No. 27

# The M. A. C. RECORD

Established 1896

Published for the alumni and former students of the Michigan Agricultural College by the M. A. C. Association.

Published weekly during the college year and monthly during July, August and September; thirty-five issues annually.

Membership in the M. A. C. association, including subscription to THE RECORD, \$2.50 per year.

Unless members request a discontinuance before the expiration of their memberships it will be assumed a renewal is desired.

Checks, drafts and money orders should be made payable to the M. A. C. Association.

Entered as second class matter at the post office at East Lansing, Mich.

ROBERT J. McCARTHY, '14, editor

## THE M. A. C. ASSOCIATION

## EXTENSION UNDER DEAN OF AGRICULTURE

*State Board Authorizes Removal of Several Buildings; Work on Hort Building*

At its meeting on April 16, the State Board voted to place extension work under the control of the dean of agriculture. In line with this recommendation, presented by Director Baldwin, members of the extension staff will have titles and rank comparable to that held by the members of the regular College staff. Under this plan of organization the dean of agriculture will have charge of all branches of work which are directly concerned with his division. There will still be a director of extension and a director of the experiment station but both of these will be subject to the orders of the dean. At present Acting President Shaw is dean of agriculture and director of the experiment station. It is pointed out by College officials that this ruling gives a better opportunity for thorough coordination of efforts than was possible under the old plan where the director of extension was directly responsible to the State Board. Extension is closely related to or must rely upon the research work done in the experiment station for the solving of most of the problems of a technical nature presented to it by the farmers. The experience of extension and research workers is a valuable asset to the teaching force of the division. Coordinated under one head the agricultural branches should be able to function at their highest point of efficiency.

This move is in line with the policies pursued at land grant colleges generally. It has the approval of President Shaw and was recommended by Director Baldwin as the manner in which the greatest good could be accomplished.

The State Board also authorized the secretary to sign a contract with the King Construction company for the erection of the greenhouses in connection with the new horticultural building and work has been started on grading in preparation for the construction. The greenhouses will be

utilized as laboratories for classes in floriculture, vegetable gardening and small fruits as well as other purposes of the department. One quarter of the available space will be divided between the soils, botany and farm crops departments for experimental purposes. These houses, which will be located directly south of the horticultural building and filling the space almost completely between that structure and the Dairy building, will be two in number and each will have a total length of 216 feet, including the sixteen foot house which will connect the two main houses at the end, and a width of thirty feet. The King Construction company has been awarded the contract for the work.

In preparation for building horticultural units, the old storage which has stood on Farm lane for many years has been torn down and the small isolation wards, which have been in use as the College hospitals have also been prepared for moving. Two or more of these small houses will be moved south on Farm lane and east of that roadway where they will be made available as dwellings for farm help, the others have been sold and will be moved from the campus. The Horticultural building will front on the north and will be located at the southwest corner of the road which joins Farm lane east of the Bacteriology building. With the Agricultural building, the row of science buildings and the Dairy building this structure will make a compact group and opens the way for the extension of the campus proper to the eastward.

Architect E. A. Bowd is working on the details for the new headquarters for the Horticultural department. The exterior of the building will be of brick and stone, conforming to Campus practice and it will be square in general outline, giving the department a compact plant for its various endeavors.

Further authorization by the Board allows the secretary to dispose of the present Y. M. C. A. building, the music center, the old post office and the old car station. The Y. M. C. A. and music center are close to the new main entrance to the campus. Both of these must be moved to make room for highway construction work in connection with the plan for a boulevard along the north border of the Campus.

It was also voted by the Board to authorize the conferring of M. A. degrees on the same basis as M. S. degrees are now granted. This was requested by the committee on advanced degrees. The department of history and political economy was given permission to begin this work in the spring term. The proposal to establish special teacher training courses was referred back to a committee for further action.

Dean Bissell and J. R. McColl, '90, were appointed to represent the College at the semi-centennial of Purdue university May 1, 2 and 3.

## SENIOR ENGINEERS FORM NEW SOCIETY

A new senior society, selecting its membership not alone on the basis of scholarship but on other qualities considered valuable to the college man has been formed by the engineers of the class of 1924. It has been named the Diagonal, without apparent reason, and plans to have a membership list of twelve, civil, mechanical, electrical and chemical departments of the division being represented.

Those who constitute the organizing group of the new society are: T. F. Burris, Sault Ste. Marie; W. R. Hullinger, Royal Oak; W. E. Nordberg, Benton Harbor; E. R. Lewis, Port Huron; V. W. Bunker, Grand Rapids; A. J. Reading, Farmington; Harold Kerr, Durand; Harlo Shannon, Marcellus; Roy Alger, Clarkston; Bailey Smith, Howell; Harry Kull, Lansing. It is the intention of these men to select twelve men from the junior class to carry on the society another year and they are to perpetuate it in a similar manner.

## STATE MAKES MOVIES OF COLLEGE ACTIVITIES

Under the direction of the state department of education a motion picture film of the educational activities of the College is being prepared. It is planned that this film, of which there will be at least two thousand feet, will give in detail some of the laboratory and class room work of M. A. C. as well as showing some of the equipment available for the student. Modern lighting effects are employed to bring out the details of the various scenes and classes are shown in session in the laboratories.

Views have been taken showing the engineering students at work in the laboratories of that division such as the mechanical and hydraulic laboratories, the shops, the drafting rooms and other parts of the engineering buildings. In agriculture there is a class in session studying stock judging, one in the farm crops and soils laboratories, dairying and other branches of the division receive full attention.

It is also planned to have a general view of the Campus included in the film which will be available for exhibition generally late this spring. The College expects to have a complete copy available for use among alumni organizations and such other places as may desire it. In connection with this film there is also the alumni film, made last spring and fall, portraying alumni and student activities which is available for use. Together the films will make nearly an hour's program when completed.

This is part of the program authorized by the state administrative board to show the workings of state institutions. The films owned by the state will be available for general distribution as well as will that owned by the College. Films have already been produced showing the work of the state highway department, the industrial school and other parts of the state organization.

Two postponements because of bad weather put the first military review of the season over to April 28.

## POWER HOUSE WILL BE WELL EQUIPPED

*New Structure Soon to be Completed Will be Modern in Every Detail*

Although the Union Memorial building is by far the largest and most impressive structure under construction on the Campus there is another building, of more pressing necessity being erected at the same time. The foundation and steel work for the power house are in place and the cut stone and brick have arrived. When completed it will have sufficient capacity to care for the needs of the entire Campus, including the possible buildings which may be erected in the near future. In architecture it will conform to the style of the engineering shops which it adjoins. The Holcad records some of its features in the following:

In accordance with the building policy followed at M. A. C. the new power plant is going to be the best that modern construction can build and equip. It will not only look the best but be built so that a maximum of efficiency can be obtained from it.

The building will be constructed of Old Rose Mission brick decorated with stone to harmonize. The style of architecture will be the same as followed out in the Engineering building and the other plants near there. On the inside the floor will be of white tile with a wainscoting constructed of special green brick. Above the green brick the wall will be lined with white brack, making a pattern work of the college colors.

The power plant will be equipped with two 500 kilowatt generators and have space left for two 1000 kilowatt generators to be installed when the need arises. As a further means of efficiency two 1000 square foot condensers will be installed, making it possible to economize in the matter of coal consumption during the summer months when steam is not needed for heating purposes.

The plant will generate a 2300 volt alternating current which will be reduced to 110 volts for lighting and 440 volts for power purpose. The using of alternating current

will make it possible to use conductors of smaller size which means considerable in the conducting of electricity to many parts of the college farm. It will not only be a saving in material but will extend the power to many places that cannot be reached under the present system.

Nearly all of the larger electrical apparatus manufacturers will have their products in the power plant. They have all agreed to put a special finish on their apparatus, placing the new power house in the position of an exhibition of the latest and best along that line. Besides being used to generate light and power for the campus the new plant will provide a place for students to study and obtain a practical view of engineering problems.

The subway conduit system started last fall will be finished in the near future, the contract calling for its completion in three weeks. In front of each building will be the subway transformers which are of special design and capable of operating under water should such a condition arise. It is expected that the building proper will be put up in about two months, and if present plans are carried out the power plant should be supplying half the campus by next fall.

Members of the Cosmopolitan club at the University of Michigan made a tour of Lansing and the Campus last week in company with the members of the M. A. C. organization.

Lansing business men looked askance at the invitation from the Union to attend a smoker at the armory on April 17 and failed to accept the hospitality of the student organization. Apparently there is a feeling in the Capital city that contributions to the new building are in order so the guests of the evening stayed away. It is probable that the attraction of the new building will overbalance the reticence of the store owners and industrial leaders—when it is ready for occupancy.

## VIEWS AND COMMENT

June is noted for its weddings and commencements, it is the month of anniversaries rivalling any other on the calendar for their importance to the individual. To look back over ten, twenty, or thirty years or months to the date when you completed your work at M. A. C. and bring into being in your memory the days you spent here is a refreshing occupation. To follow in the steps of those who believe "think good and you shall be good," think youth and you shall be young. There is one day set apart for the graduate when he or she can relive College days, that is Alumni Day, June 14. Following it come the familiar but ever changing features of Commencement week. It is familiar because of its general character which is constantly the same, year after year; but it changes as those who behold it see new faces passing through the mystic portals signifying they are ready for their life work. You are one of more than four thousand who have gone out with the official blessing of your alma mater. There was a particular group among your classmates whose lives were closely related during your days in College, many members of that group will meet you on the Campus, if you will but drop your paltry troubles for a day or so and return. The fountain of youth never runs dry. Come back to the Campus for at least a day, it will be to your everlasting benefit. The day to come is June 14 and it is on Saturday so the problem of leaving your business may be simplified.

Figures showing a general decrease in enrollment for technical colleges seem to indicate a trend in education from the strictly utilitarian training to that of a broader type. Arts and general science courses are finding the most favor while for several years they were more or less ignored by the college student. It may not be the case but it seems as if there had been a swing of the pendulum. Colleges were first founded for training in the

ministry and teaching and preparation for professions generally. There was little room in the early institutions of higher learning for the person wanting purely technical training, this, the educator of that day held, could be had in the shop. Then there was a wide spread movement toward training for industry and business, narrow intensive schooling in the arts and sciences of producing with men and machinery such materials as the markets of the world demanded. Schools of technology sprang up all over the land, older universities added their engineering and special scientific courses and youth spent most of its time learning to plow, fashion implements at lathe and sand pit, handle the reins of business and conduct the affairs of various enterprises. Perhaps there is a new movement which will lead to less technical work and more of a general educational character with the idea of building citizens and men fitted for public life rather than the industrial and business leader.

Buds are near the bursting point on the early shrubbery and soft maples, the fruit trees are beginning to show some of the effects of the few spring days East Lansing has been accorded thus far, return of the migratory birds has brought some of the aspects of summer time, the Campus is being cleaned and polished for the season, in short there are indications that spring is at hand although winter insists upon playing return engagements at intervals without the slightest vestige of an invitation.

More than fifty Mallard ducks made their winter home on the Red Cedar and are nesting along its banks. This flock has stayed within the boundaries of the Campus for more than two years and promises to grow greatly in numbers, making it one of the attractions for visitors as well as interesting specimens for classes in nature study.

## *"Close Beside The Winding Cedar"*

So that it may better serve its purpose the annual engineers' banquet has been postponed until the fall term.

More than half of the stone and brick work on the Union Memorial building has been completed up to the first floor.

Including the graduates who received their diplomas before the close of the year the class of 1923, with 290 members, boasts by far the largest number in the history of the College.

Dr. O. H. Bruegel, who has for a number of years lived at the junction of Michigan and Grand River avenues, has started the construction of a gasoline filling station on his property there which is directly across the street from the site of the new People's church.

Senior co-eds are learning equitation under the instruction of Miss Grimes and officers of the cavalry unit, as part of their course in physical training.

S. A. Green, a former short course student living in Hillsdale county, tells his system for making orcharding pay in the current issue of Farm and Fireside.

There is still a possibility that the alumni luncheon on June 14 can be served on the first floor of the Union Memorial building. Preparations are being made to have the affair there if it proves feasible.

The Columbine Players, hitherto entirely feminine in regard to active membership, have opened their rolls to the sterner sex. They have probably discovered that Juliets do not find life worth while without Romeos.

President Shaw has been called upon to speak before various clubs in cities in the vicinity of Lansing during the past month. His message has always been in regard to the program for the College and the present status of its affairs.

Hugh Blacklock, '19, noted for his ability as a football player, and now a deputy sheriff in Grand Rapids, was the hero of an episode in a hotel room in that city where he had charge of a jury. One of the jurymen started to smoke a cigarette one morning while clad in his pajamas, the pajamas caught fire and Blacklock came to the rescue, smothering the flames with bed clothing.

A news story carried in several college newspapers chronicled the sad fate of the Purdue union building which it declared must be torn down because of lack of funds to complete it. Some of the publications failed to make note of the fact that the story was a huge April fool joke. The Purdue Union building is entirely enclosed and funds were recently obtained to complete and furnish part of the interior.

### OPERATING WKAR

## Alumni Opinion

Editor of THE RECORD:

I am in favor of changing the name of the College in some such way as to give full recognition to all courses now being taught there, without in any way detracting from the value of the present name, expressed either in terms of its special appeal to older alumni or in terms of the traditional and advertising value built around it.

Of the names which have been suggested thus far the one that appeals to me most strongly is the one proposed by President Shaw and seconded by Mark L. Ireland, '01, in the April 7th issue of THE RECORD, namely, Michigan State College of Agriculture, Engineering, Arts and Sciences. This name, however, does not permit the use of the initials M. A. C.

By substituting the word "Associated" for the word "State," this objection is met, and the name, Michigan Associated Colleges of Agriculture, Engineering, Arts and Sciences, it seems to me, meets all the requirements of those concerned. The abbreviated form expressed by the initials M. A. C. would, of course, be the one most generally used.

Yours very truly,  
N. L. Reed, '19E.

Philadelphia, Pa.

This week ballots will be mailed to all members of the M. A. C. Association, who are in good standing, so that they may vote on the officers for the coming year. There are two tickets which may be voted in any manner the member wishes. Straight tickets are easier to count but split tickets often represent more nearly the desire of the voter.

Members of the College teaching staff have formed a Faculty association which meets occasionally and listens to the heads of the various departments tell about their work.

## RADIO PROGRAM SET FOR TUESDAY, MAY 13

If you will tune in with your radio set on the evening of Tuesday, May 13, you will hear a special alumni program in honor of the dedication of the the College on that day in 1857. President Shaw, a member of the student council and the secretary of the Union will speak and a musical program will be presented by alumni. This will be the final regular program of the year. On April 30 and May 7 there will be music by College organizations and special talks by members of the faculty.

One of the talks on the alumni program will deal with the plans the College authorities have for the growth and betterment of M. A. C., another will give the student viewpoint on the present status of affairs at the College, and another will deal with the Union Memorial building fund, telling in detail its condition, the progress of the building and the plans for its construction.

With the affairs for the year better organized the program for the entire radio season should be published before broadcasting begins next fall, thus giving those who have receiving sets available a chance to plan in advance on when to listen for WKAR. It works on a 280 meter wave length and programs are sent out at 8 o'clock, eastern time.

Dr. W. J. Beal's work in the interests of conservation is told in an interesting article in a recent number of a national forestry magazine by C. W. McKibbin, '11. The story is illustrated with a picture of the Pinetum, planted by Dr. Beal in 1896.

L. L. Frimodig, '17, is in charge of the freshman baseball squad. Thus far the first year men have had little opportunity to organize a team but are working out daily getting into shape. Several members of the squad are beginning to show promise of developments into college players. The schedule for the freshmen will be short this spring unless local opposition is used to a great extent.

## MUMFORD CHOSEN DEPARTMENT HEAD

Eben Mumford, for the past two years special lecturer on the extension staff, has been appointed professor of sociology to head a department of that name and will assume his new position in the fall. Mr. Mumford has made an extensive study of rural sociological problems as well as those related to urban communities.

He completed his work for an A. B. degree at Buchtel college and was granted a Ph. D. by the University of Chicago for his work in sociology. He studied for two years in Europe doing work at the universities of Berlin and Paris. He has also studied at both the New York and Chicago schools of civics and philanthropy.

He served for some time as assistant professor of economics at James Millikin university and was later at Lombard college, where he taught sociology. He came to M. A. C. in 1912 and was made state leader of county agents in 1914 where he served until 1922 when he became a special lecturer for the extension service.

Sociology has hitherto been taught under the direction of the department of economics. The need for a special department has been evident for a long time.

In recognition of their having won the championship of the sixth army corps area the following members of the rifle team have been awarded gold medals: E. C. Perrine, '24, Detroit; C. E. Ripper, '26, Wells-ville, Ohio; C. D. Miller, '24, Eaton Rapids; G. R. Schlubatis, '24, Battle Creek; C. J. Bartholomew, '26, Charlevoix; L. H. Nagler, '25, South Haven; A. W. Gardner, '25, Lansing; F. W. Moore, '24, Jackson; W. N. Plastringe, '25, Lansing.

The regular number of the Forestry annual will be omitted this year and a staff of three men will work on getting out a section of the Commencement issue of THE RECORD. This will prevent a duplication of appeals to advertisers and will reach a larger number of readers.

## Detroiters' Doings

Thursday noon luncheons of the Detroit M. A. C. club will be held at the Oriental cafe, 219 Michigan avenue, after April 24. The Cabin Chop House, where the luncheons have been held for some time past, changed its location and it was decided to make the change of eating places at the same time. Any and all M. A. C. men in Detroit are welcome Thursday noons. Just walk right upstairs to the third floor.

Due honor was done to baseball when the Detroit Intercollegiate association celebrated in the Annual Baseball Frolic at the Hotel Statler on April 26. M. A. C. men were prominent in arranging the affair and a good crowd of Aggies were on hand for the doings. The Swartz Creek band was one of the headliners of the day.

## FRESHMEN DEFEAT SOPHS ON TRACK

Trackmen of the freshman class out-pointed the sophomore entries in their annual outdoor meet on College field, April 12. Alderman took firsts in the 100-yard dash, the 220-yard dash, the broad jump and javelin events for the 1927 men, totaling twenty points. Grim, also a freshman, took first in the 440 and discus and second in the century. Ripper, for the sophomores, led the field in the mile and half mile. The victors took their honors by a 65 1-2 to 50 1-2 margin. In the 220 the yearlings made a clean sweep, Alderman, Rupp and Varblo finishing in that order, and in the 100 Alderman, Grim and Rupp took the same honors ahead of all sophomores.

Although no sensational marks were set by the contestants the work of the freshmen lends strength to the belief that the members of that class will come close to some of the existing marks under varsity competition another year. Aldermen and Grim are close to being the best sprinters now in college.

# VARSITY HOLDS MICHIGAN TO OVERTIME

University Takes Game in Tenth; Kalamazoo Wins on College Field

A pitcher who can hold the opposition to two hits is not often associated with a losing team and Gunderson of the Western State Normal nine was no exception when the teachers took issue with the varsity on College field April 18 for his followers romped away with a 6 to 1 victory. Wenner, who weathered most of the game as his opponent, went well through the first five innings and held the visitors to one run and a single hit while the home team was accumulating a like number of tallies but he released four hits in the next three innings and retired in favor of Wakefield in the ninth. The latter, making his first appearance as a varsity pitcher, allowed a hit and a run during his tenancy of the mound.

Gunderson is a left hander and in his debut on College field he had all of the stock in trade required of a first class hurler. It was no disgrace for the varsity to fall before his curves but some of the things Captain MacMillan's team did in the field were almost unforgivable. The official scorer counted four misplays for the Green and White. MacMillan and Baynes contributed two flashy bits of fielding during the contest which decorated it with interest not attaching to some of the work their assistants performed. Both robbed the visitors of clean hits and helped materially to hold down the score. Wenner, too, had a busy day defending himself and acquitted himself in a creditable manner.

Fremont, who has been unable to take part in games this spring because of scholastic difficulties, was allowed to participate and relieved Kebler in the third inning. There is no doubt but what this youth will rank high on the diamond if he can hurdle the barriers of the classroom. He has a style in catching comparable to that displayed by Bibbins when he was handling the big mitt for M. A. C. and his arm is the deadliest that has been displayed on College field in some years. He also won credit for a single which was just half

of the hits made by the home team. Wakefield succeeded Wenner in the box and his work bore earmarks of pitching skill although the Normalites managed to bring in a run while he faced them.

Coach Walker's absence was marked in the lack of coordination and individual work of the players. He returned just in time to spend one practice session with the squad before it left for Ann Arbor.

The score:

## Western State

	AB	R	H	PO	A	E

Wenner, p	1	0	0	0	2	1
Wakefield, p	1	0	0	0	2	0
	27	1	2	27	15	4

Score by innings:

W. S. N.	100	001	211	—6
M. A. C.	001	000	000	—1

The summary:

Stolen bases: Righter. Sacrifice hits: Righter, Maser, Hess, Wenner. Home runs: Johnson. Hits off Wenner, 5 in 8

innings; off Wakefield, 1 in 1 inning. Struck out: by Wenner, 4; by Wakefield, 1; by Gunderson, 14. Base on balls: off Wenner, 4; off Gunderson, 2. Wild pitch: Gunderson. Passed balls, Kiebler, 2. Umpire: Slear.

Michigan was forced to go ten innings to win from the varsity by a score of 1 to 0 on Ferry field on April 23. Wenner pitched masterful ball, allowing but seven hits and keeping those well scattered. The contest might have gone on indefinitely had not Baynes been slow on handling a grounder for the third out in the last inning. Three errors were charged against the Green and White while the victors went through the game with but one slip. Coach Fisher used three pitchers and the combination proved effective enough to keep the M. A. C. batters from starting a fruitful offensive.

On several occasions the Maize and Blue threatened to count but incipient tallies were cut off at the plate or earlier in their careers. Nine members of the home team were left on bases while but three M. A. C. base runners survived in various phases of the combat. Wenner turned back more men than did his opponents but he was more liberal in handing out bases on balls. He accepted seven chances without a mishap.

Steger, who had failed to exhibit anything of consequence previous to the final inning, drove out a long hit which sent in

the winning run. He and his immediate predecessor on the base lines failed to attempt to complete the circuit. In the fifth inning Giles singled, was sent to second on Kipke's sacrifice and was caught at the plate by Williams when Haggarty hit safely to right field.

Coach Walker saw his charges in action for the first time since the season opened. He had so far recovered from his operation for appendicitis as to allow him to watch the game from a wheel chair.

\*Batted for Jablonowski in the ninth.

Tennis courts along Grand River avenue will be left in place until June 1, or until such a time as it will be necessary to destroy them to allow for the construction of the new highway. It is planned to replace these with courts on the new athletic field south of the Red Cedar where enough space has been set aside to provide eighteen courts. Work on these must be started this year in order that they may be ready for use next season. It is probable that other features of the athletic field will be laid out before the end of the summer.

Sacrifice hits: Kipke, Steger, Beckley. Stolen bases: Kipke, 2, Bachman, Blott, Ranney. Left on bases: Michigan, 9, M. A. C., 3. Struck out: by Stryker, 1, Jablonowski, 3, Wenner, 5. Bases on balls: off Jablonowski, 1, Wenner, 6. Umpire, Green.

## CLASS NOTES

'82

H. S. Hackstaff lives in Los Angeles, California, at 1821 Crenshaw boulevard. He notes on his blue slip: "Have recently moved into a new building 40 by 140 and two stories high, which is about four times larger than the old location. New business address is 1312-14 Santa Fe avenue, Los Angeles."

'90

Edward J. Frost sends his blue slip from 904 W. Michigan avenue, Jackson, Michigan, with the following notation: "President of the Frost Gear and Forge company and a member of the board of education. Also member of the executive committee of American Gear Manufacturers association; a member of the board of directors of the chamber of commerce; and a member of the board of directors of Jackson Employers association. My son, Barry L. Frost, who had one year at M. A. C. (class of '24 M. E.) will graduate next June from the University of Michigan in architecture."

'92

The University of California has granted sabbatical leave to C. M. Conner, county agent of Tulare county, who has completed ten years work as county agent in that state. Mr. Conner will spend a portion of his leave in studying extension work in the western and central states. He will travel by automobile to a number of counties where he feels a study of the work being done would be especially valuable to himself and his associates.

'96

The following is quoted from the blue slip of R. E. Doolittle: "Chief central district, bureau of chemistry, U. S. department of agriculture, charge of enforcement of federal food and drugs act for central states. Office at 1625 Transportation building, Chicago, where all M. A. C. boys and girls are welcome. President of the Association of Official Agricultural Chemists and all spare time spent in revising the official methods of analysis of that association." Doolittle lives at 2217 Grant street, Evanston, Illinois.

'99

S. F. Edwards is the central figure in preparations for the twenty-fifth anniversary. He has sent special letters to all former members of the class urging them to take advantage of this chance to celebrate the quarter century mark since graduation.

'04

R. J. Baldwin is working on reunion plans. He is getting into touch with all Naughty-Fours. The celebration of twenty years of life out of college is taking form.

"Have changed my place of residence from Chicago to 104 Bedford street, Forty Fort, Penn-

sylvania, a suburb of Wilkes-Barre," writes George E. Martin. "Am still doing engineering work on the Huck axle which was taken over by the Sheldon Spring and Axle company."

'07

Neal C. Perry sends the following from Fresno, California: "I am still in the same line of work, teaching piano and playing for Orpheum vaudeville, road shows and road show pictures at the White theatre. My parents, Mr. and Mrs. George W. Perry, came to Fresno last October from Michigan, to spend the winter. Father was not well and passed away in his sleep February 26. As publisher of the Elk Rapids Progress father was well known throughout Michigan and was always a friend of M. A. C. Mother is well and will return to Michigan soon with father's remains."

'09

Ray Turner is working on a scheme to get the class out for a reunion on June 14. He will be assisted by all members in or near East Lansing and all who can get here in time to do part of the work. No other class this year will be just fifteen years out of college and 1909 is preparing to show its individuality.

"Have changed my address from Mayville, Michigan, to 14239 Liddesdale avenue, Detroit," says R. R. Lyon. "The old college has not lost its appeal. Am branching out into real estate."

'12

C. H. Dickinson writes of his work in Detroit as follows: "Installing eight 2980 H. P. boilers and powered fuel equipment at Trenton Channel plant of the Detroit Edison company. Three 50,000 K. W. turbo generators, voltage 120,000, 450 pounds steam pressure, 700 degrees final temperature of steam, first unit in operation 5-15-24." Dickinson lives in Detroit at 4341 Hazelwood avenue.

'14

Ove Jensen reports that he will have letters in the hands of all former members of this noted class as soon as the alumni secretary sends him the list of addresses. He is preparing a questionnaire for use in the class records which he believes will be of great historical importance in another century. Wade Weston, Mrs. R. J. Baldwin, Helen Phillee Weston, Bob Snyder, "Banty" Vinton, Pete Dendel, and numberless others will be drafted for special duty for June 14. It is generally believed that the tenth anniversary of the class coming on June 14 is an auspicious occasion.

'19

Bob Huxtable and Einar Ungren, both paying their grocery bills in Lansing, have agreed to aid the class secretaries in getting out the rest of the gang for June 14. They have also agreed to conscript enough labor from the nearby market to carry out the campaign on June 14.

MEETING OF THE  
STATE BOARD OF AGRICULTURE

## President's Office

April Sixteenth 10 o'clock

Present: President Shaw, Mrs. Stockman, Messrs. McColl, Brody, McPherson, Gowdy, Watkins and Secretary Halladay.

The minutes of the previous meeting having been in the hands of the members, were approved without reading.

A report was read of the faculty action relative to the establishment of Teacher Training courses. Motion was made by Mr. Watkins that President Shaw appoint a committee of three members of the faculty to confer with the Educational Committee of the Board, to make investigations relative to the teacher training courses and report at the next meeting of the Board. Carried.

Motion was made by Mrs. Stockman that the following resignations and appointments be accepted.

a. Resignation of Dwight C. Cavanaugh, '20, to take effect March 31. Carried.

b. Appointment of Miss Julia Brekke as Assistant Leader of Home Demonstration Agents, effective July 1. Miss Brekke to replace Miss Koch. Carried.

c. Transfer Murial Duulas, '18, Home Demonstration agent, from Allegan to Oakland county, June 1. Carried.

d. Appointment of Paul Miller, effective May 1. Mr. Miller is to replace Mr. Putnam. Carried.

e. Resignation of Mr. A. L. Watt, County Club Agent for Washtenaw, effective March 31. Carried.

On motion of Mr. Brody, the following were granted the degree of Master of Science as recommended by the Advanced Degrees Committee:

Wm. J. Sweetman, '22.

Warren J. Hoyt, '19.

Motion was made by Mr. Brody that the recommendation of the Committee on Advanced Degrees and faculty, relative to the establishment of the M. A. (Master of Arts) degree at this institution on the same basis as the M. S. degree, be accepted. Also that the Department of History and Political Science be permitted to give major courses in the graduate school beginning with the spring term, 1924. Carried.

Motion was made by Mr. Watkins that the following appointments for graduate assistants for the year 1924-25, to fill existing vacancies, be made:

Mr. George S. Schilling, half time, Dept. of Bacteriology.

Mr. F. E. Strong, half time, Department of Botany.

Mr. E. E. Watson, half time, Department of Botany.

Mr. F. H. Clark, half time, Department of Farm Crops.

Mr. R. H. Austin, half time, Department of Soils.

Mr. J. D. Romaine, half time, Department of Soils.

Mr. G. B. Schlubatis, half time, Department of Soils.

Motion carried.

Motion was made by Mrs. Stockman that a department of sociology be established to include all subjects in this branch now offered, also that Dr. Eben Mumford be appointed as head of the department in full charge, the appointment to take effect immediately. Carried.

Motion was made by Mr. McPherson that the State Board of Agriculture join the Association of Governing Boards. Carried.

Motion was made by Mr. Brody that Prof. H. S. Reed be authorized to make a trip of investigation in the interests of engineering chemistry during the week of April 21; the total expense not to exceed \$150. Carried.

Motion was made by Mr. McColl that two visiting professors from Hungary be invited to come to the Michigan Agricultural College. Carried.

## Insuring an Education

WHEN you make a thing safe and sure for the future you say that you "insure" it. The Declaration of Independence insured the freedom of the United States; the Four Power Treaty insured four countries against war in the Pacific.

An education can be insured. The institution of Life Insurance has shown many ways of saving money for a future use, such as the education of children—and more than "saving" it, insuring it, so that if the income-producer dies and the savings stop, the sum of money that had been planned for will be there to use just the same.

The father and mother who plan ahead, and who know that they will have a definite sum of money at hand when their children reach "college age" and the larger expenses begin—and that this sum is assured whether they live or die—have an inward sense of safety that cannot be taken away. Children who see the bright future of college have an added eagerness to prepare for this future.

insuring over One Billion Eight  
Hundred Million dollars in policies  
on 3,300,000 lives.

Motion was made by Mr. Brody that Director R. J. Baldwin's recommendation regarding the reorganization of the Extension Division be accepted, the recommendation being as follows:

"First: That the Division of Extension Work be recognized as coordinate with the Division of Agriculture and the Experiment Station, and placed under the Dean of Agriculture.

"Second. That ranks and titles comparable to those of the employees of other divisions of the College be given to members of the Division of Extension Work; e. g., Associate in Horticultural Extension, Assistant in Horticultural Extension, Instructor in Horticultural Extension.

"Third. That the policy of establishing within the Division of Extension Work, administrative but not subject matter departments, be recognized, including the following: Department of County Agricultural Agents, Department of Home Economics Extension, Department of Junior Extension, Department of Marketing, Department of Publications."

Carried.

On motion of Mr. Watkins, Dean Bissell and Mr. McColl were delegated to attend the Purdue University Semi-Centennial, May 1st, 2nd, and 3rd. Carried.

Motion was made by Mrs. Stockman, that Professor Ryder's recommendation relative to summer school fees, be accepted, the fees to be as follows:

Tuition for six weeks for residents of Michigan .....	\$15.00
Tuition for six weeks for non-residents of Michigan .....	22.50
Tuition for six weeks for rural teachers..	5.00

Also a fee of 50c per student to cover expenses for recreational social and convocational activities.

Carried.

Motion was made by Mr. Watkins that Mr. Phillips and Secretary Halladay be authorized to take the necessary steps for the sale or removal of the hospital buildings, the postoffice building, the Flower Pot Tea Room, the Y. M. C. A. building and the Music House, when occasion demands that such buildings be removed.

Carried.

Motion was made by Mr. Brody that the State Board of Agriculture instruct the secretary to present to the City of East Lansing a check of \$100 for the efficient services of the fire department in extinguishing the fire in the Bacteriology building. Carried.

Motion was made by Mr. McColl that Secretary Halladay be directed to requisition such funds as may be necessary from time to time for the erection of the greenhouse and the horticultural building. Also that the Secretary be authorized to sign the contract with the King Construction Company for the greenhouse as per plans and specifications presented. Carried.

Adjourned.

## Preferred Position

Old Timers in advertising well remember that the best preferred position in any small town "sheet" thirty years ago was alongside the personals.

The alumni publication is the only magazine today that offers advertising space alongside personal news notes.

These notes are all about personal friends of the readers.

So—every page is preferred position.

Forty-four alumni publications have a combined circulation of 160,000 college trained men. Advertising space may be bought individually or collectively—in any way desired. Two page sizes—only two plates necessary—group advertising rates.

The management of your alumni magazine suggests an inquiry to
