No. 14

The M. A. C. RECORD

Established 1896

Published for the alumni and former students of the Michigan Agricultural College by the M. A. C. Association.

Published weekly during the college year and monthly during July, August and September; thirty-five issues annually.

Membership in the M. A. C. association, including subscription to THE RECORD, \$2.50 per year.

Unless members request a discontinuance before expiration of their memberships it will be assumed a renewal is desired.

Checks, drafts and money orders should be made payable to the M. A. C. Association.

Entered as second class matter at the post office at East Lansing, Mich.

ROBERT J. MCCARTHY, '14, Editor.

STEERE, '23, CHOSEN RHODES SCHOLAR

Second Time in Five Years Honor Has Gone to Alumnus; Was Outstanding Campus Leader During Career at M. A. C.

Chosen as one of thirty-two men from a list of 508 applicants wishing to benefit through the provisions of the Rhodes scholarship trust, Douglas V. Steere, '23, is the second M. A. C. man given the honor and the second in five years to be chosen as the representative of the state of Michigan in this select group. C. J. Overmyer, '18, appointed in 1920 was the first Rhodes scholar sent from M. A. C. Previous appointments had all been made from the students and alumni of other institutions in the state. Overmyer attended Oriel college of Oxford university and specialized in organic chemistry receiving his Ph. D. degree in 1923.

For the past two years Steere has been a graduate student in philosophy at Harvard. During his first year he was awarded the Townsend prize of \$300 for excellence in scholarship and this year is an assistant in the department. During the summers he has been inspecting potato plots for certification in connection with the extension division of the College.

Steere was born in Harbor Beach August 31, 1901 and attended the schools there until his parents moved to Detroit. There he completed his secondary studies at the Eastern high school and was graduated in 1918. He entered M. A. C. in the fall of that year in the agricultural division. The year 1921-22 he spent as an instructor of agriculture, public speaking and science at the high school at Onaway, Michigan. His experience there included service as coach of the football team which had its most successful season under his instruction. Returning to College he completed his course with the class of 1923.

He was one of the charter members of Excalibur, honorary Campus fraternity, the first member of his class to be taken in Alpha Zeta, a member of the College

band and the Band club, a varsity debater for two years, editor of the Wolverine in 1921, member of the Dramatic club and Pi Kappa Delta. He took part in one of the pageants and was a member of a J-Hop committee. He was also a member of the Eclectic society.

Recommendations for Rhodes scholarships are made by committees in various parts of the country. The Michigan committee met at Detroit on December 13 and announced its decision immediately afterward. His competition was offered by University of Michigan men.

As yet he has not made his decision as to just what course he will follow at Oxford when he starts next fall. He expects to continue in philosophy. The course offered is over a period of three years with work leading to a doctor's degree. His summers he will probably spend in travel through Europe. The income from the scholarship is sufficient to pay the expenses of his course.

Coaches Young and Casteel will handle the track squad and have prepared a list of events which will keep the men busy through the indoor season. There will be three intra-mural meets in January including the freshman-sophomore, inter-fraternity, and inter-class contests. On February 7 the best members of the squad will be sent to the Michigan A. A. U. meet in Detroit. Ypsilanti comes to East Lansing February 21 and the following Saturday Western State Normal is to furnish the opposition. On March 13 the annual indoor track carnival will be held at the gymnasium and the Illinois relay games will draw some entries on March 7, although the latter date has not as yet been officially announced.

MUNN, '12, ATTENDS MEETINGS IN EUROPE

Recent issues of the Geneva (N. Y.) Daily Times, and the "News" which is the official news organ of the New York State Agricultural Experiment Station give accounts of a trip made through European countries during the past summer by M. T. Munn, '12, who has been connected with the New York station since graduation.

Professor Munn went to the International Seed Testing Congress at Cambridge, England, as an official observer from the United States and also as a representative of the Association of Official Seed Analysts of North America of which he is at present the president. Following the Congress an extensive trip was made through European countries including Denmark, Sweden, Germany, Holland, Belgium, France, England, and Scotland in order to study seed production and distribution problems, particularly the importation of red clover seed from those countries of Southern Europe and the seed from which is not adapted to many of the larger clover producing sections of the United States.

Munn began his studies with seeds under the late Dr. Beal whom it has been said is the father of seed testing in America. Again the Michigan Agricultural College secures additional recognition by reason of her students who are considered experts in their particular line of work and who are recognized internationally.

BOTANICAL GARDEN NAMED FOR BEAL

The following is part of an official statement on the meeting of the State Board of Agriculture, December 17, issued by the president's office.

The principal business of the Board was the preparation of the budget for the two years from next July.

C. W. McIntyre, '24, was made assistant

in the department of dairy husbandry.

Prof. A. H. Nelson is to serve for the balance of the year as secretary to the department of English.

H. C. Stinson, '16, was appointed county agricultural agent for Newaygo county.

B. B. Adams', '15, resignation as county agent, Calhoun county, was accepted.

Miriam Carpenter, '22, was appointed assistant in plant pathology.

The Board approved an additional apportionment to equip the radio station for class B service and approved plans for tri-weekly broadcasting.

The Board approved the recommendation from the department of botany that the botanical garden be given the name of "The W. J. Beal Botanical Garden."

The Board approved the plan of the faculty to allow high school students graduating at the mid-year to enter the College.

The following telegram was sent to the chairman of the dinner given in honor of Chas. W. Garfield, at Grand Rapids:

"I am instructed by the State Board of Agriculture to Extend to one of its former members, Charles W. Garfield, its hearty congratulations and very best wishes. Mr. Garfield is a distinguished graduate of the Michigan Agricultural College, distinguished not alone for personal achievement and reputation, but for unusual service to the College, to Michigan horticulture and forestry, and to agricultural education. Of still more significance is Mr. Garfield's friendliness for and helpfulness to hundreds of students and graduates of this college, many of whom owe to him the great inspiration of their lives.

KENVON L. BUTTERFIELD."

Fencing threatens to join the list of intercollegiate sports at the College. A class organized by O. M. Lebell, who is in charge of the foreign language department and who received his training while serving with the French army, has arranged a meet with a similar organization at the University of Michigan.

UNION VAUDEVILLE FARMERS' WEEK

Alumni Given Chance to See New Presentation February 5, 6, 7 at Gladmer Theater, Lansing; Variety Feature of Program.

Under the direction of Ewald Schaffer, '25, of Ionia preparations for the first annual Union Vaudeville Revue are rapidly progressing and taking shape. Although the idea of a vaudeville supplanting the customary Union Opera is an experiment, present indications point toward a very successful season for the new venture.

As there have been no past shows of this type from which to draw upon for experience and direction, many of the matters coming to the attention of the management are perplexing ones to solve, especially pertaining to correct balance of acts. However, not daunted by their obstacles, Schaffer and his staff are hard at work.

One of the principal faculty objections to Union operas, is that of the time spent by students who take part in these entertainments. This objection is largely discounted by the present system. No student is in more than one act, and no act is of more than 15 minutes duration, with the possible exception of the one-act play being put on by Theta Alpha Phi, the local chapter of the dramatics fraternity. With these short periods of entertainment for which to prepare, the time spent on working up such an act or stunt is brought down to a minimum; thus requiring but little time on the part of the students participating. As but one joint rehearsal of the entire show will be necessary, this phase of the work is also minimized.

Alumni who will be in Lansing on the week-end of February 5, 6, and 7, should not overlook the opportunity to view this innovation in college entertainment. Almost every type of performance will be presented in the balance which has been struck by the management of the revue. Music, both classical and jazz, as well as dancing, humorous acts and stunts, will be on the varied program. A redeeming feature of the enterprise is that such a diver-

sity of talent is actually being found within the student body. Many people feared that a vaudeville would be impossible here because such a show would require such a wide range of talent. But the several organizations already in existence which can be counted upon, such as the Pastime Players, the college quartette, the musicians from the music department and the actors of the dramatics societies, it has not been difficult to work up the type of program desired, using the above mentioned organizations as a nucleus for the show. To create the right flavor to the entire performance, several comic acts have been introduced.

As the Lansing presentation of the revue will be held during Farmers' Week, Thursday night will be known as Farmers' night, followed successively by College and Lansing nights. Matinees will also be given on Friday and Saturday. As the vaudeville itself will last only about two hours, a short comedy movie will be run off to properly set off the entire show. Popular prices will be charged, making it possible for every one to attend.

Net proceeds will be applied to the Union Memorial building fund.

SMITH, '96, ATLANTA BUSINESS LEADER

W. R. C. Smith, '96, has been elected president of the chamber of commerce of Atlanta, Georgia, according to an announcement in The Atlanta Journal for December 26. The Journal says:

"Mr. Smith is one of the south's most widely known publishers, being the head of more than a dozen trade journals for the south. He has always taken an active part in civic work and has headed several financial drives of importance."

VIEWS AND COMMENT

In the mails in December came a letter from Manila which contained a check for seventy-five dollars or enough to raise the donor's subscription to the Union Memorial building fund to the proportions necessary to insure him the privileges of life membership. This was a response to a general letter and was not the fruit of a special appeal. This instance and others of a similar nature leaves but little ground for the argument that any alumnus or former student should not be a subscriber because he or she happens to be now at a distance from the College which will preclude any general use of the building.

It is a well-merited and highly satisfying honor which has come to M. A. C. with the appointment of another graduate to a Rhodes scholarship. For years the College has been known for its graduates whose work in technical lines has resulted in great benefit to the advancement of science. Some few have been marked for achievements in other walks but the impression that a general education is one of the products of M. A. C. has not been impressed upon the mind of the average person with sufficient force. Such instances as this are proof positive that the instruction and leadership available at the College are of the type which measures well when placed beside that of other institutions.

It is idle talk to say that such appointments are made on proved merit alone, that they are the result of deep investigation into the qualities of large numbers of students and graduates. Such steps are impossible. But they come after the members of the appointing committee have been apprised of the character and ability of applicants and in this matter M. A. C. is fortunate in having on its faculty a man who has done much to further the chances of both appointees from M. A. C. He has

been able through close contact and observation to speak with authority on the qualifications and ability of M. A. C. men and he has not hesitated to lend his support to deserving candidates. This is but one instance of many which come to light occasionally where Dean F. S. Kedzie, '77, has unostentatiously added to the prestige of his alma mater and aided the individual to a better place in the world.

A new year brings new responsibilities and added to these are those which have remained undischarged during the previous year. The M. A. C. Association is closer to its goal of providing a Union Memorial building than it was a year ago. It is much closer but the part which remains undone is the most difficult to complete. The year of 1925 will witness the consummation of this task if the alumni of M. A. C. turn a concerted effort toward that end and only in that event.

The Chicago M. A. C. Association is leading the way for local organizations in getting into touch with subscribers in its territory and urging immediate payments on pledges. Others will undoubtedly follow the lead of that organizations. At least one association is starting the new year with a worthy task set for its members to perform. Cooperation of that sort will make the M. A. C. Association a strong, valuable unit, it will insure its aims being carried through to completion.

It has been decided by the military department of the College that the cadet units will hereafter be distinguished from those of other institutions by a green wolverine on a white oval to be worn on the left shoulder of all uniforms and to be used to mark baggage and transportation belonging to the unit. Hitherto the cadets have worn a white monogram on a green field.

"Close Beside The Winding Cedar"

More than double the number of last year have registered in the dairy department short courses.

In its first debate of the season the College debate squad will contest with Hope at Holland on January 28.

"The Green Parrot" tea room has been opened by the Alpha Phi fraternity in rooms under the new post office on Grand River avenue.

D. H. Dow, president of the Dow Chemical company at Midland, was the speaker at a meeting in the large chemistry lecture room on Wednesday, December 17.

J. F. Cox, head of the farm crops department has left the College on a five-months leave of absence during which he will tour most of the agricultural states in the interest of the Federated Seed Service. H. C. Rather, '17, in charge of farm crops extension will take Professor Cox's place as a lecturer on various Farmers' week programs, going west to South Dakota and east as far as Virginia.

Local Grange organizations of the state have been invited to take part in a community singing contest on February 4 in connection with the Farmers' week program. Prizes are provided from a fund supplied by R. E. Olds for this purpose.

Plans of the Michigan district of Kiwanis clubs include taking the College band to the national convention at Minneapolis June 21 to 28 if the necessary funds can be raised. The trip would include Chicago, Milwaukee, Minneapolis, Duluth and return to Detroit by boat.

Should the request for a chemistry building be granted by the legislature, T. Glenn Phillips, '02, landscape architect for the College, has recommended it be placed just south of the agricultural building on the plot east of the power house which has not been occupied since the removal of the old structure used as a farm mechanics laboratory.

Fruit and vegetable growers and canners of the state will cooperate in outlining the problems which can be undertaken by the College to the best advantage of the industry. A joint committee representing both producers and packers will meet at East Lansing Farmers' week to consider what can be best done by M. A. C. to aid the farmer and canner.

Zero Christmas weather with snow enough for the most exacting advocate of an "old-fashioned" yuletide kept the Campus lacking in visitors throughout the season. It also came close to causing the evacuation of the alumni office. The present Union building at 3 Faculty Row, in which the office finds quarters is heated by a furnace which usually fails to function to normal capacity when heat is most needed. Other buildings on the Campus are supplied with steam from the College plant.

D. R. HASKINS, '26,
VARSITY TACKLE
FOR TWO YEARS
CAPTAIN
OF 1925
TEAM

SHORT COURSES DRAW INCREASED NUMBERS

Short courses during the present season are offering the greatest variety of instruction and practice in the history of the college. An intensive campaign among the farmers of the state, as well as a more systematic presentation of courses, has brought about excellent results.

In addition to the regular courses offered there is now one in radio, elective for all short term students. The majority are availing themselves of this opportunity.

There has been a marked increase in students in the dairy and poultry divisions, over preceding years.

Classification of students now taking short course work is as follows:

Dairy production—10 weeks—38 students.

Dairy manufactures—8 weeks—18 students.

General agriculture—8 weeks—21 students.

Poultry—4 weeks—20 students.

Horticulture—8 weeks—10 students.

In addition to the above there are 22 first year men in the 16 weeks' course and 18 men in the second year of that course.

Since the moving of the Registrar's office to the old library building, the offices formerly occupied by the registrar are now the headquarters for the division of short courses, giving that department more space for its work.

FALL TERM LOSSES SHOWING DECREASE

Definite figures on enrollment for winter term are still lacking, but sufficient information is available to show that M. A. C. is still growing. According to Miss Yakeley, registrar, the usual winter term slump is evident, altho not as perceptible as in past years.

A decided and significant trend in courses at the College is the growing popularity of the arts course. Many students are entering this division because of the liberal and broad training which it affords.

Because of the increased number of students taking art work with the drawing department an additional instructor has been secured to take care of the overflow. The art section of this department is under the direction of Arnold G. Scheele, who has built up a strong series of courses including the best courses in display advertising. These courses are open to all students as electives and to students in the Science and Arts divisions as a major or minor.

According to Miss Yakeley there will be seven students graduated in June with the Bachelor of Arts degree.

COLLEGE WILL ASK FOR THREE BUILDINGS

Among the requests for the College which will be taken before the present session of the legislature are funds for a literary and administration building, a chemistry building and a combined armory and field house. The sums desired for these structures will not total quite so large as was the building appropriation asked at the 1923 session, the chemistry building being the only one of considerable size and costly equipment.

No public statement has been made by the State Board as to how much will be asked for any of the various activities of the College for which special funds must be provided in addition to the \$1,000,000 available from the mill tax. The College will not be quite so strongly represented in the legislature by alumni and former students as it was in the last session. Senators N. B. Horton and H. H. Whitely, both '02, and Representative A. C. MacKinnon, '95, were the only ones to be returned. There were seven in the legislature of 1923.

SENIOR AND ALUMNUS HURT IN AUTO WRECK

Leighman D. Crosby, a senior in the applied science division and G. E. (Carp) Julian, '15, suffered injuries in an automobile wreck on December 22 which proved fatal to Crosby and will result in a long period of inactivity for Julian. Crosby was driving the car when it skidded into a ditch and overturned. Julian was pinned under the machine and Crosby, although not thrown from the seat suffered internal injuries. Both men were working for the state department of agriculture and were on their way to inspect a herd of cattle near Bath when the accident occurred.

Crosby, who was 23 years old, died at the Sparrow hospital in Lansing on December 29. He was born and educated in Owosso but his parents had moved to Flint a short time before his death. He had been active in Campus affairs generally and was a member of the varsity hockey team in his freshman year. He was a member of the Eclectic society.

NEW RADIO STATION READY TO BROADCAST

In its first regular broadcasting the new College radio station sent out Governor Groesbeck's message to the legislature on January 8, on a 270 meter wave length. This was done with the permission of the inspector for the radio district before the station had been formally inspected and given the new rating which had been requested which would place it in a different class than the one under which it was operated during 1924. During the holiday season tests were made from the new station every day from three to four o'clock in the morning. In response to these tests a widely scattered number of replies were received indicating that the message had been received over a greater radius than the old station ever reached.

It is planned that regular programs will start January 12 and that WKAR will be operated three evenings each week. On Monday nights from seven to eight an agricultural program will be presented by the various departments in the agricultural division, on Wednesday nights from eight to nine entertainment will be furnished by student organizations and on Friday nights from seven to eight programs will be given by representatives of the various departments at the state capitol.

The policy pursued last year of broadcasting basketball games played at the gymnasium will be followed out and other special events will likewise be broadcast. It has been proved to the satisfaction of the authorities in charge of the station that a much larger number of people will be enabled to hear the programs sent out by the new station than could be reached by the old equipment. It is expected that in the near future more detailed information on programs will be available.

In the quarterly bulletin of the agricultural experiment station for November there is an article by V. R. Gardner, '05, professor of horticulture and Stanley Johnston, '20, superintendent of the South Haven experiment station on "Fruit Setting of the J. H. Hale Peach." H. J. Gallagher, '15, of the agricultural engineering section contributes "The Home Storage Room" and H. H. Musselman, '08, writes on "Concrete Line Posts." G. A. Brown, '07, professor of animal husbandry, urges stock raisers to utilize for feeding the grain from their corn crops and tells how it can be done when the grain has not cured properly as was the case during the past season in many sections of the state.

At the football banquet given by the chamber of commerce of South Haven, G. C. Monroe, '91, presented the members of the team with gold footballs and the reserves with silver footballs. In his address he described some of his experiences in athletics at M. A. C.

FOOTBALL SCHEDULE COMPLETED

Center and Colgate Provide Features for New Stadium; Wisconsin Closes Season at Madison; Penn State Date Changed to October 24.

As it was recently completed the 1925 football schedule includes the following games:

- September 26, Adrian at East Lansing.
- October 3, Michigan at Ann Arbor.
- October 10, Lake Forest at East Lansing.
- October 17, Center College at East Lansing.
- October 24, Penn State at State College, Pa.
- October 31, Colgate at East Lansing.
- November 7, Toledo university at East Lansing.
- November 14, Wisconsin at Madison.

Penn State was originally scheduled for November 7, but, as its request this date was changed because of a conflict on the Penn schedule.

Alumni have hailed this list as the best which has been presented for the efforts of an M. A. C. squad in years. With Center college and Colgate at East Lansing the home schedule is saved from weakness and the listing of Michigan, Penn State and Wisconsin on foreign fields brings the competition arranged up to a high class which will require that the squad be at its best throughout the fall if favorable results are to be obtained. The Michigan game may almost be included in the list of home attractions because of the ease with which the crowd goes to Ann Arbor.

Penn State has for several years been one of the outstanding teams of the east and Colgate has occupied an important place in the consideration of schedule makers. Center was, last season, champion of the southern conference and is fast regaining its former prestige in football. Five major contests make for a strong schedule and it is so arranged that the close of the season will not witness an anti-climax as it has in the past few years. With the Michigan game second on the list and Wis-

consin as a closing opponent there will be plenty of incentive for the squad throughout the fall.

Lake Forest was the only team on the 1924 schedule to score two touchdowns against the Green and White, not excepting its conference opponents. Adrian is a newcomer as is Toledo university.

HUNDREDS TAKE PART IN FOOTBALL BANQUET

High schools of the state were well represented by coaches and players at the great football feast staged by the Central Michigan M. A. C. Association on December 13 at the College gymnasium. Nearly 600 persons attended and virtually half of these were high school students from some thirty cities. Speeches, the efforts of Howard Rathier, '17, and Jimmy Hays, '11, as opposing toastmasters, boxing, wrestling, music by the Swartz Creek band and the presentation of awards for the season occupied the time of the crowd from 6:30 until close to midnight.

Before the dinner began the guests were entertained by swimming and diving exhibitions put on by the varsity teams in the big pool. "Carp" Julian, '15, was master of ceremonies and had control of the meeting throughout using his influence when the two toastmasters grew antagonistic in their arguments. L. Whitney Watkins, '93, Richard Remington, President Butterfield, Director Young and James Killoran of Lansing were the speakers. As a tribute to the all-state team selected by Remington, Julian presented each member with a medal marking his achievement. Director Young presented the awards to the members of the varsity and freshman football squads and James Killoran presented the special trophies which he gave to

members of the varsity squad who had excelled in some particular phase of the game during the 1924 season.

It was the largest and most successful of these banquets which have been sponsored by alumni living in and near Lansing. For the 1924 affair the Detroit M. A. C. club took an active part instead of expending its effort on a banquet in Detroit as has been the custom. The efforts of the two organizations were effectively joined and other local organizations aided as well as did individual alumni in various cities. The group of high school coaches present was composed largely of M. A. C. men and was a striking example of the intent to which alumni are going into the physical education end of teaching.

While the banquet was well-equipped with entertainment of the lighter sort, it was well enough balanced so that the more serious minded in attendance could not object to the features of the evening.

"Carp" Julian, '15, Earl Hotchin, '12, Glen Stewart, '17, Del Vandervoort, '19, H. A. Clark, '16, were responsible for the formulation and working out of the plans for the affair.

CHICAGO DEFEATED IN HOLIDAY GAME

In the only contests scheduled with Michigan for this season the basketball team lost to the Maize and Blue on the court in Yost fieldhouse, 26 to 10. This was the only date available according to the Ann Arbor authorities and it caught Coach Kobs' five at a disadvantageous time for the following week was the season of examinations.

Showing better basketball and closer team work Captain Nuttala lead his mates to a 27 to 19 victory over Chicago at Chicago on December 20. At no time did

All Together, Now!!!

Are you ready when the song leader gives the signal?

When the bunch sings the old songs don't just hum the tune. All of M. A. C.'s best songs, with the music, are included in an attractive booklet of convenient size.

You boosters of the Green and White need it on your pianos.

It is indispensable for branch association and club meetings.

Your copy will be mailed prepaid upon receipt of 50 cents at the alumni office. Attractive prices for group orders.

The proceeds will be applied to the Memorial Union Building Fund.

the Maroon five demonstrate the speed or skill to take command of the situation.

Northwestern turned the tables when the Green and White team went to Evanston on December 22 and took the large end of a 26 to 17 score. Inability to locate the basket was the main trouble of the M. A. C. five. Coach Kobs used eight men in an attempt to find the proper lineup to accomplish this but his efforts failed to produce results.

With the early games completed the squad was allowed to disband for a week of the holiday season and returned for an extra week of practice before classes began on January 5. Those who made the trip to Chicago and who seem to have the best chance to appear in regular games were: Nuttilla, Hackett, Mason, McMillan, Robinson, Bilkey, Hultman, Smith, Richards and Marx. During the vacation practice Cole, a sophomore who was a member of the football squad last fall proved to be another possibility for a regular position.

CLASS NOTES

'77

W. C. Latta reports that the M. A. C. members of the Purdue staff are all on the job as far as he knows.

'78

At Woodland, Michigan, Eugene Davenport is "trying to do the things that were pushed aside for 30 years."

'85

James A. Dart is an accountant, and his present address is the Francis Marion Hotel, Charleston, South Carolina.

'89

George J. Jenks is president of the Huron Milling Company at Harbor Beach. This concern manufactures starch.

'92

A. N. Bateman was recently re-elected county surveyor for Ingham county. He is also surveyor for the city of Lansing and in partnership with his son, Francis N., '22. Bateman lives at 600 S. Logan street, Lansing.

'02

Lynn R. Rudolph is located in Sydney, Australia with the United Distributors Limited.

'03

Bernard Nagelvoort, of the Towson Body company of Detroit, presented a paper on lumber problems encountered in automobile plants at a meeting of the Society of Automotive Engineers in Detroit last October. He described the methods used in lumber selection by the Ford Motor company, and for the prevention of wastes.

'05

C. A. Hach is in the engineering department of the Baker-Perkins Manufacturing corporation of Saginaw. He lives at 905 Hill street, Saginaw, W. S.

'07

Charles P. McNaughton is living in Minneapolis, Minnesota, at 2540 Aldrich avenue south.

Daniel H. Ellis reports a fairly good year in the landscape gardening business. He is located in Saginaw, and lives at 616 Owen street.

'08

Fannie Beal is assistant dean of women and an instructor in home economics at the Michigan State Normal college at Ypsilanti.

'09

Briggs L. Clark reports a new address, 670 East 40th street North, Portland, Oregon.

'10

Ray G. Crane is with the Detroit Creamery company, listed in the office as director of the laboratory. Stewart Farr '22, Laura Crissman, '26, and Russell Knight, '23, are doing laboratory work for the same concern. Crane lives at 8802 Stoepel avenue, Detroit.

H. H. Douglass is superintendent of the milk department at the Detroit Creamery company's main plant. He lives in Detroit at 3942 Commonwealth avenue.

'11

J. G. Hays divides his time into quarters, working quarter time as dairy extension specialist for the College and three quarter time secretary of the Michigan State Holstein association.

G. H. Osborne has returned to Montreal, Quebec, where he is reached at 144 Inspector street. He is general manager of the Ventilating & Blow Pipe company Ltd.

William H. Urquhart is superintendent of the American Bolt corporation. He lives at 2974 Helen avenue, Detroit, where his family numbers three, Barbara 8, Robert 6, and Susan 4.

J. DeKoning is chief engineer and superintendent of the Gallmeyer & Livingston company, machinery manufacturers, of Grand Rapids. He lives at 1625 Stoddard avenue N. E.

Benjamin C. Porter Jr., former assistant cashier of the South Grand Rapids State bank, is now assistant manager of the South Grand Rapids branch of the Grand Rapids Savings bank since the merger of the two banks. Rhode Island Reds

Newspapers in Magazine Form

Unlike anything published to-day! Alumni weeklies, monthlies and quarterlies are carrying live news items of the colleges and personal friends to those men who are doing the majority of the big jobs.

Honestly, isn't this a good time and place to register your name or your product?

We are sure you feel friendly toward the advertisers in this, your own publication.

We believe that your company will benefit from advertising in this and other alumni magazines.

Forty-four alumni publications have a combined circulation of 160,000 college trained men. Advertising space may be bought individually or collectively—in any way desired. Two page sizes—only two plates necessary—group advertising rates.

The management of your alumni magazine suggests an inquiry to

Thomas A. Edison and Charles P. Steinmetz in the Schenectady laboratories of the General Electric Company, where Dr. Steinmetz did his great work

Steinmetz

Emerson tells how the mass of men worry themselves into nameless graves, while now and then a great, unselfish soul forgets himself into immortality. One of the most inspiring influences in the life of a modern corporation is the selfless work of the scientists in the laboratories, which it provides for their research.

If you are interested to learn more about what electricity is doing, write for Reprint No. AR391 containing a complete set of these advertisements.

The spirit of Dr. Steinmetz kept his frail body alive. It clothed him with surpassing power; he tamed the lightning and discharged the first artificial thunderbolt.

Great honors came to him, yet he will be remembered not for what he received, but for what he gave. Humanity will share forever in the profit of his research. This is the reward of the scientist, this is enduring glory.
