

Deliveries with showmanship

Carl Vieth makes his deliveries from the Universities Stores with showmanship. Vieth, of Stores - Receiving, is also Carl Karl, the only magician listed in Lansing's Yellow Pages.

Many an MSU secretary has watched things disappear in Vieth's hands. And many a secretary has asked him, "How do you do it?" His reply: "Very well."

Vieth is a self-taught magician, dating back to teenage days when he visited a small southern Michigan town billed as the magic capital of the world.

Since then he has appeared in cafeterias, classrooms, meeting halls, on stages and on television throughout the area, with tricks from sleight of hand to levitation.

He lists four codes of a magician:

*Never tell how a trick is done; 90 percent of the time it's so simple it would insult the viewer's intelligence, it would no longer be spectacular.

*Practice ad infinitum.

*Never do the same trick in the same way for the same audience.

*Anyone could perform magic; the idea is to entertain; most magicians are actors.

Why does one get into the magic business? Vieth says it's like anything else, from sports to ham radio operation. He himself enjoys it. But it's more than a hobby: he calls himself a semi-professional.

Magic serves as an ice breaker, Vieth says. He doesn't need specific tricks, he can pick up any object — a pen and paper, for example — and perform before the unbelieving eyes.

Magic is, he says, psychological, mathematical or mechanical... but still magic.

MICHIGAN STATE UNIVERSITY

Even with new fee increase, it will be another fiscal year of budget squeezing

Even with estimated revenue from the announced increase in 1972-73 student fees, the University faces a serious financial strain for the third time in as many years.

The Board of Trustees last Friday (May 19) approved a \$1 - per - credit - hour increase for all students, the first fee hike here in two years.

Roger E. Wilkinson, vice president for business and finance, said that the fee increase is necessary because funds available for next year would not have been adequate to meet expenses, even with cuts in present budget allocations.

Wilkinson said that the administration reviewed estimated revenues from state appropriations, student fees and other sources, and examined projected expenditures, taking into account the rising fixed cost expenditures.

If next year's revenues meet current estimates — and they include about \$1.5 million more expected from the new fee schedule — those revenues may still fall from \$500,000 to \$1 million short of projected expenditures. This means that

reductions from current year allocations will be needed, Wilkinson said, and the cuts will come largely from the two areas that have been reduced in each of the past two years: Academic and nonacademic operating expenses, and major alterations and improvements.

He noted that the University is thus faced with moving into another fiscal year in which major physical plant maintenance projects will have to be deferred.

And he added that consideration of 1972-73 wage adjustments — as yet

undetermined — will have to take into account the existing Federal wage guidelines.

Under the revised student fees, resident undergraduates will pay \$15 instead of \$14 per credit hour, and resident graduate students will pay \$16 instead of \$15. Nonresident undergraduates will pay \$34 instead of \$33 per credit hour, and nonresident graduate students \$35 instead of \$34. Off-campus courses will increase by \$1 to \$23 per credit.

The Board voted 6-2 to approve the new fees, with Claire White and Warren Huff opposing.

White said he objected to the increase as "a convenient way to balance insufficient legislative appropriations by taxing the students."

But Don Stevens pointed out that with student aid grants now available here, more than 8,000 Michigan residents last year received the maximum award (half tuition), thus placing their fees at a level lower than that of 10 years ago.

Board okays urban proposal, University adds its 17th college

The University will soon have its 17th college — the College of Urban and Metropolitan Development. The Board of Trustees voted 6 - 2 Friday (May 19) to approve President Wharton's proposal for establishing the College.

Trustees Patricia Carrigan, Frank Hartman, Blanche Martin, Don Stevens, Kenneth Thompson and Clair White supported the proposal.

Martin, in endorsing the college, said that it "is long overdue."

Stevens spoke in support of the urban college and read a letter signed by 14 senior faculty members giving their support to the college.

The proposals approved by the Board, together with a story outlining President Wharton's rationale for the college concept, are on page 6 of today's paper.

Although the proposal passed by a wide vote, most of the discussion came from trustee Warren M. Huff, who, with

Frank Merriman, opposed the motion.

Huff said that although he advocates University involvement in urban affairs, he opposed the recommendations "because I think the proposal is too narrow to meet the real challenge of urban affairs, and I think we need a definition of 'urban problems'."

Merriman said he voted against the proposal because he did not favor one college. "I favor the educational policies committee's (EPC) office model. Either model can accomplish the mission, and I think it could be better handled by an Office of Urban Affairs. A cross-section of the University is needed."

Wharton's proposal grew out of recommendations made by the EPC. The EPC suggested both an office and college model for urban affairs. The committee stated that it "expresses no preference for one over the other." (News - Bulletin, May 4).

Huff and Merriman also said that the

president's proposal was the result of political and other pressures. But Wharton said later that in the past two months he had not discussed the matter with any state legislator.

Huff also said that "some see the urban college as a device for giving degrees to students not academically qualified otherwise." And he added that the proposed college lacked structure and curriculum requirements.

Wharton acknowledged that there were some deficiencies due to time constraints but these problems could be handled through the committees established in his proposal. And he emphasized that he had met the deadline by having his recommendation to the board last week.

Approval of the proposal included naming Robert L. Green, director of the Center for Urban Affairs (CUA), as acting dean of the college.

(Continued on page 6)

Award winners are honored

Seventeen faculty members and six graduate assistants received awards for their teaching, research and scholarship Tuesday at the annual Awards Convocation.

Eleven received the \$1,000 Distinguished Faculty Awards, six on the \$1,000 Teacher Scholar Awards, and six received \$500 Excellence in Teaching Citations. Photos of the winners are on pages 4 and 5.

Letters

Stevens lauds Wharton's handling of demonstrations

To the editor:

The past two weeks have been trying for the University. An institution of higher education is particularly vulnerable to disruption in times of emotional crisis. Now that greater calm has returned, the predictable Monday morning quarterback is with us. In such cases, the air is always filled with "what ifs."

"What if the 400 who first sat down on Grand River had been left alone as the mayor and president had decided?" "What if the State Police had not been called in?" "What if the order had not been given to use tear gas?" "What if the president had tried to soothe the anger of 4,000 persons?" "What if the Tuesday evening negotiations had granted all the demonstrators' demands?" "What if the demonstrators had been permitted to retain control of the Administration Building?"

Speculation may be good dinner table

conversation, but it is no way to run a University or a city. And few would now contend that alternative responses to any of these matters would have moved the United States one inch closer to disengagement from the Vietnam War.

During President Wharton's administration, the University has successfully weathered three separate instances of major unrest. Among the major lessons which emerged from his wise handling of the situation was the need for a cool head. Negotiating with a howling crowd is not like running for grandstand plays. One is dealing with a high level of emotion in which each step must be carefully and objectively assessed. The decisions which a president or leader makes have to be lived with for a long time. The unwise or impractical concessions given in the heat of the moment may often come back to haunt not only the institution itself but those

same individuals who demanded them in the heat of the moment.

Leadership is not just being seen in front of the TV cameras doing "one's thing," but being certain of one's facts before one acts. What is the real mood of the crowd? What is their intent? Who are their real leaders? Are they real leaders or are they self-proclaimed? Do they exercise any real control or leadership? Can they deliver on their commitments? And most important, is there any real possibility that the means they advocate will contribute to the objectives they seek?

These are never easy questions to answer and rushing pell-mell into the fray may be good press but often bad leadership. Visibility is sometimes important; sound judgment based upon maximum information is always important.

As one friend recently observed, playing to the crowd may be good for a fast sprint, but impractical and counterproductive if you are in a long-distance run!

During the tense moments of May 1970, when virtually everyone was urging President Wharton to call up the National Guard, his judgment was to the contrary, and he was right. The multiple information provided him from various sources gave him the confidence that such a decision was premature. Had he been seeking visibility around that marching crowd of 5,000, would he have had the correct perspective and objectivity? I don't believe so.

Similarly in the present case, strong pressures were reported urging President Wharton to ask the governor to declare a

state of emergency. Again, he declined. But for those who like to speculate, let them consider the question: "What would have been the reaction of the tens of thousands of students who were not demonstrating to an enforced curfew with State Police continually on the campus?"

The initial judgment which Mayor Brookover made early Tuesday evening not to move on the demonstrators was correct, and President Wharton concurred. He visited the crowd and concluded that it would not run rampant. Mrs. Wharton visited the crowd and gave the same report, as did other sources.

One final point. Each decision which a president makes must be taken from the standpoint of the well-being of every man, woman, and child on this 5,000 acre campus. Not merely that of the demonstrators but the nondemonstrators as well. He must make any decisions on the basis of their total welfare and physical well-being. Those decisions must be based on cool judgment and carried out with firmness and understanding. I believe that they were.

Effective leadership requires much more than visibility; the true leaders must make the hard decisions which will not always be popular with everyone but which display a full understanding of the issues. Most important, he must have the good judgment and courage to transcend short-term difficulties and maintain a positive course toward a long-run goal.

I for one commend the president on his commitment to maintain the integrity of the institution and his wise handling of the situation.

Trustee

Women's committee tries 'to change the rules'

"Women are not altogether wrong when they refuse the rules of life prescribed in the world, forasmuch as only men have established them without their consent."

—Montaigne, "Essays"

Women at Michigan State are working very hard to change the rules.

Meeting every night and on weekends, members of the Women's Steering Committee have been grappling with some of the toughest problems facing university administrators today.

Three months ago the 16 women were appointed to the committee by President Wharton and charged with designing and recommending a permanent structure to advise on the status of women at MSU.

Next week at a special press conference the Women's Steering Committee will present its recommendations. Much to their credit, the report will go far beyond the structural recommendations.

Committee members also accepted the president's charge to identify emerging issues to serve as women's advocate and to proposed future action. They zeroed in on student concerns, and such as age of majority, financial aids and equality in admissions.

The 12-page subcommittee report also examines academic advising, counseling, placement, housing options, health care and women's studies at the University.

The report of the Subcommittee on Employment Policies and Practices

outlines recommendations in the hiring policies, practices and appointments; recruitment; and promotions, advancements and job security.

It also discusses professional growth and continuing education; pay policies; employment benefits; and grievance procedures as they relate to women here.

The minority status subcommittee is examining all these issues as they relate to minorities, and it will be releasing its report this week.

In their efforts to fully research the problems as well as approaches, members of the Women's Steering Committee met with representatives from five other state universities.

They have also met the women's advocate role by participating in deliberations over the equal rights amendment, actively supporting lunch programs in area schools, and presenting their concerns to the Alumni Association.

—BARBARA MC INTOSH

Achievements

ARMAND L. HUNTER, director of the Continuing Education Service, became president of the National University Extension Association at the group's recent meeting in Columbia, S.C. The group includes some 190 member institutions.

BOB WINBORN, professor of counseling, personnel services and educational psychology, has been elected to a two-year term as vice president of the Counseling Human Development Division of the American Educational Research Association.

LAUREN G. WOODBY, professor of mathematics, organized the program for the annual meeting of the National Council of Teachers of Mathematics in Chicago. He is also coordinating U. S. presentations for the second International Congress on Mathematical Education in London.

History in sound

From farmboy to auto giant

By G. ROBERT VINCENT
Curator, National Voice Library

(Actual recordings that detail this and other events are available in the National Voice Library on the fourth floor of the MSU Library. An appointment can be made by calling 355-5122.)

Henry Ford, the Michigan farm boy who loved to tinker with mechanical devices, a self-made engineer with an uncanny nose for market trends, was a leading name in America's social and industrial history. Model T's and later Model A's swarmed the land, making Ford a billionaire.

In 1938, Ford invited me to come from New York, as his guest, to visit the Edison Institute in Dearborn. The citizens of Detroit were holding a huge outdoor celebration in honor of

Henry Ford's 75th birthday.

At the ceremony, with hundreds of children singing "Happy Birthday," his wife, Mrs. Clara Ford, was asked what she thought of the occasion. It was her first appearance before a microphone:

"I think it's a thrilling sight . . . perfectly beautiful! . . . I'm so happy to think that the people of Detroit and surroundings appreciate what Mr. Ford has tried to do for them . . . He worked so hard and tried so hard to do what he can for people . . . And I'm so happy to think that they appreciate it . . ."

At the dedication of Ford Field in Dearborn, the automotive titan himself spoke to his fellow townfolk:

"Friends and neighbors. Thanks for your greeting tonight. It's good to see so large a gathering in such a happy mood. This is probably because we Dearbornites know how to play as well as work. This field is really the village green of our town and for many years it has been the place of outdoor recreation for both old and young . . . Mrs. Ford and I take great pleasure in presenting it to Dearborn. Thank you all and good night . . ."

When Henry Ford died on April 7, 1947, one of every seven persons in the U.S. was employed in the motor car or allied industries — thanks to a Michigan farm boy who had a dream and followed it through.

Around the campus: A weekly review

Citizen awards presented

Osborn Elliott, chairman of the board and chief executive officer of Newsweek, Inc. will deliver the spring term commencement address at 4 p.m., June 11, in Spartan Stadium.

Undergraduate degrees will be awarded at the afternoon ceremony, and graduate degrees will be given at 10 a.m. in the Auditorium.

Honorary degrees will be awarded to Russell G. Mawby, president of the W.K. Kellogg Foundation of Battle Creek; Henry L. Caulkins, president of Waterways Navigation Co. of Detroit; and Percy L. Julian, director of the Julian Research Institute of Chicago.

Elliott, a Harvard alumnus, held editorial positions on Time Magazine and the New York Journal of Commerce before joining Newsweek as senior editor in charge of business news in 1955. He was named managing editor of the magazine in 1959, editor in 1961 and editor-in-chief in 1969. He was promoted to his present position in March.

Under Elliott's nine-year leadership as editor, Newsweek's circulation increased more than 75 percent and the magazine became the third largest in the nation in advertising pages. It is now second.

Elliott is the author of the book "Men at the Top" (1959) and served as editor of "The Negro Revolution" (1964).

Grant to help veterans

Veterans who are MSU students will be used to assist other veterans under a program to be launched with a \$15,000 federal grant.

Eldon R. Nonnamaker, vice president for student affairs, said the University had applied for the funds through Ingham County under the Emergency Employment Act.

Under the contract, four students who are veterans of military service will be hired for 20 hours a week as "veterans assistants" to bolster the on-going MSU Veterans Affairs Program.

Nonnamaker said the assistants would conduct "out-reach" programs to contact veterans returning to the area, counsel them on educational benefits to which they are entitled and enrollment requirements at MSU and other schools, and work with enrolled veterans on their benefit rights or readjustment problems.

They also will coordinate with the Lansing Area Veterans Task Force on general problems affecting veterans.

"More than 40,000 discharged veterans are returning to Michigan each year," Nonnamaker noted. "MSU presently has more than 2,500 enrolled, and we expect this number to increase rapidly."

"Many returning veterans, however, are not fully aware of their educational benefits under the GI Bill or how to go about taking advantage of them. Still others, once they are on campus, have problems with which they need help."

The program, under the direction of Veterans Coordinator Don Svoren is expected to last at least through March, 1973.

Under the Emergency Employment Act, funds are made available to provide public service jobs at the state and local level. Those to be hired under the MSU program, in addition to being veterans and enrolled at the University, must have been unemployed at least one week and live in East Lansing.

Selection committee to report

Recommendations from the ad hoc committee studying the procedure for selecting the chief academic officers of the University will occupy part of the Academic Council's agenda for its meeting at 3:15 p.m. next Thursday (June 1) in the Con Con Room.

The Council was originally scheduled to meet May 30.

The Council is also expected to hear a report by student member Alan Will, and Robert Perrin, vice president for University relations, on the mechanisms available for campus-wide polls.

Will sought the Faculty Steering Committee's approval for placement on the agenda to see if a community poll could be taken on the war issue.

"Since the University can't take an institutional stand, this would be a way to find out and make public the current feelings of the issue from the University community," he said.

Will added that the mechanisms for polling would probably not be operational this term.

In other action, the steering committee referred a motion on censure policy, approved by the Academic Senate on May 17, to the academic governance committee for review.

Council to examine censure role

The Academic Council has been asked to determine its authority to censure members of the faculty.

The request came at the spring meeting of the Academic Senate on May 17 when a motion was approved asking that the determination be made and, if the Council does have the authority, that a censure policy be developed no later than the end of the fall term, 1972.

The meeting was attended by 107 faculty members.

The motion came from Bob Repas, professor of labor and industrial relations.

Repas and Clair White, of the Board of Trustees, were censured by the Council in November for their actions in releasing and publicizing faculty salary lists with names. (News-Bulletin, Dec. 2, 1971).

In other action, the Senate passed proposed changes in the Bylaws for Academic Governance.

The proposed amendments call for including instructors within the tenure track in University-wide matters and admitting them to membership in the Senate; allowing

noncollege faculty to participate in academic governance; shifting the academic governance process to coincide with the academic calendar; allowing mid-year student vacancies on Council standing committees to be filled by the original appointing body; and rewording the section on student representatives at-large membership on the Council.

The Senate accepted the Athletic Council's annual report. The report listed the Athletic Council's activities concerning eligibility requirements for University athletes; use and development of athletic-intramural facilities; a study of the role of the Athletic Council; an examination of the financial crises facing intercollegiate athletics; and encouraging the development of intercollegiate programs for women.

Additionally, the Senate approved three nominees to the Athletic Council for terms from this July 1 to June 30, 1974.

The Nominees are: Ann Harrison, associate professor of romance languages; Leo V. Nothstine, professor of civil and sanitary engineering; and Louis F. Twardzik, professor and chairman of park and recreation resources.

Grievance officer search launched

The search for a Faculty Grievance office (FGO) began this week with the appointment Tuesday of the FGO search and selection committee by the faculty affairs and faculty compensation committee (FAFCC).

The search committee will be chaired by E. Fred Carlisle, associate professor of English, and includes Lawrence L. Boger, dean of the College of Agriculture and Natural Resources; Evelyn Sanders, associate professor of microbiology and public health; and John H. Wakeley, associate professor of psychology. They served on a committee which established criteria for the FGO.

Letters are being sent this week to the faculty and administrative officers soliciting nominations for the position. The letters contain a list of responsibilities and desirable qualifications necessary for the FGO.

The responsibilities, as outlined in the interim faculty grievance procedure, include formal and informal resolution of grievances and administrative and evaluation duties.

The nominations must be made to the search and selection committee no later than June 9. The committee has until Aug. 17 to select the FGO, who then must be approved by President Wharton and the Board of Trustees.

Faculty Folk provides scholarships

Thanks to the fund-raising efforts of the Faculty Folk Club, a total of \$1,500 in scholarships will be awarded six women for their next year's study at MSU.

Funds were derived through a series of 15 luncheon benefits staged by the Faculty Folk and its Newcomers Club under the direction of Mrs. William T. Magee, chairman, Mrs. James Tiedje and Mrs. Stuart McDougal.

Recipients of the scholarships are: Laurene A. Hungle, a Canadian student who is beginning work on a M.A. in art; Theresa Conti, retailing major from Mount Clemens; Donna Lahre, communication arts major from Eaton Rapids; Frances Sokolowski, German major from Ironwood; Barbara Wagner, choral music major from St. Joseph, and Mary Wood, psychology major from Dearborn.

They were honored at a recent luncheon at the University Club.

In addition to the scholarship money, \$300 was added to Faculty Folk's loan fund, established for women students and administered by MSU. Another contribution of \$100 was made to the MSU Community Committee for International Programs for use by wives of foreign students.

Responsible for the organizational efforts behind the scholarship program are Mrs. Leo Erickson and Mrs. Herry D. Berg, and Faculty Folk president Mrs. W. W. Armistead.

The Faculty Folk Club, which next year marks its 50th anniversary, has a membership roster of more than 600 women who are associated with MSU, through their own professions or those of their husbands.

Lazer cited for marketing work

William Lazer, professor of marketing and transportation administration, was honored this week as "Outstanding Marketing Educator of the Year" for his international contributions to the development of the marketing profession.

Lazer received the award at the annual meeting of Sales and Marketing Executives International in San Juan, Puerto Rico. The worldwide organization has more than 25,000 members.

He is the second MSU faculty member to win the award since its initiation in 1961. Thomas A. Staudt, then chairman of the Department of Marketing and Transportation Administration and now marketing director for the Chevrolet Division of General Motors, was honored in 1965.

Lazer is vice-president of the American Marketing association, and will assume the position of president-elect this summer. He has lectured at numerous universities here and abroad, and has been a frequent consultant to government agencies and private industries.

Russian group visiting campus

Thirteen Russian Komsomol deputies are visiting the campus this week.

Traveling under the auspices of the Council for International Educational Exchange, the Russians will examine MSU's extension programs, meet with students and visit local institutions.

The Komsomol is a youth-oriented organization. The eight men and five women are staying at Snyder and Phillips Halls. They will depart Saturday morning.

Their activities are being coordinated by the Russian and East European Studies Program.

Faculty grievance procedures are adopted

The much - deliberated interim faculty grievance procedures received quick approval from the Board of Trustees last week (May 19) and will become effective within the next 90 days.

The Board's action came on a unanimous vote. The trustees first received the grievances document in April but sent it back to the Elected Faculty Council because of concern over a section that would have excluded from the procedures such matters as extension of reappointment, dismissal, termination or nonreappointment of faculty in the

tenure track (News - Bulletin, April 27). The procedures originated with the Ad Hoc Committee to Study Faculty Rights, Responsibilities and Grievance Procedures.

Approval of the grievance procedures came during an extraordinary Board session in the Kellogg Center Auditorium, where an audience made up largely of students looked on. The trustees conducted two sessions in the same auditorium Thursday afternoon and evening - one to consider the

demands of several students and faculty urging an institutional stand against the war in Vietnam, and the other to discuss the proposal for a College of Urban Development.

As approved by the Board, the grievance procedures "shall not preempt or replace the functions of the Anti-Discrimination Policy and Procedures or of the University Tenure Committee except to provide procedures for the appeal of administrative decisions not to reappoint nontenured faculty in the tenure stream"

The procedures are effective for one year or until they are incorporated in the faculty rights and responsibilities document, whichever is sooner.

Only two concerns were raised this time by Board members:

Trustee Patricia Carrigan asked that faculty reconsider the requirement that the three tenured members of the five-member appeal panels (in cases of nonreappointment of nontenured faculty) will come from the University Tenure Committee. She said such a system makes for a possible adversary relationship between tenured and nontenured faculty.

And Trustee Warren Huff expressed concern that Board members have the option to initiate amendments to the grievance procedures. The document now states that any faculty member may propose an amendment to the procedures and that such proposals will go first to the faculty affairs and faculty compensation committee (FAFCC).

A major provision of the document is creation of the position of faculty grievance official to operate independently of the "existing administrative structures of the University" and who shall "receive and make every effort to resolve grievances."

The Board also approved a resolution extending the appointment of "any person whose appeal of nonreappointment is formally underway within the University governance (beyond the department level but not beyond the University level)." The extension, which now applies to Eileen Van Tassell, is for one year beyond termination date.

Miss Van Tassell, assistant professor of natural science, is scheduled for a hearing before the University College Faculty Affairs Committee next week.

NEW V.P., A.D.

Eldon R. Nonnamaker, dean of students since 1970, was named vice president for student affairs, and J. Burt Smith, assistant athletic director since 1965, was elevated to director of athletics.

The Board also okayed the naming of Nolen M. Ellison as dean of students and assistant vice president for student

affairs, but he later announced that he had decided to accept the presidency of Seattle (Wash.) Central Community College.

Nonnamaker joined the faculty in 1957 as assistant director in the dean of students office. He became associate dean in 1963 and then dean. Nonnamaker, a professor of education, takes the post vacated last June by Milton D. Dickerson.

Smith, a member of the athletic department since 1954, succeeds Clarence "Biggie" Munn, who is on health leave after suffering a stroke last Oct. 7. Smith served as an assistant football coach before becoming an administrative assistant to Coach Duffy Daughterty in 1961 and then assistant athletic director four years later.

FACT-FINDING GROUP

After hearing Thursday from a group of student antiwar demonstrators - and from one student opposing the demonstrations - the trustees Friday morning approved the University's participation in a proposed "fact-finding committee on University and East Lansing policies." Trustees Kenneth Thompson and Frank Merriman voted against the action.

The committee - 11 members chosen by MSU and 11 by East Lansing - will study several policy areas: Both, the University's and the city's status and obligations as public bodies; MSU policies on sponsored research; University overseas programs goal and conduct; MSU and city policies on purchases from contractors; the status of ROTC on the campus; University and city investment policies; policies governing Placement Bureau operation.

OTHER ACTION

The Board also:

* Approved a number of personnel items, including the appointments of William C. Taylor (now with the Interagency Transportation Council for the State of Michigan) as chairman of civil and sanitary engineering, and William J. DeSua (chairman of comparative literature at the University of North Carolina) as chairman of romance languages. Also approved - but with "no" votes from Thompson and Merriman - was the appointment of Attorney Zolton Ferency, former Democratic gubernatorial candidate, as an associate professor of criminal justice. Thompson described Ferency as a "politically controversial figure," and both he and Merriman questioned whether Ferency would be a candidate for "state-wide office" this fall.

* Approved formation of a committee of trustees, administrators and students to review a proposal for student advisers to the Board.

A new college . . .

(Concluded from page 1)

Huff emphasized that his objection to the proposal was not an opposition to Green as acting dean.

Green had given his full support to the proposal at one informal session of the Board Thursday night.

Green stressed he hoped that the new college wouldn't place a financial strain on CUA, and that "a financial ceiling isn't placed on the new college."

Lester Manderscheid, professor of agricultural economics and EPC chairman, also endorsed the president's proposal at the informal session.

"The EPC is pleased that the president's proposal is consistent with EPC's proposal, but the committee is concerned with a delay in the establishing the Center for Research, he said. "This is a very important mechanism for achieving research and attracting funds."

Wharton called for a delay in establishing a Center for Research and an Urban Extension Service because additional funding is needed in these areas.

Manderscheid said he thought it was premature to appoint an acting dean and that such action would prejudice the search and selection committee in its choice of a permanent dean.

Trustee Carrigan said the director of CUA was the most logical individual to step into the position of acting dean and "we need to be able to call on that individual's expertise. I would hate to have to turn elsewhere."

In a news conference following the Friday Board meeting, Wharton said that although organization of the college will be handled with great speed, he was certain that the college wouldn't be in operation by fall, 1972.

-SANDRA DALKA

Urban development proposal

Following is the proposal for a College of Urban Development presented to the Board by President Wharton.

1. That establishment of the College of Urban Development be approved based upon the broad outlines prepared by the educational policies committee.

a. That steps be taken to organize two new departments - the Department of Urban and Metropolitan Development and the Department of Race and Ethnic Studies (jointly administered with the College of Social Science) and that plans for these two departments be part of the charge to the group chaired by the provost (see recommendation No. 2).

b. That the separate organizations of a Center for Research and an Urban Extension Service be delayed. As indicated, additional funds are necessary if any separate research entity is to prove viable. For the urban extension service, the cooperation with other universities, and internal evaluation and coordination of activities plus the recommendations of the Lifelong Education Task Force are needed.

c. That the president be authorized to continue his discussions with other Michigan universities on the possibility of coordinated or joint off-campus activities in this area and to explore with appropriate university officers and government officials the implications of these developments as they relate to the Cooperative Extension Service and the Continuing Education Service.

2. That the provost chair a committee composed of the dean of social science, the dean of human ecology, the dean of James Madison College, the director of continuing education, the director of the Center for Urban Affairs, the assistant provost for academic planning, the chairman of the educational policies committee, and the chairman of the University Curriculum Committee to prepare recommendations on the structural questions related to the new college for submission to the president and the Board of Trustees.

3. That the University Curriculum Committee be charged with the initial task of reviewing the already existing course offerings related to urban and metropolitan affairs to prepare recommendations for the college on possible inclusions. Subsequently, the departmental and college curriculum committee would develop course offerings by the college or with other academic units for review by the University Curriculum Committee before submitting them to the Academic Council for approval.

4. That a search and selection committee for the dean of the college be established as specified above to submit three to five names to the provost for consideration and recommendation to the president and the Board of Trustees. The following choices represent those units which are currently involved most heavily in urban activities. I recommend that a (15 - member) search and advisory committee be chosen as follows:

Elected Faculty: Center for Urban Affairs, 6 persons; and one person each from the College of Social Science, College of Human Ecology, College of Education and James Madison College (a total of 10).

Elected students: One graduate student, two undergraduates (one of whom must be at-large) elected by student members of the Academic Council.

Appointed by Provost: Two faculty.

5. That, upon completion of recommendations 1a, 2, 3 and 4, a dean be appointed; and that in the interim, the director of the Center for Urban Affairs serve as acting dean of the college, and that the center continue to function with its existing officers, staff and programs.

College model advantages cited

President Wharton listed several reasons for choice of a college model rather than an office model in meeting MSU's commitment to solving urban affairs.

"The college model is clearly more effective than the office model if the University intends to make a serious rather than token effort in the area of urban - metropolitan problems," Wharton said.

He cited these advantages:

*The college model permits a small cohesive group to maintain focus, emphasis, priority, evaluation, and continuous review to the programs in instruction, research and service.

*The college model gives an academically recognizable contact point for approaching sources of support.

*The college model insures that the interests and insights of the urban thrust will be represented on the various academic governing bodies, major advisory committees and in the Administrative Group.

*The true line structure has its own budget, and must be responsible and accountable in terms of productivity for resources assigned to it.

*A problem - focused academic program is strengthened and enhanced in a college model by providing better control of the faculty reward structure and greater degrees of freedom for innovation.

EXHIBITIONS

Kresge Art Center

Works by the Master of Fine Arts candidates at the conclusion of two years of graduate study. Included will be ceramics, print-making, painting, graphic design and sculpture.

Works from the permanent collection.

Beal Gardens

Instant color is provided by blooming-size annuals newly interplanted in the tulip beds around the Women's Intramural building.

Hidden Lake Gardens

Tipton, Michigan

Five miles of marked hiking trails and more than six miles of paved drive provide access to both native and introduced plants. Open daily 8 a.m. until sundown.

Campus Plantings

Outstanding specimens of white (Beal Gardens) and pink (Giltner Hall) redbuds are in full bloom.

CONFERENCES

May 25-26 Symposium on Curriculum Development in Comprehensive Health Care

June 1 Legal Problems in an Urban Environment

All conferences will be held in Kellogg Center unless otherwise noted. Students and faculty members are welcome to attend these continuing education programs. Those who are interested should make arrangements in advance with the Office of University Conferences.

SEMINARS

THURSDAY, MAY 25, 1972

Kansas test track—a problem in soil-structure interaction. **Francis G. McLean**, Westenhoff and Novick, Wheaton, Illinois, 2 p.m., 284 Engineering (Civil Engineering).

The nature of taste receptor sites. **Lloyd Beidler**, Florida State U., Tallahassee, 4:10 p.m., 101 Biochemistry (Biochemistry).

A theory of intellect. **Richard J. Reid**, 8 p.m., 402 Computer Center (Computer Science).

Achievement, costs and the demand for public education: An analysis of the Michigan assessment survey data. **Byron W. Brown**, 3 p.m., 301 Agriculture (Economics).

Comments on wildlife extension. **Glen Dudderar**, Virginia Polytechnical U., Blacksburg, 1:30 p.m., 221 Natural Resources (Fisheries & Wildlife).

Avian tumor viruses: mutant studies. **John Wyke**, U. of Southern California, 4:10 p.m., 146 Giltner (Microbiology & Public Health).

Electrophysiological studies on organization of medullary vasomotor area. **David Taylor**, 4 p.m., B-449 Life Science 1 (Pharmacology).

Light scattering in liquids. **Noel Clark**, Harvard U., 4:10 p.m., 223 Physics-Astronomy (Physics).

Applications of nuclear physics. **B.L. Cohen**, U. of Pittsburgh, 8 p.m., Cyclotron Seminar Room (Physics).

FRIDAY, MAY 26, 1972

Frozen artificial islands for use as a fixed drilling base. **Waleed Jazrawi** and **K. R. Croasdale**, Imperial Oil Ltd., Calgary, Canada, 2 p.m., 312 Engineering (Civil Engineering).

Implementation of curriculum change relevant to the Chicano social worker. **Ted DeLeon**, **Ed Rocha**, **Mario Rodriguez**, 2 p.m., 208 Bessey (MSU Chapter of Los Trabajadores de la Raza).

TUESDAY, MAY 30, 1972

Unemployment as a world problem—its emerging forms and scale in different economies (Illustrations from Britain, Colombia, Ceylon, Kenya). **Dudley Seers**, Institute of Development Studies, U. of Sussex, 3 p.m., 301 Agriculture (Agricultural Economics).

A simple theory of the shapes of small molecules. **Robert G. Parr**, Johns Hopkins U., 4 p.m., 136 Chemistry (Chemistry).

Medium chain triglycerides. **Joanne Fino**, 12:30 p.m., 102 Human Ecology (Food Science and Human Nutrition).

Results of research conducted on the protein mixture extracted from fresh alfalfa (*Medicago sativa*). **Larry Hood**, 4:10 p.m., 110 Anthony (Food Science & Human Nutrition).

Heterogenic incompatibility in *Sordaria*. **William Fields**, 4:10 p.m., 168 Plant Biology Lab (Genetics).

Selenium toxicosis in swine. **R. R. Herigstad**, 4:10 p.m., 346 Giltner (Pathology).

Endometrial reaction to the intrauterine infusion of a two percent iodine solution. **Brad Sequin**, 8 a.m., A6 Vet Clinic (Veterinary Medicine).

WEDNESDAY, MAY 31, 1972

Unemployment as a world problem—the context: growing international and intranational inequalities. **Dudley Seers**, Institute of Development Studies, U. of Sussex, 3 p.m., 301 Agriculture (Agricultural Economics).

Adaptive enzyme responses in tissues of obese mice. **Murray Kaplan**, 4:10 p.m., 131 Anthony (Institute of Nutrition).

THURSDAY, JUNE 1, 1972

Unemployment as a world problem—the damage of inappropriate technologies in various sectors; channels of transfer (Private investment, aid, education, etc.). **Dudley Seers**, Institute of Development Studies, U. of Sussex, 3 p.m., 301 Agriculture (Agricultural Economics).

Pasteurization vs. sterilization. **Peter Little**, 4:10 p.m., 110 Anthony (Food Science & Human Nutrition).

Some physico-chemical aspects of unsalted and salted cheese. **Mani K. Thakur**, 4:10 p.m., 110 Anthony (Food Science and Human Nutrition).

Relationship between algebra and topology. **Richard O. Hill**, 4:10 p.m., 304A Wells (Mathematics).

Differential effects of chlorpromazine and its free radical on membrane phenomena. **Cheng-Yi Lee**, 4 p.m., 449B Life Sciences (Pharmacology).

Pre-equilibrium model of nuclear reactions. **M. Blann**, U. of Rochester, 8 p.m., Cyclotron Seminar Rm. (Physics).

FRIDAY, JUNE 2, 1972

Unemployment as a world problem—implications for transforming policies and theories in the development field. **Dudley Seers**, Institute of Development Studies, U. of Sussex, 3 p.m., 301 Agriculture (Agricultural Economics).

On the molecular characterization of the sodium-potassium adenosinetriphosphatase. **Lowell Hokin**, U. of Wisconsin, 4:10 p.m., 101 Biochemistry (Biochemistry).

An analysis of cellular adhesion and surface membranes in a small amoeba. **Richard L. Hoover**, 3 p.m., 204 Natural Science (Zoology).

Calendar of Events

Friday, May 26, 1972

- 8 p.m. "The Last Question"—This science fiction spectacular in the sky theatre explores the theory of entropy, which maintains that all the life-giving energy of the stars is being drained. Tickets are available at the door. Abrams Planetarium.
- 8:15 p.m. Performing Arts Company—PAC's final production of the year, "Man of La Mancha," features the few hours in the life of Miguel de Cervantes before his trial by the Inquisition. The winner of the 1966 New York Drama Critics Award, "Man of La Mancha" is best represented by its song "The Impossible Dream." Tickets are available in the Fairchild ticket office from noon to 5 p.m.
- 10 p.m. "The Last Question" (see above). Abrams Planetarium.

Saturday, May 27, 1972

- 2:30 p.m. "The Last Question" (see May 26). Abrams Planetarium.
- 8 p.m. "The Last Question" (see May 26). Abrams Planetarium.
- 8:15 p.m. "Man of La Mancha" (see May 26). Fairchild Theatre.
- 10 p.m. "The Last Question" (see May 26). Abrams Planetarium.

Sunday, May 28, 1972

- 4 p.m. "The Last Question" (see May 26). Abrams Planetarium.
- 8:15 p.m. "Man of La Mancha" (see May 26). Fairchild Theatre.

Monday, May 29, 1972

- 8:15 p.m. "Man of La Mancha" (see May 26). Fairchild Theatre.

Tuesday, May 30, 1972

- 12 p.m. University Club luncheon—Chuck Mefford of WITL will speak on "How Do You Plead?"
- 8 p.m. International folkdancing—Instruction will be followed by dancing at 9 p.m. St. John Student Parish, 327 M.A.C.
- 8:15 p.m. "Man of La Mancha" (see May 26). Fairchild Theatre.

Wednesday, May 31, 1972

- 6:30 p.m. Governor's Concert Series—The MSU Concert Band will perform the concert originally scheduled for May 17, postponed because of a peace march at the capitol.
- 7:30 p.m. Village Plays of India—An experimental production, the village plays of India, presented outdoors by the MSU Department of Theatre, will include authentic costuming, lighting, and rituals. Participants will sit on the ground and will sample foodstuffs before the performance. It is believed that this is the first time Indian village plays have been staged in the western world. Between the Red Cedar River and the International Center.
- 8:15 p.m. Concert—The MSU Symphony Orchestra will present the U.S. premiere of "Six Studies by Francis Bacon" by Gerard Shurmann. Also on the program is Mahler's "Symphony No. 1 (The Titan)." There is no charge for admission. Fairchild Theatre.

Thursday, June 1, 1972

- 7:30 p.m. Village Plays of India (see May 31). Between the Red Cedar River and International Center.
- 8:15 p.m. Symphony concert (see May 31). Fairchild Theatre.

Friday, June 2, 1972

- 7:30 p.m. Village Plays of India (see May 31). Between the Red Cedar River and International Center.
- 8 p.m. "The Last Question" (see May 26). Abrams Planetarium.
- 8:15 p.m. Graduate recital—Truby Clayton, tenor, will perform. Music Auditorium.
- 10 p.m. "The Last Question" (see May 26). Abrams Planetarium.

Saturday, June 3, 1972

- 2:30 p.m. "The Last Question" (see May 26). Abrams Planetarium.
- 7:30 p.m. Village Plays of India (see May 31). Between the Red Cedar River and International Center.
- 8 p.m. "The Last Question" (see May 26). Abrams Planetarium.
- 10 p.m. "The Last Question" (see May 26). Abrams Planetarium.

BULLETINS

IM BLDG. HOURS

The Men's Intramural Building and the outdoor pool will be open from 1 p.m. to 5 p.m., Monday, May 29.

OPENING EXHIBIT

There will be an opening in the Kresge Art Center Gallery, 7:30 to 10 p.m., Friday, May 26, for the exhibition of works by Master of Fine Arts candidates. Refreshments will be served.

FINAL GRADES

Grade cards will be delivered to departmental offices for basic courses on Tuesday, May 30, with all others on June 1. Cards should be checked immediately to see that there is one for each student. All grades are due in the Office of the Registrar 36 hours after the final examination is given.

UNION HOURS

The Union Building will be closed for Memorial Day, Monday, May 29. On Saturday, May 27, the building will be open from 7 a.m. to 11 p.m., the billiard room from noon to 6 p.m., and the grill from 9:30 a.m. to 11 p.m. On Sunday, May 28, the building will be open from 7 a.m. to 7 p.m., the billiard room from noon to 6 p.m., the cafeteria from noon to 2 p.m., and the grill from 11 a.m. to 6 p.m. The bowling alley will be closed both Saturday and Sunday.

ACADEMIC COUNCIL

The Academic Council meeting originally scheduled for Tuesday, May 30, will be held at 3:15 p.m., Thursday, June 1, in the Con Con Room of the International Center.

TOWN MEETING

A town meeting for peace will be held from 7 p.m. to midnight, Thursday, May 25, at the United Ministries Center, 1118 S. Harrison. The program will include speakers, films, and dramatic presentations.

HEART DISEASE

David Kritchevski, a biochemist at the Wistar Institute, Philadelphia, will speak on "Diet and Heart Disease" as part of the Visiting Scholar in Medicine Series sponsored by the College of Osteopathic Medicine. The presentation will be held at 12:30 p.m., Wednesday, May 31, in the Centennial Room of Kellogg Center.

SOCIAL WORK

Thomas Gunnings, Martha Karson, Ten DeLeon, Dozier Thornton, and Marsha Worby will participate in a colloquium on "Contemporary Problems in Psychotherapy." Topics to be discussed will include the effectiveness of therapy when client and therapist are of different races or sexes. The seminar, sponsored by the School of Social Work, will be held Thursday, June 1, in the Captain's Room, Union Building.

Information on MSU events may be submitted for possible inclusion in the bulletins to Patricia Grauer, Dept. of Information Services, 109 Agriculture Hall, (517) 353-8819. Deadline for submitting information is noon Tuesday preceding the Thursday publication. The calendar of events will cover a 9-day period, Friday through Saturday.
