

The M.A.C. RECORD.

Michigan Agricultural
College Association
Publishers ■ East Lansing

Vol. XXX.

Mar. 16, 1925

No. 23

The M. A. C. RECORD

Established 1896

Published for the alumni and former students of the Michigan Agricultural College by the M. A. C. Association.

Published weekly during the college year and monthly during July, August and September; thirty-five issues annually.

Membership in the M. A. C. association, including subscription to THE RECORD, \$2.50 per year.

Unless members request a discontinuance before expiration of their memberships it will be assumed a renewal is desired.

Checks, drafts and money orders should be made payable to the M. A. C. Association.

Entered as second class matter at the post office at East Lansing, Mich.

ROBERT J. McCARTHY, '14, Editor.

THE M. A. C. ASSOCIATION

3 Faculty Row, East Lansing, Mich.

OFFICERS—1924-25

Frank F. Rogers, '83, Lansing, President

Arthur C. MacKinnon, '95, Bay City, Vice-President

Luther H. Baker, '93, East Lansing, Treasurer

Robert J. McCarthy, '14, Secretary

EXECUTIVE COMMITTEE

Members elected at large

Henry T. Ross, '04, Milford, Mich., Term expires 1925

Clifford W. McKibbin, '11, East Lansing, Term expires 1926

G. V. Branch, '12, Detroit, Term expires 1927

W. K. Prudden, '78, Coronado, Calif., ex-officio

Harris E. Thomas, '85, Lansing, ex-officio

E. W. Ranney, '00, Greenville, ex-officio

MARCH 16, 1925

GUNSONS TELL OF CAPITAL TRIP

Visit to Washington for Annual Meeting of Association Came at Time of Inauguration; Visited Places of Interest and Many Alumni.

Professor Thomas Gunson and Lutie Robinson Gunson, '12, were the guests of the Washington, D. C., M. A. C. Association at its annual meeting on February 28. They present the following outline of their journey.

Two travelers from the environs of Okemos made their way to Washington, D. C., to be present at the banquet of the M. A. C. Association of that city, held the evening of February 28. It is always a pleasure to renew old friendships and that pleasure was enhanced by the number of familiar, friendly faces to be seen not only at the meeting but from the time Clarence Reed, '05, greeted us at the station on our arrival, until Roy Potts, '06, bade us good-bye as our train pulled out.

We were privileged to have as our headquarters the hospitable home of Homer Skeels, '98, where the grape hyacinths greeted us when we came and the crocuses hurried out to regale us with their freshness ere we went. From here we took our daily flittings to visit other friends and enjoy other scenes in this "city of magnificent distances."

Perhaps the red letter day was inauguration day, when we were privileged to see the president of these United States take the oath of office and deliver an address to listening thousands in view about us, and other invisible thousands all over this great land of ours. This ceremony was not less impressive because we had worshipped, with him and hundreds of others, in the church of his choice on the previous Sunday.

Through the courtesy of our local congressman, the Hon. Grant Hudson, we were privileged to visit the White House, also to watch the various interesting processes in connection with the making of stamps

and the national currency in the bureau of engraving and printing. As we inspected the capitol, the White House, the congressional library, and other public buildings, we were struck with their simplicity and beauty, and also with their dignity and fitness to purpose.

When we speak of the Lincoln memorial, we pause, for mere words cannot adequately describe the impression it makes upon one. Set on an eminence and surrounded by open spaces, it is visible for miles around. It is of pure white marble with a colonnade of 36 columns, representing the 36 states in existence at the time of Lincoln's death. At one end on the inside is carved the Gettysburg address, at the other, the second inaugural address. In the center, calm, majestic, alone, is mammoth figure of Lincoln, carved in stone. It is sacrilege here to speak other than in whispers, and as one notes the character in that rugged face, hewn from stone and remembers the burden once borne by those shoulders, one thinks how fitting the simplicity, the purity and the majesty of the structure. Here one can go as to a shrine to pay a tribute of reverence and pay a benediction.

The impressions are very similar as one visits Arlington cemetery and the grave of the unknown soldier. Space forbids detail but mention must be made of beautiful white marble amphitheater from one side of which stretch away, as far as the eye can reach, rows upon rows of white stones which mark the resting places of our soldier dead and, on the other side, the marble receptacle in which repose the remains of the unknown soldier. Here, in a commanding position, overlooking the placidly flowing Potomac and from which spot his nation's capitol looks the more im-

posing, he rests. Like his comrades sleeping nearby he gave his life, but more than that he gave his identity. None knows how he lived but all know how he died.

It was also our privilege to visit the home of Washington, at Mt. Vernon, to enjoy the impressive view from the house, to note the comfortable and artistic interiors. On the estate not far from the house is the little mausoleum containing the remains of George and Martha Washington. The site and materials were selected by Washington himself some time before his death. The box trees in the garden, arranged in conventional forms, after the Italian, doubtless were planted there many years ago under the supervision of the Washingtons.

And now a final word about the M. A. C. folks at Washington. We not only had a taste of their wondrous friendliness and hospitality but we had a banquet of them. But in addition to the ties of mutual friendship we felt an added interest because we represented the dear old institution which they all love and in which they are all interested. This interest was evidenced again and again by the questions that were put to us regarding the College and its various activities. They have at heart the best interests of the institution and stand ready to help further them in any legitimate way they can. They want to see the steady, healthy growth of a fine superstructure, built on a strong, deep, foundation of right principles. They want to see this not only because of their own tender memories of the past but it is that type of institution which they wish to be the alma mater not only of their children but of their children's children in the years to come.

After visiting the nation's capitol and being thrilled with pride and admiration at the beauty of its parks, its boulevards, and its buildings and being also proud of the history they suggest and remembering that our institution has produced and will continue to produce many of America's most useful citizens who are holding positions of

honor and responsibility all over the land, we are more proud than ever that we are Americans and that we are privileged to call the M. A. C. greenhouse, home.

FRANCISCO IS LISTED FOR AD CLUB HONOR

Don Francisco, '14, is a prominent candidate for the office of president of the Associated Advertising Clubs of the World when it convenes at Houston, Texas, in May. He has served as vice-president of that organization, president of the Pacific Coast Advertising association, president of the Advertising club of Los Angeles, and director of the Association of National Advertisers, and is a director of the National Outdoor Advertising bureau.

In the Pasadena Star-News, announcing him as a speaker at a meeting of a local club, he is accorded the following:

"Emminently fitted by training, experience, and acknowledged leadership in the field of national advertising and club activities, and as co-manager on the Pacific Coast of the Lord & Thomas advertising agency, Mr. Francisco is the logical candidate, not alone of the local clubs, but of all the Pacific Coast clubs, who, without question, will get back of the movement to have the next president come from the Pacific Coast as its due for the largest club representation from any of the seven districts comprising the world association."

Francisco's name was presented to the convention at London in 1924 in a resolution from the Pasadena club endorsing him for the presidency, the president was, however, retained in that position for another term.

C. Fuller and F. J. Gibbs, both juniors, were elected to Sem Bot and the organization marked the anniversary of Charles Darwin on February 12 with its annual banquet at which Dr. E. W. Badis, of the University of Michigan was the chief speaker.

DR. BEAL ADVOCATED CHANGE

*History of College Shows Man Who Supported Agricultural Aims of Institution
Through Early Years Saw Necessity for New Name;
Movement Began in 1884.*

It has been repeatedly asserted that the older graduates of the College are the ones opposing the proposal to change the name to Michigan State, or an amended version. This is undoubtedly true in some cases, but Dr. Beal, professor of botany for forty years, and one of the early faculty members says in his history of the College:

"In the writer's addresses to associations of alumni in Chicago, Detroit, Grand Rapids, Washington, Boston, and elsewhere, he referred to the name of Michigan Agricultural College as no longer suitable for the institution at East Lansing. It is a name that all the older conservatives cling to, but in time these will disappear, and the younger alumni will consist of persons not only of the division of agriculture, but of the division of engineering, the division of home economics, for forestry, and later for veterinary medicine, not to mention the sixth division of arts and sciences liable at any time to be established, and perhaps others to follow.

"Iowa, Pennsylvania and Mississippi have made changes in name. The name State College would do equal justice to each division at M. A. C."

He quotes from the College Speculum issue of October, 1884, before the division of engineering was established:

"A change in the name that would imply the scientific as well as the agricultural character of the school, and the use of proper and sufficient means to make the college widely known and understood as it is, and as not wholly agricultural, would, it can hardly be doubted, result in a large increase in the number of students."

Dr. Beal's history was edited in 1913.

In an issue of THE RECORD printed in April, 1901, Dr. Howard Edwards, then professor of English at M. A. C. and now president of Rhode Island State college, contributes the following:

"It is as unwise to expect a mechanical engineer to be satisfied with graduating from the Agricultural College, as to demand of an attorney-at-law that he take pride in displaying his LL.B. diploma from the . . . dental college. There is only one strong argument in favor of a retention of the present name, and that is the halo of glorious achievement that shines above the old name. It is under this name that it has fought its battles and won its victories. Fifty years of history hallow this name. The long line of honored alumni bear M. A. C. on their diplomas and have used the name all along as their rallying battle cry. Shall we leave all this and go after strange gods—cut ourselves off from the past and trust ourselves to make a new past out of the present and future?"

"The name becomes deceptive and the seriousness of the deception increases in geometrical ratio with the importance and size of the institution. We have fifty years behind us but our faces are toward the long years of the future. Shall we sacrifice the hallowed past or the unknown but flattering future? It is hard to choose but wisdom leaves us no doubt what the choice should be."

It is apparent that the anonymous editor of The Speculum deserves some of the credit for originating the movement to change the name. There was never an individual connected with the College who believed more firmly in the policy of having agriculture first on the list of studies in the curriculum of M. A. C., his history is sufficient proof that such was the case but in his enthusiasm for agriculture he saw that the College could not fulfill the vision of its founders without branching out into other fields and that after having done so it could not do justice to all of its graduates without changing its name.

VIEWS AND COMMENT

Lines of faint green are tracing the course of steam pipes about the Campus. While winter has not yet completed its farewell visit, if it lives up to previous history, there is still an air of spring which is undeniable. There is the atmosphere of surging force about to break forth, a faint hint of the days to come when nature will transform the drab colors to those of the new season.

This feeling of spring time is not restricted to nature's manifestations, it is always keenly sensed about a College. Freshmen are about to break the bonds of their initiatory period as students, seniors are looking ahead to the day in June when they will sever old ties and take on new ones. It seems that an institution of learning such as M. A. C. is forever cleaning house. Like some of the trees, branches no longer useful in its scheme of existence are dropped off and new ones added, there is perpetual growth, perpetual evidence of progress.

Just now it is doubly noticeable at the College, is this spirit of growth. There is an increase in enrollment, with promise of still further increase, a promise that in the not far distant future the institution is to drop its long out worn name and present one indicative of its nature; the oak tree will no longer appear with pine needles as a disguise of its true character. With its new divisions the College has provided itself with new sources of strength, the tree has added new vigorous roots, with this the number of branches has increased and thus its usefulness.

It is impossible not to feel optimistic in the spring, it is less possible than ever when you are surrounded by such life as a college provides which pierces the shadows of discontent with its glow of progress and frightens away the lurking goblins of failure and worry.

That an alumnus of M. A. C. should be prominently mentioned for the presidency of the Associated Advertising Clubs of the World is an occasion for congratulations to the College, but should not be one for surprise. Other alumni have held corresponding positions of importance but the point to the matter lies in the fact that Francisco is an agricultural graduate, who specialized in horticulture. It shows how far fetched is the idea that an agricultural college exists for the training of agriculturists alone, it shows how equally far-fetched is the idea that this College should focus all of its efforts toward the benefits of one particular group. Whatever credit the success of a graduate reflects upon the institution is reflected upon it alone. To the name, whatever it may be, is attached the marks of achievement of the institution it designates.

It is well for all alumni to mark down May 13 as a red letter date this year. On that evening the college radio station will broadcast a program presented by alumni for alumni especially. It will recall old times and will give an intimate glimpse of College and alumni affairs not obtainable in any other way. May 13, is the sixty-eighth anniversary of the dedication and formal opening of the agricultural college, the forebear of the present M. A. C. The date is significant for it marks the start of the present great educational system founded especially that the sons and daughters of the industrial classes might have training in the several professions and pursuits in life. It is true that the original college was not founded under such a charter but it accepted the conditions imposed upon such an institution and the benefits derived therefrom but six years later.

"Close Beside The Winding Cedar"

Lyman J. Briggs, '93, of the U. S. bureau of standards, was one of the featured speakers at the annual meeting of University of Michigan alumni at Washington, on March 10.

Taking advantage of the ruling which allows freshmen to start their college work following graduation from high school at the end of January, a score or more entered at that time.

The College is advertising for bids on the furniture and fixtures for the new horticultural building and on the construction of a high pressure steam line to the horticultural building from the power house.

Reunion days are but three months away. If you haven't made your plans for the trip it is time to do it. Wilbur Wright, '16, reports from Corsicana, Texas, that he is all set for the journey to East Lansing.

This week and next promise to be the customary full seasons of study for those who fail to heed the advice of their instructors and fall behind in class work, final examinations for the winter term start Monday.

Farm organizations are joining with the College staff in promoting a better seed week, March 16 to 20, during which the gospel of using tested seeds will be spread among the producers of crops. WKAR will assist in the program for the week by broadcasting lectures on the subject in the radio school that week.

Those alumni who will attend the meeting of the Associated Advertising Clubs of the World at Houston, Texas, in May are urged to get into touch with Wilbur Wright at Corsicana. He reports that alumni are scarce in his territory and that he wants to make sure that none evades him at the convention.

Alumni radio night will provide a program which should reach almost any alumnus in the United States.

Fair weather of the past week brought the baseball squad out onto the drill grounds for practice, the first of the year to be held in the open.

Professor John Phelan will deliver a lecture on "Cooperation of Community Social Forces" at the Rural Life conference at Kalamazoo Normal school on March 20. Dr. Eben Mumford will be chairman of the morning session of the conference.

It has been announced by the Union Title & Guaranty company, of Detroit, that Harvey D. Hahn, '04, vice-president, has been placed in charge of the legal section of its organization and will have full charge of all legal matters for the company.

An indignation meeting of upperclassmen was called last week to decide on measures to bring to the attention of the freshmen that there are certain rules for their behavior on the Campus. Resolutions were passed and summary action was promised.

Organization is under way of a group of students to act as official guides for visitors to the Campus, especially visiting teams in athletics and debating. With the completion of the Union Memorial building such an association will make its headquarters at that place and will aid in giving the stranger a welcome in accord with M. A. C. principles of hospitality.

George Dobben, Everett Bristol and Harold Zorman, all of the class of '24, have started long trip in the interests of the Veterans of Foreign Wars. They will visit all land grant colleges in the United States in the course of their journeys which will require two months. The men will take divergent routes, one going east, another south and west and another north and west.

SIGMA XI CLUB HEARS HUNGARIAN PROFESSOR

On Tuesday evening, March 10, the winter term meeting of the M. A. C. Sigma Xi club was held in the Hunt Food Shop. Following the dinner, Dean Bissell, the chairman of the organization, introduced Dr. G. Doby, professor of bio-chemistry in the University of Budapest, Hungary, who gave the address of the evening. Dr. Doby chose as his subject, "The Study of Enzymes", a subject on which he is a recognized authority. Doctor Doby, in the botany department, and Doctor Kotlan in the veterinary division, are visiting professors at M. A. C. this year under the American-Hungarian Foundation.

The M. A. C. Sigma Xi club is an organization of M. A. C. professors and instructors who are members of the national Sigma Xi organization. The object of the organization is to promote high ideals of scholarship and research in pure and applied science. With that end in view, the club plans to bring distinguished scientists to East Lansing from time to time to address the faculty and students on their specialties.

NEW SYSTEM CHECKS STUDENTS' ACTIVITIES

The point activity system, which the students voted to adopt at the election held a year ago, will go into effect at the beginning of spring term. Of course it will be impossible to hold seniors to this system this year, but from the junior class down it will be effective from the beginning of next term.

It is true that with the increase in attendance there should be a greater availability of timber for campus jobs. At other colleges where the point activity system has been attempted it has met with varied success. Some have reverted to the unsupervised situation within a year, while some have retained it as a decided success. It

seems to be a matter which is up to the individual college or university.

Under the new system no student can carry more than 20 points of activity. The first schedule of points as released by the student council is as follows:

Holcad editor, 15; Holcad business manager, 15; Wolverine editor, 15; Wolverine business manager, 15; president Union board, 15; president student council, 12; secretary-treasurer of student council, 10; Green Onion editor, 10; Green Onion business manager, 10; Green Onion art editor, 10; captain varsity teams, 10; president Pan-Hellenic council, 8; Michigan Agriculturist editor, 8; member student council, 8; president liberal arts board, 8; junior class president, 8; senior class president, 8; manager athletic teams, 8; varsity squad members, 8; assistants Holcad staff, 7; assistant Wolverine staff, 7; sophomore and freshman class officers, 7; members Union board, 7; members liberal arts board, 7; senior class treasurer, 7; junior class treasurer, 7; secretary-treasurer Pan-Hellenic council, 6; manager of band, 6; assistant manager of athletic teams, 6; freshman squad members, 6; varsity quartette, 6; president, treasurer or secretary-treasurer of honorary fraternity or society, 5; members of Green Onion staff, 5; manager glee club, 5; minor sport member, 5; member of Pan-Hellenic, 4; cheer leader, 4; assistant cheer leaders, 3; secretary-treasurer of Y. M. C. A., 3.

SET 1000 AS MARK FOR FRESHMAN CLASS

At the largest convocation of the year on March 4, students and faculty heard the plans for a freshman class of 1000 for the fall of 1925. President Butterfield, Howard Rather, '17, Earl Chapman, '25, and Elwood Mason, '25, and Director Young, discussed the proposal through which the students are to aid in the campaign and all were urged to get into touch with their home high schools during the spring vacation.

President Butterfield stressed the consideration that the College must have quality as well as quantity in the new class and recognized the handicap under which the workers would be with the name remaining M. A. C., but urged that this would require harder work. Rather gave instances of the work alumni are doing outside the lines they studied in College and Mason explained the part the students were to play. Posters have been placed in the new library bearing the names of high schools from which the College has not received lists of seniors and space is left for students to indicate that they will provide the missing lists. Following receipt of names and the compilation of a list the College will get in touch with those leaving high school and present the advantages of the institution and the extent of the curriculum. The entering class last fall of more than 700 students set a new mark for M. A. C. and it is quite generally believed that this increase will again be noted next fall since 1924 was the first year of the new liberal arts course.

STAFSETH APPOINTED EXCHANGE PROFESSOR

Dr. H. J. Stafseth, associate professor of bacteriology and specialist in the diseases of poultry has been appointed the first exchange professor under the American-Hungarian Foundation and will spend a year in study at the University of Budapest. Stafseth will travel through Europe for three months visiting veterinary colleges. He will leave the College in August.

Stafseth is a native of Norway and an accomplished linguist. Several years ago he returned to Norway for a period during which he did important work there.

Those who receive ballots in the forthcoming election of officers of the M. A. C. Association must have their dues paid through May 1, 1925.

NEW WEATHER STATION VOTED BY CONGRESS

With the approval by the U. S. senate of a bill for the erection of a new building for the weather bureau on the Campus, another landmark well known to several generations of students is doomed. The building now in use at the main entrance to the College grounds may be left in its present location and remodelled for use by the College or it may be removed. It was erected in 1910. The offices of the weather bureau will be located in a new building which will probably be located near the west entrance to the Campus on the high point now solely occupied by the hospital, formerly the president's residence.

The new building which will house the offices of the district and the equipment necessary for the forecaster and his staff will represent an expenditure of \$38,000, part of which will be borne by the state. Dewey A. Seeley, '98, has been in charge of the station since it was placed on the Campus.

Although there was no weather bureau service established by the government until 1871, for eight years previous to that a systematic set of data was collected by Dr. R. C. Kedzie who recorded each day the temperature, precipitation, atmospheric pressure, wind direction and velocity, humidity and the relative cloudiness. With but few interruptions he carried out this self-imposed task until 1902, the year of his death, reporting his observations to the Smithsonian Institute. From the time of his final illness until the new station was opened in 1910 the observations were made by the chemists of the experiment station, Floyd W. Robison, '98 and A. J. Patten.

An effort was made in 1883 by President Abbot and Dr. Kedzie to have a branch of the signal service, since renamed the weather bureau, established at the College for the benefit of the farmers, according to Dr. Beal's history of the College.

BASEBALL SCHEDULE ANNOUNCED

Michigan, Wisconsin, Minnesota, Notre Dame, High Lights of List for 1925 Season; Nucleus of Veterans of Team. Pitching Staff Needs New Strength.

With the close of the basketball season Coach Kobs is starting regular work for the varsity baseball squad. From the 1924 team he will have Captain Richards, outfield, Beckley, outfield or first base, McInnis, first base, C. Baynes, second base, Ranney, third base, Fremont, catcher, Wakefield, pitcher, Kebler, second base or catcher, and Hough, infielder.

The most important of the positions to be filled from the new squad are those on the pitching staff. There is also the matter of outfielders and a shortstop. Kebler can do acceptable work as a relief catcher when Fremont does not play. Wakefield last season was the most dependable pitcher on the squad, in fact he did most of the work. From the 1924 freshmen there will be several promising candidates. There were two fairly good outfielders and men who appeared to have the qualifications for varsity material at other positions.

Workouts for the candidates, of whom there are more than fifty, has been started in the gymnasium and will be transferred to the stock-judging pavilion as soon as that is available.

The 1925 schedule, as approved by the board in control of athletics, follows:

- April 16—Armour Institute at Chicago.
- April 17—St. Viator's at Bourbonnais, Ill.
- April 18—Wisconsin at Madison.
- April 25—Kalamazoo Normal at East Lansing.
- April 29—Michigan at Ann Arbor.
- May 4—St. Mary's College at East Lansing.
- May 9—Hope at East Lansing.
- May 14—Minnesota at East Lansing.
- May 16—Kalamazoo Normal at Kalamazoo.
- May 20—Michigan at East Lansing.

- May 23—Notre Dame at South Bend.
- May 28—St. Viator's at East Lansing.
- May 30—Butler at East Lansing.
- June 6—Notre Dame at East Lansing.

INDOOR COMPETITION SETS NEW RECORDS

In the most eventful invitational meet ever held at the College gymnasium, four records for the indoor competition at M. A. C. were eclipsed. The Green and White relay quartet of Rupp, Zimmerman, Grim, and Alderman lowered the existing mark for the 440 and 880-yard distances. In the former the sprinters covered the four laps of the tracks in :48.3, defeating Detroit City college and Central Normal school runners by a generous margin. In the half mile event the same group of runners made their goal in 1:41.2 to outdo the competitors from Kalamazoo Normal. Heath, of Michigan, put the shot 42 feet 11½ inches and Doherty, of Detroit, cleared five feet, 11 3-8 inches in the high jump for the other two records.

Entries from most of the state colleges took part in the meet. There were close to 100 athletes listed. Separate squads were entered by the M. A. C. freshmen and varsity.

The summary:

Shot put—Heath (Michigan) first, 42 ft. 11 1-2 in. (new record); Smith (M. A. C. Fresh) second, 40 ft. 1 1-2 in.; Zuber (Detroit) third 39 ft. 9 in.; Herkimer (Ypsi.) fourth, 37 ft. 3 1-4 in.

40-yard dash for M. I. A. A. colleges—Boyd (Ypsi.) first; Peel (Ypsi) second; Goeriz (Hillsdale) third; Marshall (Ypsi.) fourth. Time—:04.8 sec.

40-yard dash open—Alderman (M. A. C.) first; Snarey (Ypsi) second; Sterling (Michigan) third; Altenberg (W. S. N.) fourth. Time—:04.7 sec.

Pole vault—Seitz (Detroit) first; Smith (M. A. C. Fresh) and Seed (Ypsi) tied for second;

Goeriz (Hillsdale) and Huff (Michigan) tied for fourth. Height—11 ft. 6 in.

40-yard relay open—M. A. C. (Zimmerman, Rupp, Grim, Alderman) first Detroit City, second; Central State Normal, third; M. A. C. freshmen, fourth. Time—:48.3. (Record.)

40-yard low hurdles—Voelker, first; Lassar, second; Hulse, third; Snider, fourth. (All of Michigan.) Time—:05.2 sec.

40-yard high hurdles—Voelker (Michigan) first; Foster (Ypsi) second; Van Noppen (M. A. C.) third; Snider (Michigan) fourth. Time—:05.5 sec.

880-yard relay—M. A. C. Fresh (Humphrey, Miller, Lord, Woods) defeated Central State Normal. Time—1:47.2.

One mile relay—M. A. C. (Sheldon, Dorrance, Barnett, Farley) defeated Central State Normal. Time—4:00.9.

Two mile relay—Ypsi (Carpenter, Wetzel, Scott, Wesloski) defeated M. A. C. Fresh. Time—8:52.0.

Two mile relay—Michigan (Lickert, Freeborn, Wagner, Walsh) defeated M. A. C. Time—8:52.3.

Two mile relay open—Won by Detroit (Beyer, Hill, Griffiths, Lange.) Time—8:56.8.

300-yard dash—Alderman (M. A. C.) first; Grim (M. A. C.) second; Ramsay (Detroit) third; Bean (Michigan) fourth. Time—:35.1.

High jump—Doherty (Detroit) first; Goeriz (Hillsdale) second; Gentile (Detroit) and Kurtz (M. A. C.) tied for third. Height—5 ft. 11 3-8 in. (New carnival record).

880-yard relay—M. A. C. (Zimmerman, Rupp, Grim, Alderman) defeated Western State Normal. Time—1:41.2. (New record.)

BASKETBALL SQUAD LOSES FINAL GAMES

On its trip into Ohio the varsity basketball squad lost to both John Carroll and Oberlin, two teams which defeated the M. A. C. five on its journey to their floors in 1924. These were the last two regular games of the season for Coach Kobs' team. The final contest was against the alumni contingent headed by Larry Kurtz at the gymnasium, the evening of March 14.

All Together, Now!!!

Are you ready when the song leader gives the signal?
When the bunch sings the old songs don't just hum the tune.
All of M. A. C.'s best songs, with the music, are included in an attractive booklet of convenient size.
You boosters of the Green and White need it on your pianos.
It is indispensable for branch association and club meetings.
Your copy will be mailed prepaid upon receipt of 50 cents at the alumni office. Attractive prices for group orders.
The proceeds will be applied to the Memorial Union Building Fund.

After Every Meal

Wrigley's increases the flow of saliva and relieves that "stuffed" feeling. Clears the throat, steadies nerves and sweetens the breath. Cleans teeth too.

"Costs little - helps much"

WRIGLEY'S

Newspapers in Magazine Form

Unlike anything published today! Alumni weeklies, monthlies and quarterlies are carrying live news items of the colleges and personal friends to those men who are doing the majority of the big jobs.

Honestly, isn't this a good time and place to register your name or your product?

We are sure you feel friendly toward the advertisers in this, your own publication.

We believe that your company will benefit from advertising in this and other alumni magazines.

Forty-four alumni publications have a combined circulation of 160,000 college trained men. Advertising space may be bought individually or collectively—in any way desired. Two page sizes—only two plates necessary—group advertising rates.

The management of your alumni magazine suggests an inquiry to

Beacons of the sky

This achievement has been made possible by engineers of the illuminating Engineering Laboratories of the General Electric Company, working with officials of the Post Office Department. A startling achievement now will be a commonplace of life in the new America which you will inherit.

If you are interested to learn more about what electricity is doing, write for Reprint No. AR391 containing a complete set of these advertisements.

Between Cleveland and Rock Springs, Wyo., along the night route of the air mail service, tall beacons have been placed every twenty-five miles.

Revolving on great steel towers, General Electric searchlights, totaling 1,992,000,000 candle-power, blaze a path of light for the airplane pilot.

What the lighthouse is to the ocean navigator, these beacons are to the conquerors of the air.
