Michigan Agricultural  
College Association  
Publishers ■ East Lansing

Vol. XXIX      April 14, 1924      No. 25

# The M. A. C. RECORD

Established 1896

Published for the alumni and former students of the Michigan Agricultural College by the M. A. C. Association.

Published weekly during the college year and monthly during July, August and September; thirty-five issues annually.

Membership in the M. A. C. association, including subscription to THE RECORD, \$2.50 per year.

Unless members request a discontinuance before the expiration of their memberships it will be assumed a renewal is desired.

Checks, drafts and money orders should be made payable to the M. A. C. Association.

Entered as second class matter at the post office at East Lansing, Mich.

## ASSOCIATED OFFICERS NOMINATED

*Committees Submit Two Slates for Annual Election June 14*

Committees headed by M. B. Rann, '21, and Judge C. B. Collingwood, '85, have presented the following nominees for election to office in the organization of the M. A. C. Association.

Rann's committee submits the following:

President, Frank F. Rogers, '83.  
Vice-President, A. C. MacKinnon, '95.  
Treasurer, L. H. Baker, '92.

Executive Committee:

1 year, H. T. Ross, '04.  
2 year, H. D. Luce, '84.  
3 year, E. E. Hotchin, '12.

Directors of the M. A. C. Union:

Mrs. Grace Lundy Drolett, '00.  
Stanley Powell, '20.

Judge Collingwood submits the following for his committee:

President, Frank F. Rogers, '83.  
Vice President, H. S. Hunt, '05.  
Treasurer, Luther H. Baker, '92.

Executive Committee:

1 year, Horace Thomas, '01.  
2 years, Clifford McKibbin, '11.  
3 years, G. V. Branch, '12.

Directors M. A. C. Union:

Mrs. Dorothy Dorris Frimodig, '17.  
M. B. Rann, '21.

Ballots bearing these names will be mailed to every member of the Association in good standing about May 1, in the meantime other names can be placed on the ballot by nominations submitted by petition of twenty members.

Most of the names on both lists have been actively associated with alumni affairs for some time. Frank F. Rogers has been treasurer for two terms, is located in Lansing, and is willing to give the time necessary in handling the office. A. C. MacKinnon has long been a member of the executive committee from Bay City and is closely identified with its work. H. T. Ross has served the Association as a mem-

ber of the executive committee for two years. H. D. Luce is a prominent Lansing business man. E. E. Hotchin has been a member of the executive committee for some time, representing one or more local organizations. Mrs. Drolett has served for a year as a member of the executive committee and has been active in alumni work. Stanley Powell is located in Lansing and was a member of the Union board when in college. Luther Baker is a well known alumnus close to the college.

Judge Collingwood's committee agreed with the other organization on the nominations for president and treasurer but it submits H. S. Hunt for vice-president. Hunt has served on the executive committee for two years and is located in Jackson. Horace Thomas has been identified with alumni work, he is one of the most prominent of the engineering graduates. Clifford McKibbin, former alumni secretary, lives in East Lansing and keeps in touch with alumni affairs. G. V. Branch has served as an important member of the executive committee for several years, representing the Detroit M. A. C. club. Mrs. Frimodig is in close touch with college affairs, living in East Lansing and was a member of one of the first classes to actively further the Union project. M. B. Rann was president of the Union board during his senior year. He is also a resident of Lansing.

The committees were urged to nominate people who would find it possible to attend the meetings of the organization to which they were elected. At present there are monthly meetings of the executive committee and on occasion it is called oftener. The Union board meets at least once each month and often is called for special meetings to consider matters important to its welfare, so it is imperative that members of these organizations live within a fairly close distance of East Lansing.

## MEETING ENDORSES PROPOSED CHANGE

At a convocation in the gymnasium on April 9, Acting President Shaw, proposed that the efforts of those interested in the college be applied toward changing the name to Michigan State College with the full legal title of Michigan State College of Agriculture, Engineering, Arts and Sciences. President Shaw's proposal was greeted enthusiastically by the students and faculty. He pointed out that to make a decided change in the name might work harm on the institution, while to alter the present name to fit the new circumstances would be but conforming to the demand that the College recognize its divisions other than the one first established.

Judge C. B. Collingwood, '85, declared that he had never had reason to regret that he was a graduate of an agricultural college but pointed out that it was entirely probable that a change such as President Shaw had suggested should be carried out in justice to the growth of the College. He found that the name M. A. C. was not so old as had been imagined, dating from 1909. He recounted the various names by which the College has been officially known since its founding and declared that in his opinion the present name should be altered to fit the circumstances and place the College in a position where a great part of its work could be realized through its name. He said that the acceptance of President Shaw's proposal would mean that the name Michigan State college would be the popular title for the College while the rest of the name would be used on official papers, advertising, and other matters where the legal title was necessary or desirable.

While introducing the subject President Shaw revealed the name he proposed printed on a large white cardboard and suspended over the platform. The discussion of an increase in enrollment was continued at the meeting. It was announced that Benjamin V. Halstead, '24, who completed his college work at the end of the winter term,

had been selected to handle the work on getting into touch with the prospective students. Halstead will keep a record of the persons listed, send out literature on various courses where it is requested and will follow up each case so far as possible through the mails. It is planned to ask alumni in the various localities to aid through personal talks with the high school pupils.

In this manner it is hoped that the people of the state may come to a full realization of the courses offered at M. A. C. The impression which has been very generally given that it is purely an agricultural college and which has been made the topic for many political speeches has become so general that it is necessary to educate the people to the possibilities of the College. It is hoped that this may be accomplished through the activities of the campaign now in progress.

## REWARD BANDMEN UNDER NEW SYSTEM

Under a new system of awards recently adopted men playing in the band will receive recognition for each year of service after the freshman year. Sophomores are to get jersey sweater coats with a distinctive monogram under which is the word "BAND" in large letters, juniors receive a similarly monogrammed green blanket with white edge and the name of the recipient and the instrument he played inscribed on the blanket, seniors will receive gold watch fobs marking four years of participation.

There will be no possibility of confusing the band monogram with the regular athletic insignia for the former is of a decidedly distinctive type. Hitherto the trips made by the organization and a gold fob for four years service have been the only rewards for hard work which a bandsman must put in to retain a place in its ranks. It is believed that the new awards will serve to stimulate interest and keep the morale of the band at a high point.

## BUTTERFIELD WRITES ON RURAL PROBLEMS

Under the title "A Christian Program for the Rural Community," the George H. Doran Company of New York has published the Fondren lectures delivered in 1923 before the School of Theology of Southern Methodist University by Kenyon L. Butterfield, '91, president of Massachusetts Agricultural college. The publishers say: "These lectures by a leading authority on community life offer a constructive program for special study, leadership and method in presenting the Christian message in rural sections. There is an informing and suggestive discussion of the economic and ethical phases of the problem in their bearing on the common welfare of the community. A practical textbook for theological seminaries and training institutes. Of particular value to ministers in country districts, in that it reveals opportunities and indicates definite and effective lines of approach to a successful meeting of difficult conditions."

There were five lectures in the series and they divide the book into that number of chapters in the development of the discussion with the following headings: The Need of a Christian Program, The Principles Involved, Some Applications to Rural Affairs, The Organs of Christian Rural Progress, Christianizing the Rural Community.

From current literature and events the author develops the theme that the present civilization is semi-pagan and summarizes as the purpose of a Christian program the establishment of a Christian democracy. In the principles with which one comes into contact in such an attempt he finds that of full opportunity for each individual, the common welfare, morals in a crowded world, the good of all humankind and the inner life. He emphasizes the obligation of service to fellow-man placed upon the group as well as the individual as one of the most important factors in the christianizing of the community and demonstrates in what way

these considerations apply to the life of the farmer.

Most important of the institutions through which such a program can be carried out are the church and the farmers' organizations, according to the author, who sees the need for ministers as well versed in the economic problems of the agriculturist as he is in the precepts of religion so that he may apply the principles of Christianity to the business of the community and be a well rounded leader in his field. He urges collective enterprises to strengthen community spirit and the use of the community of farmers as the basis through which Christian principles may be applied with best effect and the most lasting good. He quotes from the writings of Liberty Hyde Bailey, '82, and E. C. Lindeman, '11.

### Alumni Opinion

Dear Mac:

I was very much interested in the articles in a recent RECORD, by Mr. Henshaw and Mr. Uhl, in regard to changing the name of the college. The "University of the Great Lakes" sounds like a very appropriate and attractive name. I sympathize with the feeling expressed by Mr. Uhl as I have felt exactly the same way but have not had to endure it quite as long as he. It is surely annoying for an engineer to have to continually explain that his Alma Mater actually contains an engineering college. As far as I am concerned, until the name of the college is changed, I will be content to use "Michigan State College."

Very truly yours,  
L. F. Keeley, '21.

Milwaukee, Wis.

A. C. McIntyre, who completed his college work at the end of the winter term, has received an appointment as forest guard on the Carson National forest in New Mexico where he will be employed on timber scale work. His address is Taos, New Mexico.

## VIEWS AND COMMENT

Within the next few weeks all members of the Association in good standing will receive printed ballots containing two complete lists of nominees for the offices within the power of the Association to fill. It is important that these be filled in immediately and returned to the office, or if the people nominated by the two committees and whose names are printed in this issue do not meet with your approval you can submit a list of your own choosing by having twenty members in good standing sign a petition placing before the Association your choice. These are returnable immediately as they must be available for use on the ballots which must be sent out by May 1.

Ballots must be placed in the return envelopes which must be endorsed with the sender's name and returned to the alumni office so that they arrive by June 12. The results of the election will be announced at the annual meeting of the Association on June 14 by a committee of tellers appointed by the president and the ballots will not be opened until this committee receives them.

Here is an opportunity for everyone to have a voice in the election of the officers of the Association, to neglect it is to forfeit a privilege, to carry it out is to have the knowledge of participation in the work of the organization of which you are a member.

One of the good results which should follow the establishment of the Union in the Union Memorial building is the drawing together in closer fellowship the student and the alumnus. Under the plans which have been presented to the board of directors of the Union for the expansion of that organization to care for the manifold duties which will come to it with the structure various committees of the Union will serve as clearing points for information to alumni and the public in general, they will serve as employment inter-

mediaries through which the alumnus seeking workers can get into touch with men seeking work, they will provide certain functions designed to introduce the graduate to the student, and through the use of the building will have a better opportunity for carrying out this type of work than they could have under any other conditions.

Convocations were held weekly during the winter term but will find a place on the schedule of alternate weeks during the spring months. The daily hour from 11 to 12 will be reserved, however, and the periods not used for convocations will be designated as student hours during which class meetings and other gatherings of two or more people may be held.

All classes in home economics will be conducted in the new Home Economics building this term. Laboratory and classroom equipment from the Woman's building has been moved into the new structure. Besides the technical courses under the direction of the women's division there will be class-rooms devoted to history, English, economics and physics instruction.

Professor and Mrs. M. M. McCool have left for a tour of Europe during which Dr. McCool will attend the International Institute of Agriculture meeting at Rome in May. Dr. McCool, head of the soils department, was chosen as one of the delegates from the United States and will appear before the soils section of the conference.

Gates for the entrance to the stadium have arrived and are ready to be put into place. The addition of these will practically complete the equipment of the field. It will still be necessary, however, to fill the track with cinders and put in walks either of cinders or concrete in a more permanent form than they now exist.

## "Close Beside The Winding Cedar"

H. E. Lynch, '10, attended the convention of city planners at Los Angeles April 7 to 10. Lynch is secretary of the city planning commission of Grand Rapids.

M. T. Schultz, East Lansing, was chosen captain of the freshman basketball team at the close of the yearlings' season. He won his numerals as a half back on the 1927 football team last fall, he is also skillful in track events.

A booklet descriptive of the campus and the activities of the students has been issued by the College for distribution among high school pupils. It is obtainable from the registrar. Hundreds were distributed by students during the spring vacation.

Nathan D. Simpson, '13, is president of the newly organized Bull Dog Wrench Co. which has started production of a new type of wrench at Benton Harbor. The product will be sold through agencies instead of dealers. It is said to be unbreakable and can be used instead of an end wrench on all sorts of work, including pipe or round steel.

In a total of eighteen games the freshman basketball team tallied 363 points to its opponents' 338. Many of the games were played either in Lansing or East Lansing. Of the total Coach Young's men won seven and lost eleven. Forty-six men took part in the games. One contest went three overtime periods before a decision was reached and another required two extra sessions.

Ludovico Hidrosillo, '20, in agricultural work in the Philippines, of which he is a native, recently wrote a communication to the Lansing State Journal in which he upholds the demand of his people for complete independence. He believes the desire to take part in world affairs as a nation should be gratified and that the eastern dependency of the United States should be allowed to manage its own affairs.

The following men have been elected to membership in the Varsity club: Carl F. Schultz, '25, Lansing; Hugh A. Robinson, '25, Detroit; Edward C. Eckert, '25, Grand Rapids; Charles D. Miller, '24, Eaton Rapids. Miller was manager of the 1923 football team and the others were all monogram winners in the gridiron.

In the March 26 issue of "The Technician," Detroit Cass high school publication there appeared nearly an entire column of discussion of the proposed change in the name of M. A. C. Acting President Shaw was quoted at length in regard to the proposition as well as a statement which gave in considerable detail the opportunities for study now offered by the College.

Professor E. H. Ryder was re-elected mayor of East Lansing in the annual city election on April 7. B. A. Faunce continues as clerk, J. Schepers as supervisor, Orville Ayrs, '02, was elected alderman succeeding A. J. Nash, Dr. E. T. Hallman was re-elected alderman, G. E. Ewing, '02, failed to win out in the contest for the job as justice of the peace when L. F. Newell, college engineer, was returned to office in that capacity. Professor H. B. Dirks opposed Professor Ryder and for the first time in several years there was a full second ticket entered in the race.

Charles W. Garfield, '70, takes his community interest with him on his travels. While he was spending the winter in Florida he found time to write a detailed description of the county in which he was enjoying the southern climate and this was printed in The Michigan Tradesman. He told especially of how a fair had been arranged for and was ready for the crowds within sixty days of the beginning of work on the plans, and discussed the school system, the authority over which has become highly centralized in Volusia county. The DeLand Daily News reprinted his article.

## WKAR HAS MODERN STUDIO OUTFIT

*Facilities for Sending Out Programs Described by Holcad*

Hundreds of alumni from all points of the compass report hearing all or part of some of the programs broadcast by WKAR, the College radio station, and there is much general interest in the project. The Holcad, in a recent issue, described the studio from which many of the numbers are sent out. The Holcad article follows:

To one unaccustomed to the methods and practices of an up-to-date broadcasting studio, a visit to the M. A. C. studio on the fifth floor of the new Home Economics building is at once interesting, exciting and instructive.

Entering the main room, which is 13 by 17 feet, one finds himself surrounded by draperies. In fact a diligent search must be made to discover any of the wall at all for almost every inch of space on the side walls and ceiling is covered with olive drab canvas draperies. The purpose of these is to absorb all reverberations, which, if allowed to "play" back and forth at will, would create an echo which would destroy the correct reproduction of the talking or singing.

Perhaps the next thing noticed is a board at one end of the room on which is mounted three lights, one green, one white and one red. When the operating room is not ready the green light remains lighted, and when they are ready a switch is thrown and the white light appears. Everything is then straightened around in the studio, and when everyone is "set," the studio manager, Fred Holmes, throws a switch which serves the double purpose of lighting the red light and of connecting the circuit so that the program will go out on the air.

"This is WKAR, the Michigan Agricultural college, at East Lansing Michigan—the oldest agricultural college in the world," says the announcer into the microphone, and soon the program is under way.

The microphone is a very delicate apparatus six inches in diameter, similar in

principle to the ordinary telephone transmitter. It is supported by a light framework, and hangs about five feet from the floor.

Wires lead from the microphone to a one stage power amplifier, which sits on a small stand in one corner of the room. This amplifier is used to overcome the resistance of the communicating lines to the operating room in the engineering building, and to make the current so high that there is no danger of induction from the telephone lines in the communicating tunnel.

When the lines reach the engineering building—but that is getting beyond the subject, which is the description of the studio and how it works.

A little room 10 ft. by 10 ft. off from the larger room is used entirely for talks and speeches. It has been determined that the best results are obtained when one stands from two to three feet from the microphone when speaking and six or eight feet from it when singing.

A telephone for communication with the operating force, and a six volt storage battery which supplies current for the power amplifier complete the technical equipment of the studio. A carpet over all the floor space, and furniture consisting of a piano, several chairs and a small table, should not be overlooked in a description of the room.

A waiting room off from the broadcasting rooms has not been used much yet, but it is planned to install a "monitor" arrangement here so that people participating in some part of the program may wait in this room and "listen in" to the program being sent out from the adjoining room.

In *The Indian Leader*, a weekly publication issued at Haskell Institute, Frances Spencer, '19, is credited with much of the success of several important events in the affairs of the girls' department of that school, of which she is in charge.

### RILEY, '08, PRAISED FOR UNIQUE WORK

Earl F. Riley, '08, is president of the State School of Science at Wahpeton, N. D., where vocational education is the specialty. The Small Pica, published at Wahpeton, recently printed the following tribute to Riley and his work:

President Riley of the science school has proved himself a man with the viewpoint of the vocational educator, a rare quality, but essential to the success of such a project as the state is carrying out at Wahpeton. Mr. Riley, however, disclaims any credit due him but points to his staff of instructors, all of whom were workers in their various trades and vocations before they became teachers. Not only were the men on the vocational staff at the science school, workers at their trades, but they all have a record of successful experience behind them. That is one of the pre-requisites to a position at the science school under President Riley. This means that vocational education is on a firm foundation from the start and with a group of serious workers in the student body, all of whom are bent on advancing in life, the experiment cannot fail in good results.

### RIFLE TEAM LEADS IN CORPS ARE MATCH

In its most recent triumph the varsity rifle team took top honors in the Sixth corps are a competition, defeating the teams of seven colleges in the section. The score follows:

M. A. C.....	2953
University of Michigan.....	2949
University of Wisconsin.....	2929
Ripon college.....	2920
University of Illinois (varsity).....	2910
Northwestern college.....	2806
University of Illinois (freshmen)....	2800
Northwestern university.....	2724

### NUTTILA IS ELECTED BASKETBALL CAPTAIN

Matt Nuttula, '25, Negaunee, for two years one of the mainstays of the varsity basketball squad, has been elected captain of the team for the 1925 season. Nuttula, in addition to his activities in athletics, is an honor student in engineering. His first attempts at college competition failed to impress the coaches sufficiently to admit him as a member of the freshman squad and he contented himself with intra-mural basketball during his first year. His second year found him the star forward of the varsity and the past season he kept up the work although his efforts were somewhat dimmed by the close guarding to which he was subjected.

Carleton H. Currie, '20, who for the past three years has been studying in Boston, has been assigned a State College scholarship at the University of Michigan, according to word received from Dean Lloyd of the graduate school at the university. Currie was graduated in engineering.

### COACH WALKER ILL; CAPTAIN IN CHARGE

Fred M. Walker, varsity baseball and basketball coach, became ill from appendicitis while on a trip to Chicago on April 5 and underwent an operation at the Presbyterian hospital in that city on the following day. He is reported to be progressing favorably and expects to be back in East Lansing this week. During his absence Captain MacMillan is in charge of the squad.

Lt. Col. T. L. Sherburne, head of the College military department, will be in charge of the R. O. T. C. work at Camp Custer. Captain Gaillard Pinckney of the infantry unit has been appointed local recruiting officer for the Citizens' Military Training Camp for this year.

## PLAN INCREASE IN ATHLETIC EQUIPMENT

*Winter Sports Short of Paying Expenses—Thirty Events Were Listed for Term.*

A winter sports program which presented thirty separate contests for the students and followers of M. A. C. teams drew to the gymnasium nearly twenty thousand people. Of this number 15,532 attended basketball games on the varsity schedule and 1191 watched swimming meets. Wrestling and track with about 250 for the former and 500 for the latter were the poorest in point of interest displayed. A recent report by Director Young draws attention to these figures and the fact that the money received on these sports was more than \$3,000 less than the amounts expended. Expenses do not include salaries of the members of the department staff and receipts do not include the amounts derived from student fees. Basketball games were well patronized during the past winter and the deficit in that sport was only \$524.11 as compared to nearly twice that amount a year ago. The Michigan game with 2,803 in attendance and cash receipts of \$1119 topped the list.

In its program arranged to draw every male student into competitive athletics the department of physical education has been handicapped during the past two years by a deficit of \$12,000 with which it was burdened when the present board in control took office. Much of this sum has been paid off but in accomplishing this end some of the features of the department have been dropped and to replace these and expand so that it will be in a position to function properly the department has requested an appropriation larger than it has previously had. Among the equipment and personnel requested are a staff adequate to meet the demand for instruction. There was a squad of seventy freshmen out for football last fall, a larger one out for freshman basketball and one almost as large has been signed up for freshman baseball. It is the policy of the department to carry on the squad all freshmen who report and attend practices regularly, thus extending the benefits of the department.

Intra-mural sports have expanded during the past two years until more than half of the male students are engaged in some type of competition. These require general supervision and equipment. In attempting to supply these the board has asked a special fund for proper equipment and a further fund for putting into shape the field south of the Red Cedar, much of which will eventually be used for inter-class and inter-fraternity sports as well as those which are a part of the required physical training course.

Another burden which has been added to the athletic department is that of instructing classes in physical education which are gaining in size each term. This necessitates considerable classroom work, all of which has fallen to the lot of the members of the regular staff of the department.

The department of physical education is carrying on one of the most important branches of college work, it is decidedly a part of the regular collegiate departments, it comes into contact with the public more than any other regular department and comes into touch with every student during at least two years of his or her term in college.

In his efforts to make the department more efficient and to put it in a position to do a greater service Director Young has suggested additions to equipment and personnel for the next year. The proportion in which these are allowed will determine, more or less, the proportion of the available work which it will be possible for the department to carry out.

\* A design has been selected by the board in control of athletics for a medal which will be presented each year to the senior showing the most proficiency in athletics and scholarship through his four years in college. The medal will be similar in significance to the one awarded each year in universities members in the Big Ten conference.

**NECROLOGY**

MRS. JAMES SATTERLEE  
(Contributed)

Our hearts go out in sympathy for our brother alumnus, Mr. James Satterlee, of the class of '69, whose beloved wife, Ella C., after a long illness, was taken by death on the morning of March 7. Mrs. Satterlee was a beautiful character, beloved by all who knew her best. She was the daughter of John A. Crosman of Lansing and was married to Mr. Satterlee on the 29th of December, 1870. She was intimately associated in her young womanhood in Lansing with Miss Lou Athern, who became the wife of Charles E. Bessey, and Miss Cora Fish, who became the wife of Richard Haigh, Jr., all of the class of '69.

The greater part of her married life was spent with her husband at the Satterlee farm, two and one-half miles west of the city of Greenville. For two years, '83 and '84, while her husband was professor of horticulture at M. A. C., she was a resident at the College in Williams hall. Since the spring of 1905 she has been a resident of the city of Lansing. Her body was taken to Greenville for burial in the family lot, at beautiful Forest Home cemetery, by the side of her only child, a son, who died in 1874.

D. L. HAGERMAN, '13

D. L. Hagerman, '13, who for the past four years had been industrial and agricul-

tural agent for the Pennsylvania railroad, died at his home, 1421 Logan street, Grand Rapids, on March 30, following an illness of several months. While in college Hagerman was active in campus affairs. He was editor of the 1912 Wolverine and served a year as associate editor of the Holcad. He is survived by a widow, one daughter, Helen Gene, a sister, Nellie Hagerman, '17, and a brother, B. O. Hagerman, '19.

The Grand Rapids Press describes his work as follows:

Mr. Hagerman was one of the most widely known railroad agricultural agents in the middle west, rising from Ottawa county farm agent to prominence in four years. Among extension workers and agricultural leaders of the state he was recognized as the sand farmers' friend, having devoted most of his time to the study of making light soils pay out. Death, however claimed his life before he could complete the work he was hoping to finish by 1927.

The method by which he hoped to raise the sand farmers to a more prosperous level is contained in a bulletin published by the railroad entitled: "The Keystone Rotation." This bulletin is based on the railroad's demonstration farm at Howard City where sand land farming is being conducted on light soils typical of large areas along the Pennsylvania's right of way north of Howard City.

When Mr. Hagerman succeeded William P. Hartmen as railroad's agricultural agent in 1920, the demonstration farm was not

paying its way by a large sum. But with the Keystone rotation it has been possible to make the farm come within a few cents of breaking even. In 1924 with the aid of a good dairy herd and flock of hens, Hagerman hoped to put the farm into the profit column.

He was born at Montgomery, Hillsdale county, June 28, 1889. He was graduated from Quincy high school in 1907. Following his graduation from M. A. C. in 1913 he taught agriculture in the St. Johns high school for two years. For the next five years he was county agent for Ottawa county, leaving there in 1920 to accept the position with the Pennsylvania railroad which he held up to the time of his death.

#### CHARLES W. NICHOLS, '92

Charles W. Nichols, w'92, died at his home in Lansing on Thursday, March 20, after a brief illness from pneumonia. Nichols was one of the most prominent attorneys in Lansing, where he had practiced his profession since 1891.

Nichols was born near Grand Ledge in 1868, the youngest of eight children. He attended the Grand Ledge high school and entered M. A. C. in the fall of 1888. After his first year he entered the law office of Davis and Nichols in Grand Ledge where he studied and passed the examinations for admission to the bar. In 1891 he joined the office of the state attorney general at Lansing and in 1895 started his own office. For several years he served as a member of the state board of law examiners.

He was selected to prosecute, on behalf of the state, several notable cases. He was a director in the Motor Wheel corporation, the Duplex Motor Truck company, the City National bank and served as attorney for the Olds Motor Works. For many years he was identified with the Lansing street railways as attorney and in tribute to his memory all street cars in the city stopped for one minute during the funeral service. He was prominent in community work, was treasurer of the Lansing Red Cross during the war and later a director

of the welfare fund. He was a member of the Knights of Pythias, several Masonic orders and the Rotary club.

Justices of the state supreme court, several of the circuit courts and representatives of the state bar association were honorary pallbearers at the funeral.

He is survived by the widow and a small son, Lauris.

#### MEETING OF THE STATE BOARD OF AGRICULTURE

##### President's Office

March 19, 1924 11 o'clock A. M.

Present: President Shaw, Mrs. Stockman, Messrs. Brody, McPherson, McColl, Gowdy, and Secretary Halladay.

The minutes of the previous meeting having been in the hands of the members, were approved without reading.

Motion made by Mr. McPherson that the resignation of Dr. Overmyer, Instructor in Chemistry, be accepted to take effect April 1. Carried.

Motion made by Mr. McColl that the following resignations be accepted:

Mr. H. E. Dennison, Extension Specialist in Dairy Husbandry, to take effect March 15.

Mr. Henry R. Adams, Graduate Assistant in Soils, to take effect April 1. Carried.

Mr. J. L. Kraker, County Agricultural Agent for Benzie county, to be effective April 15. Carried.

Miss Adele Koch, Assistant State Leader of Home Demonstration Agents, to take effect July 1. Carried.

Motion made by Mr. Brody that the following appointments be made:

D. L. McMillan as County Agricultural Agent for Chippewa county, effective April 1. Carried.

Arthur E. Hagen to be County Club Agent for Iron county, to be effective March 1. Carried.

H. N. Wells as superintendent of the Graham Horticultural Station at Grand Rapids, beginning April 1.

Motion by Mr. Brody that Mr. Lawrence Martin, Instructor in English, be granted one year's leave of absence without pay. Carried.

Motion by Mr. McColl that the request of the Experiment Station library for a budget apportionment of \$600 be left with the finance committee. Carried. Also the request of Dr. Hunt of the Zoology Department for additional funds, and Dr. Hallman's request for additional funds for the Animal Pathology department be left with the finance committee. Carried.

Motion by Mr. Brody that Mr. Laver's request to change the present ash conveyor system at the boiler house from a pressure system to an exhaust type, the cost not to exceed \$800. Carried.

## Cash is Needed to Carry on the Work on the Union Memorial Building

Prompt Payment  
will insure the  
success of the  
project at the  
lowest possible  
cost.

The Students  
used shovels to  
start the con-  
struction work,  
you can use a pen  
to keep it going.

Motion made by Mr. Brody that the Board renew their offer of \$10,000 for the property belonging to the Union Literary Society: terms, if agreeable, to be arranged by the President and Secretary.

Motion made by Mr. Brody that the matter relative to the salaries of summer school teachers be referred to the educational committee. Carried.

Motion made by Mr. Brody that the lease on ground asked for by the State for the Department of Public Safety, be left to a committee composed of Mr. McColl, Mr. Gowdy and the Secretary, with power to act. Carried.

Motion made by Mr. McPherson that Mr. McColl be empowered to employ an engineer to design and make specifications for the new bridge to be built across the Red Cedar river back of the gymnasium.

Mr. Shaw reported that he had appointed the following committee to look after the proposed Horse Show being planned for the last day or two in May next: Col. Sherburne, Secretary Halladay, and Dr. Hutton.

On motion of Mrs. Stockman the establishment of a department of Education was authorized to include teacher training for one, two, and four year courses. The one year course leading to the higher course is to be offered this year in addition to teacher training for students of the Liberal Arts course. These changes and additions to be subject to faculty action.

Motion by Mr. Gowdy that the new Liberal Arts course fees be as follows:

Course fee \$26.00; in the Department of Music fees for violin, piano, voice, or band instruments, \$7.50 per term for matriculant; \$20.00 per term for each subject for non-matriculants wishing to take any of these subjects. Carried.

On motion adjourned at 5:30 o'clock.

## CLASS NOTES

Reunion time is but two months away. Alumni Day, June 14, will draw to the campus a large number of former students. Definite plans for the organization of class groups where these are not already in existence should be taken when they are gathered at the campus. Class organizations have proved themselves the most effective aids to alumni work as well as the most attractive to the individual. If your class has no permanent organization the coming reunion presents the opportunity to get it under way.

Charles W. Garfield has returned from DeLand, Florida, and is at his home at 206 Burton street, S. E., Grand Rapids.

'90

M. P. Trask sends his regards: "I am with the Arnold Construction and Engineering company of

FORDS — LINCOLNS — FORDSONS  
GERALD BOS, '16 with  
STANDARD AUTO CO.  
Grand Rapids, Mich.

Chicago, which has the Pere Marquette terminal construction at Erie, Michigan. Will be here at least another month and then probably go to Ashland, Kentucky, for the same company."

'93

A. T. Stevens sends his word from Storrs, Connecticut: "Professor of gardening at Connecticut Agricultural college where I have been for seventeen years."

W. F. Hopkins has been appointed a vice-president of the Chicago Trust company.

'94

R. S. Campbell is general agent for the Massachusetts Mutual Life Insurance company at Port Huron, Michigan. He sells surety bonds and general insurance, and is also a member of the board of education. His residence is at 1020 Wall street.

'95

Frank Johnson, assistant chief engineer of the Cadillac Motor Car company, is quoted extensively in a recent issue of the Detroit Free Press concerning the new type of engine used in the Cadillac automobile. Johnson has been one of the main factors in the engineering department at the Cadillac Motor Car company since it was organized.

'97

In order that the National Dairy association may undertake a larger service to the dairy industry, H. E. VanNorman has been asked to give his full time to the work, and will have his headquarters at Suite 222, 910 S Michigan avenue, Chicago, Illinois.

'04

G. E. Martin has moved from Chicago, Illinois, to Wilkes-Barre, Pennsylvania, where he is reached in care of the Sheldon Axel Spring company.

'07

E. S. Bartlett is no longer at 2017 Grand avenue, Butte, Montana.

Violet Miller Dixon has moved in Los Angeles, California, to 2947½ Leeward.

'10

George Freear has for his new address in San Francisco, 557 Howard.

'11

The following note comes from G. Harris Collingwood: "Please change the address of my Record from 2804 27th St., N. W., to 405 Columbia Road, N. W., Washington, D. C. I am changing from a room to a house, and will be bringing Mrs. Collingwood and the family down on April 1. On January 9 the family was increased by the arrival of a daughter, Jean Cummings Collingwood. She joined her sister Eloise, and her two brothers, Charles and Thomas, and they all make an active bunch. At least their mother says that they are a handful."

R. S. Russell lives at 1023 Lay boulevard, Kalamazoo, Mich.

## Preferred Position

Old Timers in advertising well remember that the best preferred position in any small town "sheet" thirty years ago was alongside the personals.

The alumni publication is the only magazine today that offers advertising space alongside personal news notes.

These notes are all about personal friends of the readers.

So—every page is preferred position.

Forty-four alumni publications have a combined circulation of 160,000 college trained men. Advertising space may be bought individually or collectively—in any way desired. Two page sizes—only two plates necessary—group advertising rates.

The management of your alumni magazine suggests an inquiry to

## “And I am with the doers”

Time was when war called the ambitious and offered life's great rewards. But the captains and the kings passed. The enduring conquests of our times are being made in industry.

Through the wide doors of General Electric plants and offices an army of 100,000 men and women moves every day. Each of them, looking back over the road, can say:

“Things worth while are being done in my lifetime, and *I* am with the doers.”
