SOLOISTS AT THE MAY FESTIVAL, MAY 23.

Mme. Nina Dimitrieff
Soprano

William Clare Hall
Tenor

Marian Green
Bass

Otto Meyer
Violinist

Fred Killeen
Conductor

MAY FESTIVAL.

The tenth annual May Festival will be recorded as the most successful in the history of the institution, from the artistic point of view as well as financially. With the exception of the semi-centennial year, the attendance was larger than ever before, and due to the arrangements made with the Liberal Arts committee, the attendance of students was much larger than in previous years.

Especially pleasing was the choice of soloists, and it is difficult to determine which ones excelled, although popular opinion will undoubtedly award first places to Mr. Green and Mr. Meyer.

Mr. Green is without doubt the best baritone that has ever taken part in a May Festival at the college. His voice has a clear, ringing quality so much admired in baritones. His enunciation, breath, control, and interpretive powers were excellent. His singing of "With Joy the Impatient Husbandman" was the best the writer has ever heard.

Mr. Meyer, the violinist, was a most wonderful surprise. His technique and interpretation were beyond criticism.

His rendition of "Humoresque" in the evening was superb, and his playing of the delightful "Souvenir," by Drdlla, was exquisite. It is seldom that a soloist receives such a burst of applause as followed Mr. Meyers' playing in the evening. He was compelled to respond to three encores.

Mme. Dimitrieff was very pleasing, both in her singing and in her manner. During the past eight years we have had only one soprano that could be compared with her, that being Sybil Sammis McDermid. Mme. Dimitrieff sang in Russian, French, German, and English, but she probably excelled in the interpretation of the Russian songs.

Mr. Hall, the tenor, was also very enthusiastically received, and displayed a voice of pleasing quality which he has under perfect control. His rendering of the plaintive love songs was very beautiful.

The chorus was called upon for three numbers in the first part of the evening program, but their best work was done in "Fair Ellen." The orchestra in the evening was a decided addition, and it is hoped

that the time is not far distant when a full symphony orchestra will be an established part of the Festival.

No record of the Festival would be complete without mention of the parts taken by Mr. Killeen, Mrs. Sherrill, and Miss Freyhofer. They all deserve great credit for their success.

MEMORIAL DAY EXERCISES.

We are glad to announce that on Friday of this week an appropriate program is to be rendered at M. A. C.

The fact that Editor Nimmo, of the *Detroit Saturday Night* is to be the speaker is proof that there will be "food for thought." Mr. Nimmo has been prominent in both the political and literary world for some time, and is a man whose writings are stirring up Detroit and vicinity to better things.

The parade will also be a feature, and M. A. C.'s famous band will furnish the music for the occasion. This is a day which should mean more to us than simply a holiday, and it is hoped that each one will make an effort to be on hand. Following is the program.

9:15 a. m.—First call for parade.
9:30 a. m.—Assembly.
10:00 a. m.—Program at Armory as follows:
Music—M. A. C. Military Band.
Music—Male Quartet.
Invocation—Rev. W. S. Steensma.
Address—Hon. H. M. Nimmo.
Music—Male Quartet.

DEBATING.

A meeting was held in Secretary Brown's office Thursday evening of last week to consider the question relative to debate, and it was decided that the time had come for M. A. C. to broaden somewhat along this line of work. The increased interest recently manifested by the students in debate, called forth possibly by the splendid showing made by our debaters, has given those in authority every reason to feel gratified, and to plan for great things.

Letters have been received from both the university of Minnesota and from Iowa State asking for a triangular debate. After a general discussion of the letters, it was unanimously decided to accept the

proposition offered by these institutions, and arrangements will be made accordingly.

It was decided that some recognition of the work of the teams be made, perhaps in the form of fobs, or medal of some kind. It will mean a trip for our debaters with expenses paid, and, as a whole, should arouse an enthusiasm and interest before unheard of at old M. A. C.

This will in no way affect the present arrangement with Alma and Ypsilanti. Each college will have both an affirmative and a negative team, and while the same plan as heretofore will be carried out with these two state colleges, Iowa and Minnesota will be taken on in addition. It is believed that this plan will be of immense value to the men who interest themselves in debate, as well as a splendid thing for the college as a whole.

ADDITION TO ATHLETIC FIELD.

It is always a problem in a large institution of this kind to find recreation ground for the student body.

For instance, last Saturday morning four ball games were in operation at the same time on improvised diamonds. There were perhaps as many more students who would have joined in the sport had there been available ground space. Class games, contests between dormitory teams, literary societies and various other organizations may be arranged where space is available, and would bring hundreds into the college sports of various kinds, where at present it is limited to the few who can be accommodated on the field now available.

To make it possible for the student body to engage more generally in the various forms of outdoor physical exercise, the state board of agriculture has arranged with Mr. Woodbury for the purchase of the land lying directly west of the athletic field, and extending to the river. This plot of land contains nearly 10 acres, and will make a fine addition to the present field.

While the purchase has not yet been fully consummated, an agreement has been reached which will make the field available for use next fall term; hence, in the future everybody plays ball at M. A. C.

ALUMNI

'70.

Concerning the portrait of Dr. Cook, Henry G. Reynolds, of Pasadena, Calif., has written the following by way of suggestion to Prof. Hedrick: "It seems to me that what the alumni wish to have of Dr. Cook is a portrait of him as he was when he left M. A. C., something more than 20 years ago, rather than he is today. The picture printed recently in the M. A. C. RECORD is to my mind as satisfactory a foundation for the painter to work from as we could have. By the word 'foundation' I do not mean at all to suggest a camera enlargement to be 'touched up' by a photographer, but merely that that printed picture calls up before my mind the loved teacher of those old college days far more vividly than does a visit to the busy man of today."

'81.

From A. H. Voigt, of Los Angeles, Calif., who will attend the Triennial.

"Probably no one will travel any further than myself. Most of the boys are within reasonably close distance of the college. I shall plan my trip to be there on June 25 without fail, and I sincerely hope to meet many of my old classmates, as well as college mates of the past. I am sure that every one will feel repaid for any sacrifice necessary to be made in order to attend." [If Mr. Voigt considers the Triennial of sufficient importance to make the trip from Los Angeles, there is reason to believe that there will be a good representation of the class of '81, for his mates won't surely be outdone.]

'88.

Under the direction of Dr. N. S. Mayo, of Blacksburg, Va., there has been issued a directory of Virginia breeders of pure bred live stock, and in addition names the American Record Associations. The directory is issued with the hope that it will be of such practical value that it will stimulate an interest in better live stock in the "Old Dominion."

'06.

H. H. Barnett, of Pontiac, has recently been awarded patent papers by the department at Washington on an ingenious mechanism designed to hold a door in any position desired. It is known as the Barnett patent door holder, and is made in two styles. It can be used in connection with the hinges, or placed between the hinges on any door. The *Patent News*, Washington, has selected this device as one of the most meritorious patents granted last month, and will give publicity of same through its columns. Mr. Barnett has not as yet disposed of the patent, but has already had several offers.

A baby daughter was born to Mr. and Mrs. Barnett on March 31.

PROF. FRENCH REMAINS AT M. A. C.

Although a very flattering offer came to Prof. French recently to accept the presidency of the New Mexico Agricultural College, we are glad to say he has declined same, and will be one among us next year. The *Journal* has the following to say editorially concerning the professor and his work:

The state needs every educator of Prof. French's ability. In the past we have seen many of our best trained men in the state's educational institutions leave because other states recognized their ability and offered them a higher return for their services. This policy has been recognized as a bad one but unfortunately it cannot be changed immediately, for the needs of our institutions of learning are always in advance of the appropriations allowed.

That Prof. French remained of his own volition when he might have bettered his condition by accepting the new offer entitles him to public gratitude.

PORTRAIT FUND.

Grateful acknowledgment is hereby made by the Alumni Executive Committee to the following contributors to the Beal and Cook Portrait Fund:

Irving Gingrich, E. S. Good, U. P. Hedrick, H. R. Parish, P. H. Felker, A. B. Cordley, G. C. Davis, Geo. W. Davis, J. W. Rigerink, W. J. Myers, William F. Hoyt, J. G. France, C. C. Georgeson, C. F. Austin, L. H. Van Wormer, H. E. Emmons, Geo. A. Waterman, H. E. Van Norman, Paul Thayer, Miss Anna Angell.

EUNOMIAN PICNIC.

One hundred and fifty Eunomians and friends boarded the special cars Saturday morning for their annual picnic at Pine Lake. Boat rides were the feature before dinner, with a ball game between the boys and girls with the latter victors. At twelve o'clock a sumptuous dinner was served under the direction of Sam Hartt, every one having the chance to get a good square meal. Dancing and other amusements were the order of the afternoon and evening, the picnickers returning at eight o'clock, a tired but happy bunch, all voting the Eunomians the best of entertainers.

Patrons were Prof. and Mrs. V. T. Wilson, Mrs. T. W. Martin, of Saginaw, and Mr. and Mrs. H. E. Dennison.

DAIRY BUILDING (NOW UNDER CONSTRUCTION).

THE NEW DAIRY BUILDING.

The above cut will give our readers an idea of how our new dairy building, now under construction will look. The foundation work is practically completed, and the work will be hurried along as rapidly as possible. It is expected to have the building ready for occupancy at the beginning of the school year next fall, at which time the present dairy building will be turned over to the department of forestry.

We take the liberty to publish again something of a description of this, the only new building for M. A. C. this season.

The new building is located upon the rise of ground north and across the road from the "farm house," and faces the south. It is 121 feet long by 77 feet wide, and consists of a sub-basement, first and second floors. The sub-basement is for the accommodation of the ventilating flues, steam, water and sewer pipes, and will be but about four feet high.

The first floor will contain, on the right hand side of the broad corridor, a small sales room where the various products of the dairy are retailed, and back of this a large washroom for the use of the employees; next the market milk room, about 30 feet square. Here will be demonstrated the best methods of handling and caring for market milk. Beyond this, and between it and the butter manufacturing room, will be the cold storage plant, with special apartment for winter butter.

The "butter room" is substantially 30x50 feet, and will provide ample space for demonstrating modern creamery practice, with all the necessary apparatus and machinery. On the left side of the corridor, at the front, are the offices of those in charge of the manufacturing end of the dairy work, and beyond these is the "cheese room," 30 x 30, with a small cheese curing room adjacent. At the farther end, on the same side, is the "farm separator" room, about 30 x 36, in which instruction is given in home dairy methods, while between the latter and the cheese room is a rather commodious storage room for dairy supplies.

The main corridor contains large plate glass windows looking into the various rooms, and permitting visitors to watch operations and see the products without entering.

On the second floor will be a large classroom, extending entirely across the building, and about 38 feet wide. Beyond this, on either side of the hall, are large "testing laboratories" for the use of students, with a small

classroom adjacent to each. Large sky lights, in addition to the side windows, furnish the laboratories with abundant light, while glass partitions between these and the hall give the same effect as on the first floor.

The building will be of reinforced concrete construction, with the most modern system of heating and ventilating, and the floors will be of the best cement type. It will be a dairy plant of which the college and the state may be proud.

Y. M. C. A.

The Thursday night meeting was not as well attended as usual. However, it was not the fault of those who were there, and the inspiration made up for the lack in numbers. Mr. Hengst did very well at answering the question "Do we ever stop to think?" Plans were discussed for a series of Lake Geneva meetings, to be held during the remainder of the term. Now that more satisfactory terms with those who wish to go have been made, there is much more enthusiasm shown; so without any doubt M. A. C. will be well represented this year. Talk it up and think it over seriously. It is one of your biggest opportunities of the year.

Sunday night at the union meeting, Mr. R. W. Cooper, of Lansing, spoke. He is one of M. A. C.'s loyal supporters, and his talk was well worth your hearing. Get the habit of attending these meetings; it is a lost opportunity if you don't.

"Y" CABINET FEEDS.

Last Wednesday evening the cabinet held their weekly meeting at the home of Mr. and Mrs. B. B. Johnson, in East Lansing. Both usual and unusual business was discussed, and Mr. Johnson decided that we are as much awake as any association in the state. Each week the roll call shows every man present, or a good excuse for his absence. We don't always go with as good appetites as at that particular time, but there's a reason. After the business had been attended to, a genuine "feed" was enjoyed. Even Mains couldn't keep from smiling. Thanks to Mr. and Mrs. Johnson.

Just bear in mind that June 25 is the date of what promises to be the biggest and best triennial alumni reunion ever held at M. A. C.

BASE BALL.

Home Team Wins 2 of 3 Games Played.

Two out of the three games played on the Ohio trip were credited to Coach Macklin and his team of ball tossers. Winning from Western Reserve and Buchtel, and losing to Ohio Northern in a close game, the team put up three of the best games played this year.

The Reserve team was out for revenge, but two defeats, one in base ball and the other in track, have been given this season by M. A. C. Blake Miller, who was taken along as extra pitcher, was started in the game, and pitched some airtight ball until the fifth, when a sore arm compelled his being taken from the game. Lefever was sent to the mound, and pitched his same style of excellent ball, having Reserve at his mercy. The end of the ninth saw the game tied, neither side being able to score. Trowbridge, coming to bat in the tenth, got his usual single, and, stealing second, was scored by a hit from Bibbins, winning the game.

OHIO NORTHERN.

Ohio Northern was the next team met at Ada, Ohio. Here M. A. C. found a tartar of a pitcher in the form of Mills, who only allowed two hits, while Peterson, for M. A. C., held Northern to six hits. Mills, Northern's pitcher, joined the Canton, Ohio, team on Saturday to play professional ball. A rain-soaked field was a disadvantage to both teams. Both hits by M. A. C. were long drives, and hard to field on account of the wetness of the grounds. Peterson pitched good ball, holding Ohio to well scattered hits.

ABOUT THE CAMPUS

M. C. Greenleaf, '11, was among
recent college visitors.

In a quiet game last Saturday, on
the home field, the Reserves won
from the Flint nines by a score of
9 to 6.

E. B. Baker, '15, was married re-
cently to Miss Doris Olmsted, of
Jackson, and after a short trip will
be at home on Seymour Ave., Jack-
son.

Prof. and Mrs. Ryder entertained
at dinner Thursday evening of last
week in honor of Mrs. T. C. Blais-
dell, who was the guest of Pres.
and Mrs. Snyder Friday. Eleven
guests were present.

E. G. Fischer, former instructor
in German at M. A. C., writes that
he will be unable to return next
year, as his assignment at Berlin
will detain him until October at
least.

Dr. H. VonSuchtelin, of the Bac-
teriological department, has accept-
ed a position for the coming year
with Dr. Marshall, at Amherst,
Mass. Dr. VonSuchtelin has been
in charge of the soil bacteriology at
M. A. C. the past year.

Instructor Arao Itano, for the
past year connected with our bac-
teriological department, has decided
to go to Amherst the coming year,
where he will hold a similar posi-
tion. Mr. Itano is a graduate of
the class 1911, following which he
spent one year with Mr. Patten, as
assistant in the experiment station,
department of chemistry.

Mrs. J. J. Myers has so far recov-
ered from her recent operation as to
be able to return to her home in
Howard Terrace.

Remember the big interscholastic
mentioned elsewhere. Let us make
this day one long to be remembered
by our high school visitors.

Following the evening concert of
the May Festival, Miss Freyhofer
gave a very enjoyable party at her
home on Evergreen Ave., in honor
of the artists who were here.

L. L. Jones, '12, in charge of the
poultry work in Georgia, is getting
along fine. They are selling spring
chickens, and, on account of lack of
room, many day-old chicks are also
being disposed of.

The Idlers' Club served a de-
lightful dinner, Friday, in the main
dining hall, following the afternoon
concert of the May Festival. Some
of the artists were guests at this
dinner, together with a number of
visitors who were here to enjoy the
festival. Dogwood and spring
flowers were the decorations.

Miss Bertha E. Thompson, of
the department of botany, expects
to spend most of the summer at
Marine Biological Laboratory, at
Woods Hole, Mass. This is one of
the most noted institutions of its
kind in the world, standing second
only to one of a similar nature at
Naples, Italy. The work done at
Woods Hole is accorded full credit
for graduate work in any of the
large universities of this country.

In spite of the fact that the
weather as M. A. C. is cold and
dreary, the campus is taking on its
most beautiful hues.

Mme. Dimitrieff was a guest at
the Women's Building during her
stay at M. A. C., and proved her-
self a most charming woman.

The editor recently called at the
home of H. N. Hornbeck, '04, the
efficient and popular teacher of Biol-
ogy in the new Union School.

O. J. Dean, '03, was a college
visitor a day or two the past week.
Mr. Dean is president of O. J.
Dean & Co., Chicago, specialists
in steel bars and fabrics, reinforce-
ment of concrete. Mr. and Mrs.
Dean plan to be here for the Tri-
ennial.

Mr. Vaclav Niemetz, horticultur-
alist of the experiment station in
Kharkov, Russia, was a visitor at
the college Thursday and Friday.
He devoted the larger share of his
time to the horticultural department,
but he also spent considerable time
in the botany and entomology de-
partments. He has been in this
country for six months investigat-
ing horticultural conditions, and ex-
pects to return to Russia in about
two months. He left Lansing Fri-
day evening for Canadian points,
going thence to the Geneva experi-
ment station at Cornell University,
in New York, and to Washington,
D. C. He expressed himself as
very much interested in the work
of this college, and praised its horti-
cultural work highly.

AN APPEAL TO 1911.

Dear Classmate:

The Big Triennial Reunion of our
alma mater takes place on June 25.
The program should be in your
hands by this time. It's going to
be the best ever. "Uncle Frank"
and Prof. Hedrick say so, and
they've seen a lot of 'em.

Many classes are planning to
have their entire membership pres-
ent! *What is the class of 1911
going to do?*

As students, we had a reputation
for spirit and enthusiasm. Is there
any of it left?

How would a 1911 supper and a
regular '11 class meeting (you know
the kind) on the evening of June
25th appeal to you?

Of course you'd like to see our
class well represented at this reun-
ion, but *how about your own good
self?*

Will you be with us? No faint-
hearted wishing, but right-down,
sure-enough, cross-your-thorax, hon-
est—will you be here? Will it be
safe for us to figure on your fifty
cents for the supper?

Anyway, prove to us that you
are still a "live one" by dropping
us a card or a letter. If you just
can't come—why, we'll drop it;
but, *can't* is a mighty uncommon
word for anyone who helped upset
the precedent that you did as a
Nineteen 'eleven. Come on
along!

Sincerely your classmate,
E. C. LINDEMANN.

BASE BALL.

(Continued from page 2.)

the Buckeyes at his mercy, only allowing three hits in the seven innings that he pitched. Le Fever replaced Miller in the seventh. Eight hits were gleaned by M. A. C., with every one running wild on the bases. Griggs had a good session at the bat, getting three hits out of three times up. Both teams played rather ragged ball, as numerous errors were chalked up to both sides. Bibbins and Mogge featured the day with some good fielding.

HORT. CLUB.

At the meeting of the Hort. Club last Tuesday evening, the hour was taken up with thesis talks by the seniors. Some very interesting facts were obtained, and the club was given an idea of the field covered and the requirements of a horticultural thesis.

Hutchins and Hendrickson, in their work on the subject of "The Careful Handling of Fruits," showed that with very careful handling even the most delicate fruits can be kept through the winter and spring, while the more hardy fruits can be kept a longer period.

Carey, whose subject was "A Fruit Survey of the Country,"

spoke of some interesting facts which he had gathered regarding the prices of fruits in different sections of the country, and the routes in use to the principal markets of the country.

The senior landscapers elected class work in the place of thesis work. Davidson told of the benefits they had derived from a study of the "Replanting of Cities", and explained a little about the trip they are to take soon to some of the principal middle western cities.

Loree, working on "The Germination of Fruit Seeds," at first encountered several difficulties, but his results, although as yet a little indefinite, seemed to show that a cooler rather than a warmer temperature was favorable to germination.

Owing to his absence from school, due to his field work in pathology, McClintock has been delayed in the consideration of "The Etherizing of Plants," but hopes to soon finish the work. Pailthorpe is working on the "Selection of Cions for Apple Trees," which he is considering from several view points, and hopes to find something of practical value to the orchardist. Baker and Riley, working on the subject "Alcoholic and Acetic Fermentation of Cider from Apples," found some interesting facts, one of which is that some apples show an alcohol percentage of nine per cent. Schuyler, working on the subject, "The Effect of Superheated Soil Upon Plant Growth," found that heat hastened ripening and maturing, it being shown that by heating the soil tomatoes could be produced two weeks earlier in the greenhouse than they are now produced. The Olney brothers are considering the "Peach," and are making a comprehensive history and bud key of the peach as it is now grown.

Pres. Miners then called upon Prof. Eustace, who explained the position of the faculty. It is their desire to make the subject of horticulture as interesting as possible, yet to make the course instructive and beneficial. "An appreciative attitude of the student," said he, "makes the work a pleasure."

'76.

That was a big cylinder engine that was running the college when I knew it in the seventies—Abbot, Kedzie, Fairchild, Miles, Beal and Cook, and there is not a car made today that will carry a load up as steep a grade as that one, on the high, and I would like to know that all their pictures are owned and exhibited at the college. Cannot you take up the matter, and complete the job? I am ready for a contribution any time.

DON: H. KEDZIE, '76.

A new drinking fountain has been installed in the Library Building, much to the gratification of those who labor in that building.

EVERY reader of the M. A. C. Record is cordially invited to visit our store, use our rest room, telephone, and our mail order department by writing for samples or ordering merchandise; money refunded whenever you are not pleased.

'74.

George W. Brewer, Grand Portage, Minn., writes that he hopes to be at M. A. C. next month, and that he favors the appointment of a permanent alumni secretary. He also says he favors that mill tax for the maintenance of the college, and he pays a tax on Michigan property.

Attention of Students

If you are looking for congenial and remunerative occupation during summer, write—

The General Appliance Factory, Incorporated, Marinette, Wisconsin, for particulars.
