVIES New this month for the Faculty Club are Monday evening family specials, including a buffet dinner starting at 5:30 p.m., followed by 8 p.m. movies. Films will feature Laurel & Hardy on April 12; Charlie Chaplin on April 19. There is no charge for the movie program which will last less than an hour.

VIENNESE DINNER On Saturday, April 17, the Faculty Club will feature a Viennese special, including wine, Austrian-Hungarian and Balkan foods, music, entertainment and dancing. The event begins at 6:30 p.m. No reservations will be accepted after 7 p.m., April 14.

DOCUMENTARIES SHOWN The MSU Students for Farmworkers will sponsor two films on grower-farmworker problems at 8 p.m. Tuesday and Wednesday, April 13-14 in Room 31 of the Union. "Harvest of Shame," a CBS-produced documentary, examines the living and working conditions of the people who harvest fruits and vegetables, including viewpoints of the grower, migrant laborer, itinerant minister, American Farm Bureau, and the federal government. "Decision at Delano" is a colorful documentary recording the drama and controversy surrounding the organization of Delano grape workers by Ceasar Chavez. Donation is 50 cents.

JOBS FOR PH.Ds? Dr. Martin A. Paul, executive secretary of the division of chemistry and chemical technology, National Academy of Sciences and Research Council, will discuss the current job situation for Ph.D. scientists and engineers in a talk at 3 p.m. Friday, April 16, in Room 138 of the Chemistry Bldg. Open to all interested persons.

IM HOURS CHANGED Both the Women's IM and Men's IM will be closed Easter Sunday. The Women's IM is also offering 5-9 p.m. swimming in the lower pool Monday-Friday for women on campus. The 9 p.m. closing time for the building is now effective due to financial cutbacks.

FACULTY GROUP The Faculty Christian Fellowship group will meet at noon Wednesday, April 14, in Room 2 of the Center for International Programs. The speaker format for the term will be discussed. Everyone is invited.

TEXTILE SEMINARS Consumer/industry communication will be discussed in a followup series to the Consumer Seminar Series sponsored by the human environment and design dept. Two speakers from textile-related fields are scheduled for April lectures. Monday, April 12, Thomas Doherty of Uniroyal, Inc., Mishawaka, Ind., will speak on "Communication Through Design" at 3:30 p.m. in the Union Gold Room. Ellis Meredith, executive vice president of the American Apparel Manufacturers Assoc., will explore "Communication by Mass Production" on April 22. For more information, call 5-7712.

Dr. Willis A. Wood, chairman of biochemistry **SIGMA XI MEETING** and senior Sigma Xi award winner, will be the speaker at the next Sigma Xi meeting at 7:30 p.m. Tuesday, April 13, in 101 Biochemistry. Dr. Wood will speak on microbial responses to xenocarbohydrates. Open to the public.

GAMUT ON WMSB-TV This Saturday, Gamut presents "The Boob Tube Is You," an experiment in subject video tape communication including a montage of music, underground film, and manipulated reality where television folds back into itself. The program can be seen at 11:30 a.m. Saturdays on WMSB-TV, channel 10.

MSUBWC SEMINAR Dr. Walter Hodgson, former head of the music dept., will talk on "Tune in to Music" at noon Thursday, April 15, in 203 Olds Hall. Dr. Hodgson will demonstrate ways of improving one's musical appreciation. The talk is part of the MSU Business Women's Club Paper Bagger's Seminar series.

HOSPITALITY EVENT The annual Hospitality Weekend, sponsored by the students of HRI, will be held next weekend, April 17-18. Following a noon buffet in the Union, a seminar will feature four speakers: James Farmer, Dr. Robert L. Green, Dr. Frank H. Sargent and Chester Hall. A wine-tasting reception at 7 p.m. will be followed by a gourmet dinner with a Spanish accent in the International Center. Sunday morning activities include a continental breakfast in Kellogg Ctr. Reservations are being accepted.

GEOSCIENCE CONF. Modern trends in geoscience education will be discussed by four speakers in a conference Friday, April 9, in Room 204, Natural Science. Speakers for the program, sponsored by geology, include: J. L. Snyder from the National Science Foundation; K. R. Cranson from Lansing Community College; F. D. Holland, director of education for the American Geological Institute, and F. H. T. Rhoads from the University of Michigan. The program will run 10 a.m. to 4 p.m. and is open to the public.

Prof. John Alford of English will present an LECTURE ON ART illustrated lecture on medieval art and architecture at 7:30 p.m. Wednesday, April 14, in Room 34 of the Union. Prof. Alford's talk was cancelled earlier because of a conflicting meeting.

LECTURE-CONCERT Keyboards take the spotlight this week in the Spring Lecture-Concert Series. "Play Bach" will feature the Jacques Loussier Trio as a "special" at 8:15 p.m. Wednesday, April 14. Internationally known pianist Van Cliburn will appear at 8:15 p.m. Friday, April 16, in a Series "B" concert. Tickets are available at the Union Ticket Office or at the door.

INFORMAL NOTICES

KNITTING GROUP The Faculty Folk Knitting Group will meet at 9:30 a.m. Wednesday, April 14, at the home of Mrs. Yvonne Kitchen, 251 Noble Rd., Williamston, 655-3073.

RETIREES MEET The Retirees Club will meet at 2:15 p.m. Tuesday, April 13, in the third floor parlor of the Union. Speaker for the program will be Prof. Emeritus Howard F. McColly who will discuss "Asian Productivity." All retirees are welcome.

FRENCH GROUP MEETS The Faculty Folk Intermediate French Group will meet at 1:30 p.m. Tuesday, April 13, at the home of Mrs. Donald Johnson, 1524 Cahill Dr., East Lansing.

ANTIQUE INTEREST The Faculty Folk Antique Interest Group will meet at 9:30 a.m. Tuesday, April 13, at the home of Mrs. George Petrides, 4895 Barton Rd., Williamston.

FACULTY FOLK MEET The Faculty Folk will meet at 1:30 p.m. April 16 at the Horticulture Bldg, for a program on use of plants in the environment. Horticulture staff members will present illustrated lectures and demonstrations and conduct tours of the conservatory and greenhouse labs. Mrs. James E. Moulton and Mrs. J. Lee Taylor are cochairmen; horticulture faculty wives, hostesses.

CREATIVE WRITERS The Faculty Folk Creative Writers will meet at 1:15 p.m. Monday, April 12, at the home of Mrs. Leon Weaver, 2005 Yuma Trail, Okemos. Mrs. Tom Johnson will read.

Items for the bulletin section, pages 7-8, may be submitted by an authorized MSU employe if the event or information pertains to events either held on campus or sponsored by an MSU organization. Material should be submitted to Sue Smith, Dept. of Information Services, 109 Agriculture Hall, (517) 353-8819. Deadline for submitting information is 5 p.m. Tuesday preceding the Thursday publication. The calendar of events will cover an 8-day period, Friday through Saturday.

H. EL KHADEM, Ohio State U.-Azides and hydrazones of sugars of biological importance. 4 p.m., 136 Chemistry Bldg. (Biophysics).

G. WILKINSON, Chemistry Imperial College, London-Mechanism of hydroformylation using rhodium catalysis. 4 p.m., 138 Chemistry Bldg. (Chemistry).

ANATOL RAPOPORT-Tacit communication in experimental games. 3 p.m., Captain's Room, Union Bldg. (Communication).

IKE SCHNEIDER & JOHNNIE COLLINS-Application to the mineral soils of northern Michigan. 12:10 p.m., 209 Soil Science Bldg. (Crop & Soil

GEORG BORGSTROM-Food science forum. 8 a.m., 103 Food Science. (Food Science & Human Nutrition).

Tuesday, April 13, 1971

M. M. GREEN, U. of Mich.-Hidden stereochemistry in mass spectrometry. 4 p.m., 136 Chemistry Bldg. (Chemistry).

DANIEL D. MCCRACKEN, Consultant, Ossining, N.Y.-How to change a computer from slave to master without really trying. 7:30 p.m., 158 Natural Resources. (Computer Science).

T. P. LABUZA, MIT-Intermediate moisture foods. 4 p.m., 110 Anthony Hall. (Food Science & Human Nutrition).

KENNETH MCENTEE-Male infertility. 12:15 p.m., 213 Veterinary Clinic. (Lge. Animal Surgery & Medicine). NAT STENBERG, U. of Paris-Control of transcription in bacteriophage

lambda. 4:10 p.m., 146 Giltner Hall. (Microbiology & Public Health).

R. V. ERICKSON-Linear differential equations driven by Markov chains, with

application to population processes and control theory. 4:10 p.m., 405A Wells Hall. (Statistics & Probability).

Wednesday, April 14, 1971 G. WILKINSON, Chemistry Imperial College, London-On recent research, including the instability of transitional metal alkenes. 4 p.m., 138 Chemistry Bldg. (Chemistry).

RONALD KAISER, Recreation Services Division, Mich. Dept. of Natural Resources-Planning implications of the recreation bond program. 11:30 a.m., 338 Natural Resources. (Park & Recreation Resources.

IAN J. FRITZ, John Hopkins U.-Light scattering studies of phase transitions in solids. 1:40 p.m., 221 Physics-Astronomy. (Physics).

RICHARD STUCKEY-Effects of near UV-radiation and cholesterol on growth and sporulation of Cytospora cincta and C. Leucostoma. 4:10 p.m., 168 Plant Biology. (Plant Pathology).

GARY BLANCHARD & LAUREL ANDERSON-Atypical anemia in the canine. A literature review and case report. 7:45 a.m., S123 Veterinary Clinic. (Small Animal Surgery & Medicine).

Thursday, April 15, 1971

JAMES TROW-Some phanerozoic structures and ingeous racks of west Texas. 3 p.m., 204 Natural Science. (Geology).

A. BALDERESCHI, Bell Telephone Labs.-Theory of shallow impurities in semiconductors. 4:10 p.m., 221 Physics-Astronomy. (Physics).

HAROLD B. GERARD, UCLA-Combined effects of source and message on attitude change. 4 p.m., 304 Olds Hall. (Psychology).

Friday, April 16, 1971

JAMES M. TIEDJE-Soil microbial ecology. 3 p.m., 204 Natural Science Bldg.

CONFERENCES-

April 12-13 Workshop in Theory Pedagogy April 12-13 MSU Events Data Conference April 12-16 Basic Life & Health Ins. Inst. Detroit.

April 13-14 Michigan Licensed Practical Nurses Assn. April 14 Equine & Bovine Reproduction Pathology Veterinary Clinic.

Mobile Home Site Development April 14-15 **Building Officials Conference** April 15-16

Workshop in Advanced Salesmanship April 15-17 April 16 Undergraduate Education in Social Work April 16-17 Home Economics Alumni Reunion

April 16-17 Midwest Comparative International Education Society

Students and faculty members are welcome to attend these continuing education programs. Those who are interested should make arrangements in advance with the Office of University Conferences, 5-4590.
