NO. 33

NEW DRAWING DEPARTMENT HEAD ELECTED.

Mr. R. K. Steward, who has been acting head of the Department of General Engineering Drawing at the University of Illinois since 1912, has just been elected to the position of professor of Drawing and Design at M. A. C., in the place of Prof. V. T. Wilson, who resigned early in the present year.

A slight change has been announced for the work of this department for the next college year, when Prof. Steward will take charge, in that the machine design courses, formerly under the mechanical engineering department, will be administered by the drawing department.

Prof. Steward graduated from the University of Maine in 1908, taking his professional degree in civil engineering at that place in 1911. Following his graduation he taught there for two years and then spent two years with the U. S. Reclamation Service. Since this time he has been at the University of Illinois.

MICHIGAN MILK PRODUCERS ORGANIZE AT M. A. C.

The convention of upwards of 500 Michigan milk producers, held at M. A. C. last Tuesday, was, without a doubt, the largest and most enthusiastic group of farmers ever assembled at the College for one specific purpose.

The meeting was called by the Livingston County Milk Producers Association, and the invitation was responded to by many from the surrounding country and delegates from all over the state. Space for parking autos was fairly at a premium.

The real purpose of the meeting was to form the Michigan Milk Producers Association and to organize the producers to such a point that they will have something to say about the price they are to receive for their milk, rather than be dictated to by some outside milk corporation as is now alleged. Rodney B. Swift, president of the Northern Illinois Milk Producers' Association, was the principal speaker. Mr. Swift engineered the recent "milk strike" in Chicago which created such

widespread interest, and he had much to say about the producers getting less for their milk than the cost of production. Statistics on file at the College bear out many of Mr. Swift's statements. Other speakers on the program were Prof. A. C. Anderson, head of the college dairy department, James N. McBride, state market director; N. P. Hull of Dimondale; and G. P. Horton, former master of the State Grange.

Officers of the association were elected as follows: President, N. P. Hull, Dimondale; vice-president, R. C. Reed, Howell; secretary-treasurer, Silas Munsell, Howell; members of the board of directors, Silas Munsell; A. R. Harrington, Grand Rapids; John C. Near, Flat Rock; James Kerr, Birch Run; A. L. Chandler, Owosso; John Hull, Dimondale; Milo Godfrey, Napoleon.

It is the plan of this newly organized association to be the mother of local associations thruout the state, and, thru directors elected by these, the whole market situation will be held in hand. The association also plans to carry on an educational campaign which shall present the figures for cost of production to the people, and also to show them the value of milk as compared with other foods.

SOME OF THOSE WHO WILL BE BACK.

HELP US GROW!

Geo. W. Haigh, '61; Richard Haigh, '69; Henry A. Haigh, '74; C. L. Bemis, '74; C. J. Strang, '78; W. K. Prudden, '78; Frank A. Gulley, '80; J. C. Stafford, '88; O. B. Hall, '93; M. G. Kaïns, '95; H. M. A. C. MAY RUN FOUR TERMS.

A letter sent out by President Kedzie last week to the members of the teaching staff paves the way for a four-term schedule at M. A. C. The letter follows:

TO THE TEACHING FORCE OF M. A. C.

The coming summer will mark the completion of our third experiment of holding a summer session. It has been suggested by others, and I have felt like accepting the suggestion, that this College is the best adapted to continuing work during the summer of any similar institution located in the United States.

In order to render the work of this College more efficient and far reaching it seems likely that we shall discontinue after this year what is called the Summer Session and replace it by a four term of perhaps eight or ten weeks' duration in which special emphasis will be laid upon instruction in the elementary sciences and in addition, the work of technical instruction which was contemplated in the founding of the college.

In order to accomplish what I have in mind, it may be necessary to ask some of the teaching force to arrange for taking their vacation during some other portion of the year than the summer in order that the work of this fourth term may be provided for.

I want it thoroughly understood that whatever changes in your yearly schedule may be found necessary to be made, you will be given due notice and that we shall keep in mind the absolute necessity of your having opportunity during the year for doing advanced work in your profession.

Very truly yours,

FRANK S. KEDZIE.

'11.

Edward W. Steck, e. and Miss Clarissa Scott of Brighton, Mich., were married at the bride's home last Tuesday. After a brief visit with friends and relatives in East Lansing and southern Michigan, the young couple left for their home in Port Arthur, Texas, where Steck is working for the Gulf Refining Co.

THE LAST CHANCE.

The alumni directory is now being printed. Only for those who have recently moved or changed their occupation does this have interest. If this affects YOU, drop us a card at once, giving us the change, so that the data following your name may be correct. When the directory is out a copy will be mailed free of charge to every graduate.

* * *

EVERYBODY'S OPPORTUNITY.

President Kedzie is counting on the support of the former students to keep the attendance at M. A. C. on the gain. Every graduate has at some time or other a chance to advise with a prospective student. In view of this the requirements for entrance, as they appear in the college catalog just issued, are here given. We hold it no less than a duty for every graduate to have these requirements fairly well in mind.

Graduates of approved high schools, who meet the entrance requirements, are admitted to our four-year courses without examination. Such applicants must present 15 units for admission, a unit meaning a subject pursued thru-out a school year, with not less than

four recitation periods per week. For admission to the Engineering Courses, seven of these units are required as follows: English, three units; algebra, one and one-half units; geometry, one and one-half units; physics, one unit. For the other courses—Agricultural, Home Economics, Forestry, Veterinary Science—five units are required as follows: English, three units; algebra, one unit; geometry, one unit. To complete the fifteen units, credits may be selected from the following: English, one additional unit; algebra, one-half unit; solid geometry, one-half unit; trigonometry, one-half unit; history, one, two, three or four units; Latin, two, three or four units; Greek same; French, Spanish, German, same; chemistry, one unit; physics, one unit; botany, one unit; physiography, one unit; free-hand drawing, one unit; commercial work, one or two units; manual training, domestic science, and domestic art, one or two units; agriculture, one, two or three units.

For applicants who have not graduated from an approved high school, an examination must be taken. For those who would take engineering the examinations will be in English, plane and solid geometry, algebra and physics. For all other courses candidates will be examined only in English, algebra and plane geometry.

* * *

THAT LANSING ROAD.

Graduates of M. A. C. for many years must have a distinct picture in their mind of the road from Lansing to the College. It has been torn up and repaired several times, and yet with all this has never been in first class condition. Consequently the announcement made last week that a good, substantial road is to be built will be received with interest.

In this announcement the generosity and public spiritedness of an alumnus crops out again. Not content with giving Lansing the finest auditorium in the state, W. K. Prudden, '78, said some time ago that he would donate \$10,000 a mile for the road if the abutting property owners would put up the rest. For a long time it looked as if this 'rest' would not be forthcoming but the recent announcement assures that the other \$2,000 is available.

The type of road to be built is still undecided. Whether it will be brick on cement foundation, plain cement, or asphalt is not of great importance to us. We are very glad to know that the road will be put in shape so that it will be passable at all times and will really encourage auto visitors at M. A. C.

* * *

Frank Somner, Michigan Aggie football coach, spent last Saturday at M. A. C. looking over his material and getting acquainted with conditions. He said that the boys and the College looked good to him.

ADVANCES IN TEACHING FORCE.

The contracts for the teaching staff at M. A. C., which were sent out last week, carried many advances in title. Associate Professor Polson was made Professor of Mechanical Engineering. The following assistant professors were made associate professors, thus giving them a voice in the Faculty: C. H. Burgess, poultry husbandry; F. H. Sanford, Forestry; C. A. Melick, civil engineering; Chace Newman, drawing; C. W. Chapman, physics; Mrs. Lillian Peppard, domestic art.

The following instructors were made assistant professors: Irving Gilson, forestry; Thomas Gunson, horticulture; C. M. Cade, civil engineering; L. H. Cooledge, bacteriology; W. P. Wood, chemistry; A. C. Conger, zoology; C. L. Grover, agricultural education.

The following workers in the Experiment Station were advanced from research assistant to research associate: Frank A. Spragg, crops; G. H. Coons, plant pathology; R. P. Hibbard, plant physiology; C. S. Robinson, chemistry; G. J. Bouyoucos, soils.

M. A. C. PEOPLE IN SCHE-NECTADY.

Editor of the M. A. C. RECORD:

Characteristic of all M. A. C. people I enjoy reading of the accomplishments of those that I knew and with whom I associated while at college. Although there are but a small number of us located in this section, I feel safe in saying that the individual M. A. C. spirit is still as strong as though there were a larger number.

I believe there are some classmates or friends scattered through the country that would appreciate a line in the record telling what each of us is doing. We are all connected with the General Electric Company with the exception of Miss Steele, '98, who is teaching in one of our city schools.

Mr. L. C. Brooks, '92, having shown his marked ability to handle men and produce results now holds a very influential position in the Industrial Control Dept. Mr. Hagadorn, '98, is the civil engineer at the plant. Mr. Geo. Strobel, '02, is now chief draftsman of the Direct Current Motor Dept. Mr. Friend Kierstead, '09, although not now residing in Schnectady is an engineer at the Pittsfield works. Mr. Russell Warner '12, was recently transferred from the Testing Dept. to the District Office at Washington, D. C. Mr. S. M. Dean '14, and Mrs. Dean (Frances Hurd) also with the same class, are our latest arrivals. Mr. Dean is taking the student testing course. As for myself, I am working with Mr. Brooks.

The announcement in a recent is-

sue of the RECORD of the appointment of Dr. Kedzie as permanent president, also of the support which he is receiving, was a source of great general satisfaction. The prospects for the college certainly look very promising, being under the guidance of a man who is so thoroughly known especially by the alumni and one who has had the interest of the college at heart for several years.

All attention has been directed toward the rebuilding of the Engineering Building and shops as it naturally should be, as they are of primary importance, and we are all, most interested in them but as a matter of information I would like to ask what is being done concerning the new Gym. Is it being built as planned before the burning of the Engineering Buildings?

Mrs. Clark and I will be pleased to have any one from M. A. C. stop at 139 Division street, Schnecktady, when in this vicinity.

B. L. CLARK, '09.

AN APPRECIATION FROM ONE OF THE EARLY STUDENTS.

Boston Building, Denver., Colo.
May 6th, 1916.

My Dear Mr. President:—

I have just received a copy of the M. A. C. Record announcing your election to the presidency of the Michigan Agricultural College. This is an occasion where both yourself and the college may be felicitated. I extend you my hearty wish for many years of useful service to this great institution.

I am glad I had the privilege of attending the college for three years. It is true there was little choice with me for I did not have means sufficient to attend any other school. Looking back over the years in the light of experience, and considering the fact that I chose the legal profession, I do not see how I could have made a better choice even if I had been possessed of financial means. My only regret is that my lack of funds prevented my being graduated.

There were big men in the faculty about the time of the centennial year and your father measured up with the best. May you enthuse the students of today as Dr. Abbot did the students of my day. What an inspiration he was. His conduct of chapel exercises made the place seem hallowed. What a sturdy, splendid character your father was. He likewise was an inspiration to the students.

Owing to my residence in Colorado I have been unable to do much service to the M. A. C., though once a member of the Michigan legislature I was in a position to render her some service. I have tried to fulfill my obligation to Michigan by assisting wher-

ever possible the Agricultural College of Colorado. I have helped in getting it appropriations, and some years ago I delivered the Commencement Address.

With my very best wishes,

CASS E. HERRINGTON (with '79.)
MR. F. S. KEDZIE,
Pres. Michigan Agricultural College,
East Lansing, Mich.

Cass E. Herrington and his brother Fred Herrington, '84, have been for years chief counsel for the Colorado Fuel and Iron Company.

M. A. C. WINS FROM NI- AGARA, 4—3

The game with Niagara University on College Field last Tuesday came as near being a 'vodeville' production as any ever staged. With a green umpire substituted for the regular one, all the varieties of errors, delays, and general mixups known to the game, the affair would do justice to a comic supplement.

Niagara started the game with two runs in the first frame, the tallies coming from an error by Fick, and two two-base hits off DeMond. This latter usually has them eating out of his hand but the Falls' boys got his measure right at the first. In the fifth inning DeMond was taken out after Hartery had connected with a three-bagger. Springer was sent in to finish but proved unequal to the task as he only pitched five balls, and on one of these he fell flat on his face in the pitcher's box. Brown was sent in to take up the loose ends and acquitted himself in fine style, by striking out nine men, allowing three hits and no earned runs in four and two-thirds innings.

The score hardly shows the comparative strength of the two teams. M. A. C. got but three hits off Mangen, and no earned runs. Niagara got seven hits, no earned runs. The latter made five errors, M. A. C. four.

JUST COULDN'T RESIST.

Lawrence, Michigan.

Dear Editor:—

That recent invitation in the RECORD is almost irresistible. O, for some "stuff" and a "turkey." If they can be produced or borrowed myself and wife, or daughter will be on hand at the Reunion.

Here's hoping,

J. C. STAFFORD, '88.

The A-theon society gave a dancing party in the Agricultural building last Friday night. The Lyric orchestra played the program and patrons were Mr. and Mrs. Cory and Mr. and Mrs. Kiefer.

AGGIES LOSE TO MICHIGAN 5 TO 3.

In one of the longest and most ragged games of baseball ever played on the College field, the University of Michigan defeated M. A. C. Saturday, 5 to 3. And the use of superlatives must be extended to the hitting department for the Ann Arbor boys found Brown and DeMond for 10 hits while the Aggies got nine off Miller and Roberts.

The game was a tie until the ninth inning when DeMond weakened, allowing three hits and two runs. Michigan started the scoring in the fifth inning with one run, and then M. A. C. came back in the sixth and put three men across. The record-breaking crowd breathed easier for a time. Then in the seventh, thru errors and passes, Brown got three men on bases with none out. DeMond was called in and pulled out of the hole, allowing two scores which tied up the game.

Nieman featured at the bat with two singles and a double. Labadie got two singles, and the other five hits were credited to Walterhouse, Brandell, Harrington, Thomas, and Roehm (batting for Miller). Williams, for M. A. C., got a single and a double, Huebel tripled, and hits were also made by Davis, Fick, Fuller, Thomas, Brown and DeMond.

Brown, who pitched the first six innings for M. A. C., did not seem to have any of his usual versatile offerings, and, in all, passed five men. Brown got two strikeouts, as also did DeMond.

Miller, said to be Michigan's star pitcher, was knocked out of the box in the sixth, and Roberts substituted. This latter seemed to be wild at first but settled down and held the Aggies to two hits and no earned runs for the remainder of the game. But two of Michigan's scores were counted as earned runs while M. A. C.'s were all legitimate.

Coach Morrissey's boys are now looking forward to June 9th and 10th when they will meet the University at home, and if precedent cuts any figure here the boys will be able to come home with the bacon. Before this, however, this week Thursday to be exact, M. A. C. finishes the home games with a tilt with Notre Dame. Here also the Aggies will have to stage a come-back in order to make the season's record look good.

Delightful weather brought a large crowd out from Lansing for the band concert last Thursday evening. A considerable increase in the attendance at the regimental parade in the afternoon was also noted.

Dr. W. J. Beal of Amherst has written the RECORD that he will visit M. A. C. at Commencement time.

M. A. C. TAKES MEET FROM ALL-FRESH.

M. A. C. won the track meet, which was held with Michigan All-Fresh last Saturday after the baseball game, by a score of 90 to 41. This large score came as a surprise since it was freely predicted with Sheldon, the Aggies' star miler and half miler, out of the meet on account of sickness, that M. A. C. would lose. In fact the mile run was the only event in which M. A. C. had to be content with third place. Barnett took the half mile easily. Michigan secured only three other first places, Horr taking first in both of the dashes, and Haigh winning the high jump.

Beatty took individual honors by winning first place in both of the hurdles and in the broad jump. Barnett won both half-mile and two-mile. Peppard, Brusselbach, Jewett and Frazier easily won the mile relay. The meet was conspicuous by a lack of startling records, none of them being broken or tied.

NEWS AND COMMENT

A very large crowd of visitors was present on the campus last Thursday from the Albion schools.

The Eunomians held an enjoyable 'open house' at the home of R. C. Kinney, one of the East Lansing members, last Saturday evening.

Now that a valuable fiber can be produced from milk weed it is to be hoped that they will be able to rope in quack grass and the Canada thistle.

A picnic breakfast was enjoyed by the Sesame girls at the Pinetum early last Saturday morning. Louise Clemens and Mrs. Hazel Publow chaperoned the party.

The Athanaeum society entertained at a dinner dance last Friday night. The dance was held in the Armory, Logan's orchestra furnishing the music. Patrons were Mr. and Mrs. J. B. Hasselman.

The Columbian society gave a very pretty dancing party at their house last Saturday night. The house had been entirely redecorated for the occasion. Logan's orchestra furnished the music and the entire list of resident graduates and wives were the guests of the society.

Class scraps were indulged in between the senior and junior classes last week. Affairs started when the junior girls secreted the senior girls' caps and gowns on Monday night. The situation was relieved by the senior men on Tuesday morning by the loaning of the proper garb to the co-eds. Later in the week, the canes and derbies so gracefully (?) worn by the

senior men on stated occasions, mysteriously disappeared. Rumor was rife that a riot was in store but the difficulties were amicably settled as the lost goods came filtering back.

Under the auspices of the Botanical Seminar Dr. William Crocker, professor of Plant Physiology in the University of Chicago, will give an address in the botany lecture room, 7:30 p. m. Thursday, June 8th. The subject of his address will be "History of Our Knowledge of Plant Nutrition." Dr. Crocker is a plant physiologist of international repute and is particularly noteworthy because although doing the highest type of scientific work he is connecting it up with the practical application of the subject to agriculture. Accordingly, all those who are interested in Agricultural Chemistry, Agronomy, Horticulture and in Botany will find this lecture of the greatest value.

Plans for the sham battle on Memorial Day were canceled last week when it was announced that the cadets would march in the Lansing parade in the morning. This will be the first time that the M. A. C. cadets have taken part in the general celebrations of this kind for some years. Many of the alumni will remember one of the last times when the entire body went to Detroit. The afternoon program for Memorial Day at M. A. C. will be the same as planned and will consist of demonstration drill on the athletic field, and company and individual competition.

Cornell University has a "Cornellian Council" as one of the branch organizations of the general Alumni Association which has for its purpose "the stimulation of the interest of alumni in the financial support of the university." Since the average Cornell alumnus is not wealthy (this would probably fit M. A. C. as well) the plan adopted by the council has been to ask every former student to pledge himself to contribute a definite sum annually, thus assuring systematic financial support of the university by her alumni and at the same time stimulating an ever increasing interest in Alma Mater. The gifts at present range from \$1 to \$400 annually and the hope is that the Council can soon have 10,000 members who are contributing \$10 annually.

ALUMNI NOTES

'93.

"At a recent meeting of the Crab Apple Club, the students' horticultural organization of the Penn. State College, Prof. U. P. Hedrick, '93, delivered a highly appreciated, because highly suggestive, address on 'Research Work in Horticulture.' He laid special emphasis upon the necessity of doing thorough work before publishing reports. 'Far too much of the past and even the current horticultural investigational literature,' said he, 'is half baked and therefore misleading.' He also emphasized the importance, especially for investigational lines of work to have a thorough grounding in the fundamental sciences and also a strong course in logic. 'Too many students,' he declared, 'are so strongly attracted to the dollar that they impair their efficiency. Better a year or two at routine, even menial but necessary work along the desired or a cognate line than the flowery-bed-of-ease method.' About 200 students attended the lecture and paid excellent attention from start to finish. While at the college, Hedrick stayed with M. G. Kains, '95, and the two had a first-class M. A. C. chin-wag. M. G. K."

'94.

William F. Wight, a, botanist for the U. S. Department of Agriculture at Washington, visited M. A. C. last week. He had been at the South Haven sub-station doing work to further his experiments in securing cold-resistant peaches.

'98.

Rufus W. Landon, a, is spending part of his sixty days' vacation with his mother, Mrs. Landon, college librarian, at M. A. C. Mr. Landon is, and has been for the last seven years, working for the U. S. Government in the Canal zone, doing clerical work in the time department. Mrs. Landon's other son, Lee, who was also a student at M. A. C., is with the American Tin Plate Co. at Elwood, Indiana, where he has worked for 15 years.

'02.

W. D. Wright, with, called at the alumni office last week. He had not visited M. A. C. in many years and had much to say about the many changes which had taken place. Wright is secretary of the Board of Public Works at Harbor Springs.

'04.

A son, Milton Dodds, was born to Mr. and Mrs. (Elizabeth Dodds) Milton Cain, both of this class, on May 10th. Mr. and Mrs. Cain form part of the M. A. C. aggregation at Copperhill, Tenn., where Mr. Cain works for the Ducktown Sulphur, Copper and Iron Co.

'11.

The stork called at the home of Mr. and Mrs. Albert E. Frutig, Couer d'Alene, Idaho, on May 8th, leaving a

girl, Rosaline Caroline. Frutig is in the U. S. Forest Service at that place.

Dear Editor:—

Sorry to have delayed my subscription. I do enjoy the RECORD and especially the alumni notes. Wish we could hear more from the '11 class. Where are they all? Bess Schneider, Zella Kimmel, Helen Dodge, Evelyn Kopf and all the rest? Probably married and so busy they haven't time to write. We used to be rushed to death when we had lessons to get and social stunts galore, but how about it now? "Times do change."

'12.

Born to Mr. and Mrs. (Cora Oberdorfer) L. R. Himmelberger, a, seven and a quarter pound boy, Leo Ransom Himmelberger, Jr., May 15, 1916. Himmelberger is with the veterinary department of the Kentucky Epl. Sta. at Lexington.

'13.

Mayaguez, Porto Rico.

"I feel that it is my duty to offer what scant news of interest that Mayaguez has to offer Record readers in return for the very welcome visit it pays this out-of-the-way corner of the world every week. R. L. Clute, '96, arrived yesterday from Washington to fill a vacancy in the faculty of the Porto Rico Agricultural College. So far as I know he is the only other M. A. C. man on the island. My suggestion that we form a Porto Rico M. A. C. Association found favor with him provided he could be treasurer, which was a delicate compliment to me but he would get to be a pretty old man waiting for me to fill the treasury to a size suitable for absconding, with butter at 60c per pound here and a family to support. Mrs. Brandes and I have just moved into a fine cement bungalow built for us on the station grounds. If the alumni have started anything in connection with helping out the engineering department in any way count me in on it. M. A. C. has a good reputation here and my laboratory assistant is leaving East Lansing next month to enter college and join the Cosmopolitan Club." Sincerely,

E. W. BRANDES.

'14.

A daughter, Dorothy Jane, was born to Robert James Baldwin, '04, and Bertha Van Orden Baldwin of this class, on May 27th, at Lansing, Mich.

A. W. Dorgan, a, who is building homes and grounds in Toledo, was a College visitor last week end.

"Columbia, Missouri,

"May 6, 1916.

"Dear Editor:

"Just a few lines to say that Mrs. A. H. Hollinger and myself will be on hand over commencement doings. My eyes ache for some of those old familiar scenes and faces and so here's hoping that I will not be disappointed when I return.

"Everything's spring-like and lovely here in Central Missouri. The 'Tigers' under Coach Brewer's able directing are cleaning up everything both out of and in the Conference. I occasionally see the other M. A. C.-M. U. people—Dean Mumford, Professors Kempster, Rinkle and others. Have heard nothing from Gibson from Charleston, Mo., lately regarding the tentative M. A. C.-Missouri Association. What is the matter? If he doesn't make things go shortly, I will take up the formation of that club with the other M. A. C. men here. The faculty baseball team are going fine here. We trimmed the Journalists 7 to 1 yesterday. The 'Farmers' Fair' was a stupendous success yesterday, the features of which were the Horticultural Exhibit, the Follies and the Minstrels. The Hort. Show at M. A. C. is the nearest thing I have seen to such co-operation as takes place among the agricultural, horticultural, forestry and veterinary students. It certainly speaks well for the Missouri School of Agriculture.

"Sincerely,
"A. H. HOLLINGER, '14."

'15.

Paul S. Armstrong, a, left his position with the canning company at Eaton Rapids last week and went to Chicago where he will take up work in the Dealers' Service Department of the California Fruit Exchange.

E. F. Holser, e, has recently moved from Lansing, where he has been connected with the Michigan Power Co., to Detroit, where he is working with Smith, Hinchman and Grylls, Architects and Engineers. Holser lives at 926 Cass Ave.
