Number 1

## COLLEGE PLAYS IMPORTANT ROLE IN NEW ERA

MICHIGAN State college, long a pioneer in farsighted agricultural projects in its role as a Land Grant institution, today is on the front line of President Roosevelt's dynamic drive against the forces of depression. In the President's unique crop-allocation plan M. S. C. is lending its smooth-working extension organization and its seventy-five year old experience in Michigan farming life to what appears to be the most startling innovation in government control of private endeavor.

Should the government's new attack on agricultural inertia be successful it will set a precedent for a planned society that is solely American in concept.

When Congress approved the Agricultural Adjustment Act on May 12, 1933, and provided for an Agricultural Adjustment Administration it initiated a program for a general advance in buying power, an advance that will probably extend throughout America, lightening the way of the people in city and country alike. It is an attempt to lift urban buying power as well as lift prices of farm commodities. The Farm Act, therefore, is an important part of a large-scale coordinated attack on the whole problem of depression.

A careful analysis of agricultural statistics convinced President Roosevelt and his aides that this country faced no ordinary problem. Its permanent solution required the building of a new agricultural structure to meet the requirements of a new era. While the government never proposed to force the new plans upon growers, processors, the carriers and sellers of food, the Emergency Adjustment Act makes it lawful and practical for all to get together and work out their own salvation. It provides for a control of production to accord with actual need, and for an orderly distribution of essential supplies.

Early in June Henry A. Wallace, secretary of agriculture, appointed Chester C. Davis, general crop-production director. Under him come the adjustment supervisors in charge of each commodity.

THE Wheat Adjustment plan was given to M. L. Wilson and in turn through Dr. C. W. Warburton the responsibility for the successful administration and operation has been carried to the state director of agricultural extension service of each of the wheat producing states. Robert J. Baldwin, '04, extension director, was named administrator for Michigan, and C. V. Ballard, '12, and Karl McDonel, '16, as assistants. The state of Michigan was divided into six districts and an extension specialist of the College assigned to handle the wheat program in cooperation with the county agents of their respective areas. The six specialists named were J. A. Hannah, '23, Don Hootman, Roy E. Decker, '15, A. B. Love, '17, C. L. Nash, '09, and Paul Rood, '16.

Intentionally, the Wheat Adjustment Plan has been designed to permit the shifting of agricultural effort from growing two blades of grass where one grew before, to an understand-

ing of how to adjust supply to effective demand at a price which will give the wheat producer the same purchasing power he had in 1909 to 1914.

Our acreage must be reduced, it is believed, because of a 360,000,000 bushel carry-over in this country and the high duties and embargoes against wheat in the principal importing countries. Our normal human consumption is 54 percent of our average production of 850,000,000 bushels, so if a grower contracts with the government to reduce his acreage he will receive the parity price on about 54 per cent of his normal production for the past three years. The wheat contract calls for an acreage reduction of at least 15 per cent but must not to exceed 54 percent.

Taking an average of the acreage seeded—not harvested—on his farm during the past three years as the base acreage for each grower, his reduction is figured on that basis. Benefit payments will be made to cooperating growers on the 1933, 1934, and 1935 crops. Reduction of acreage will be required on the 1934 and 1935 crops. The amount of payments on the 1933 crop will be 50 cents a bushel, less the cost of administration from Washington. These payments are to be based on the domestically consumed portion of the grower's average crop for the past three years, and will be paid out of the processing tax of 30 cents a bushel now being collected on wheat. Only co-operative growers, those signing contracts, will receive benefits.

IN GENERAL then, the Wheat Adjustment plan is intended to obtain for the wheat growers, a sum equivalent to the parity price on that portion of their production which is required for domestic consumption. This sum will be made up of two parts: (a) The prevailing market price at which the grower sells his wheat, and (b) the payment made under the act. The income of the grower will be independent of the prevailing open market price or of the world price at which the surplus sells. This is exactly what farmers have been asking for.

The plan permits a free supply-and-demand price for wheat to operate in all parts of the United States. When this open market price and the world price for wheat become adjusted, the way will be open for the free export movement of American wheat without detriment to the farmers' income on that portion of their wheat required for the domestic markets.

By adopting this plan the government of the United States possesses the power to bring about acreage adjustments in 1934 and 1935 to conform to agreements reached between wheat exporting nations at the London conference.

Homecoming this year will be Saturday, October 28. Syracuse university will furnish the opposition.

## Spartan Football Drill Starts With Strenuous Schedule Ahead

**I**N SPITE of a slow drizzling rain, much needed in East Lansing, fifty aspirants for positions on Michigan State's 1933 Spartan team swung into action at 2:00 o'clock the afternoon of September 11. And by 5:15 when the side line coaches and local fans arrived at the practice gridiron on old College Field, Coach Bachman had his charges advanced to "page 16".

In other words, early practice this fall is to be a strenuous affair. The cause therefore is the scheduled appearance of the toughest foes ever encountered by a Spartan eleven. Omitting any set-up for the opening game on September 30, the schedule makers will bring the tricky team from Grinnell college of Iowa. This will be followed by the traditional march to Ann Arbor on October 7, where Bachman's untried eleven will encounter Harry Kipke's conference champions of 1932.

As is always the case when a new coaching staff takes command, there will be more than the usual amount of interest in the practice sessions. Although Bachman and his assistants, Tom King and Mike Casteel, saw most of the players in action last spring they have formed no definite idea of what the starting lineup will look like on September 30. Followers of the team are interested in learning just what new means of developing a team will be shown by Bachman. Casteel is the veteran member of the staff—now serving under the fourth coach since joining the Spartan staff in 1924. King, coming from the University of Louisville, will have complete charge of the ends.

**T**HE Spartan outlook is rather hazy this fall. Bachman cannot see an optimistic picture. Seven members of last year's winning team, including the sensational halfbacks, Bob Monnett and Abe Eliowitz, are missing. These men would

KING BACHMAN CASTEEL

—of the Spartan coaching staff, have won the support of alumni fans by the sincerity of their efforts.

be missed by any ball club. Among the veterans who have returned are Captain McNutt, who played fullback most of the time last year; Alton Kircher, who won his spurs as a fighting quarterback in 1932; Ed Klewicki, an end of first ranking; Art Buss, a dependable tackle since 1931; Frank Butler, towering analytical center; Bob Terlaak, Russel Lay and Joe Ferrari, guards; Roger Keast, end; Jerry Jones, Rus Reynolds and Bob Armstrong, halfbacks.

Bachman's chief problem consists of finding halfbacks to replace the two graduated stars, uncovering at least three strong tackles, a substitute center and perhaps two capable ends. The new coach has openly declared that he hopes to find a good punter and passer among the untried reserve material, and if possible will develop a more powerful passing attack.

## Culp, '33, Named Alumni Assistant

**W**ITH the constantly increasing number of graduates and former students it became apparent last year that Glen Stewart, alumni secretary, and Gladys Franks, alumni recorder, would need some additional help in the Association office. The Executive Committee has recently approved the appointment of George Culp, '33, as assistant to the alumni secretary.

For more than three years Culp has spent most of his undergraduate spare time in the alumni office, assisting with the files, records, stencils, and keeping the mailing lists as nearly up-to-date as possible. While his present duties will be along these lines it will also be possible for him to assist Secretary Stewart with undergraduate projects that should lead to a more informed, more interested alumni body. Culp has an intimate knowledge of undergraduate life which will make him well fitted for the work he will have to do.

GEORGE CULP

Mr. Culp graduated from the Alanson, Michigan, high school, and before entering Michigan State spent some time at the Durant plant and the Auditor General's office in Lansing.

Graduating from the Liberal Arts division last June, the new assistant secretary became well known around the Campus. He is a member of the Hesperian fraternity, a member of the Scabbard and Blade, past president of the Interfraternity Council, a second lieutenant in the O. R. C. and this summer received his appointment as a second lieutenant in the 119th field artillery regiment of the Michigan National Guard.

## Many Varsity Men Listed as Officials

**I**N a recent bulletin issued by the Michigan High School Athletic association the names of the registered basketball officials were recorded. "In checking over the list," writes John Kelly, '29, of Manistique. "I was surprised to find that 28 of them were Michigan State men. Of the group seven M. S. C. men were on the highest or approved list, 11 on the supplementary list while the remaining ten are on the general list. Ratings from schools make the official's record on either of these lists."

The Michigan State men on the approved basketball list include: Merwyn Farleman, '28, East Lansing; John Bos, '22, Grand Rapids; Oliver Hood, '28, Ionia; Herbert Kipke, '31, Lansing; John Kelly, '29, Manistique; Henry Morse, '30, Midland, and Keith Williams, North Adams.

On the supplementary list are listed the following: F. A. Gorton, w'28, Carlton; Glenn Hitchings, '29, Caro; Lavern Laubaugh, '28, Dowagiac; Junior Lewis, Empire; Henry Wylie, '28, Escanaba; Sherman Coryell, '20, Grand Rapids; Ubold Noblett, '22, Houghton; Lynn Errat, '31, Lansing; Carl Schultz, '25, Lansing; Dan Prendergast, w'31, Owosso, and Jack Schwei, '23, Quinnesec.

On the general list is found: Ray Nebeling, Charlevoix; Jake Fase, '32, East Lansing; Milton Gross, '32, East Lansing; Kenneth Lafayette, '32, East Lansing; R. McComb, '34, East Lansing; Jake Brady, '23, Grand Rapids; Ward Estes, '28, Hartford; A. Bartman, w'28, Manistique; James Kidman, '24, St. Louis, and Ivan Tillotson, '29, Shelby.

## Freshmen Week Program Planned

THE 1933 student Freshman Week committee, consisting of members of Blue Key, national service fraternity, have returned to the Campus from their summer vacations to carry out plans for the welcome which is to be held out to the members of the class of 1937. The freshmen will come to the Campus September 20.

Freshman Week, which was adopted here nearly a decade ago, is a period set aside before regular college classes start on Monday, September 25, when the newcomers will have an opportunity to become acquainted with the Campus after their registration has been completed. They will be assisted in the charting of the courses they wish to take by various faculty members who have been named as advisors. Every effort is being made by the College administration to get the new students off on the right foot.

Special entertainment features for the evenings of Freshman Week have been arranged by the student committees working under the direction of Professor L. C. Emmons. The big social event of the week is the first all-college mixer sponsored by the Union on Wednesday evening. As in previous years the Union ballroom will be taxed to capacity and the dance floor in Demonstration hall will be used as an auxiliary unit. The College Y. M. C. A. and Y. W. C. A. will be hosts to the class of 1937 at the Peoples Church on Thursday evening where little cards bearing the inscription "I met you at the Freshman Mixer" will be handed out to each new student. Friday evening will be free from social engagements except for the winners of the Alumni Undergraduate scholarships. This group will be formally introduced to President Shaw, Secretary Stewart and members of the faculty committee on scholarships, at the Union Friday evening.

Entertainment for the week will close Saturday evening with a mixer at the Little Theatre given by members of the Student Grange to all former 4-H club members, home economics and agricultural students.

## Ove Jensen Joins du Pont Staff

ANNOUNCEMENT was made this summer that O. F. Jensen, '14, formerly assistant director of sales promotion and education for the National Fertilizer association, of Chicago, was added to the sales staff of the E. I. du Pont de Nemours & company. His headquarters will be at Wilmington, N. C.

During his 13 years of service with the National Fertilizer association Mr. Jensen became intimately acquainted with mid-west agricultural leaders and workers. He was especially interested in fertilizer application work and served as secretary of the Joint Committee on Fertilizer Application from its organization in 1925 until November, 1932. He assisted in conducting many experiments and was joint author with Professor Emil Truog, of Wisconsin, of a report covering the first three years of work of the joint committee. While at Michigan State, Mr. Jensen specialized in agricultural chemistry. While working in the department of farm crops at Iowa State college he received his master's degree. During the World War he served as a lieutenant in the Air Service.

OVE JENSEN, '14

## Prefers Hens to Legal Career

IT WAS just 12 years from the time J. Alfred Hannah, '23, turned his back on a career as a lawyer to become a poultry scientist that he was named president of the world's largest poultry organization—the International Baby Chick association. Significant, also was the fact that this honor came to him August 10, in his home city of Grand Rapids, where in his boyhood days John Alfred owned a backyard flock of Black Orpington chickens.

In assuming his new duties, Mr. Hannah, who is one of the youngest men ever to head the association, recently stated that he realized the industry would be faced with many major problems during the coming year, but that he would be happy to serve the poultry interests to the best of his ability. During the fall and winter months he will visit many state poultry associations and has already been named as the main speaker for the Pacific coast meetings this winter.

Mr. Hannah has developed unusual abilities as a poultryman, as an extension field man and on the public platform. His work in poultry husbandry has given him an international reputation as a poultry scientist. He was the only American to contribute a paper this month to the World Poultry Congress, held at Rome, Italy. Although appointed by President Roosevelt, and urged by his friends to attend this poultry meeting abroad, he chose to remain in Michigan to work on the NRA poultry code and assist the extension department of the College with the intensive Wheat Adjustment plan.

Active and popular with undergraduates, he assisted materially in negotiating plans whereby the Cooperative Boarding club was made available to needy students last year. He is a member of the executive committee of the alumni association, plays a fair game of bridge and cribbage, and admits that "any game of sport" is his hobby.

J. A. HANNAH, '23

Several class secretaries are doing unusual work for their group, because individual members write them bits of newsy items frequently. Are you one of those who often remarks "I wonder why I never read anything in the RECORD about MY classmates?"

The chances of a boy or girl going to high school, which were only one in 25 in 1890, are now one in two. The chances of a boy or girl going to college, which were only one in 33 in 1890, are now one in six.

The only bright spot in additional faculty salary cuts is that the cash value of 10 per cent decreases with each cut.

## Bregger, '17, Edits Fruit Magazine

**A**NNOUNCEMENT was made early in August that John T. Bregger, '17, had been named editor-in-chief of the American Fruit Grower, a national publication printed in the interests of commercial orcharding. The publication has offices at 1370 Ontario Street, Cleveland Ohio.

Mr. Bregger was graduated from the high school at Bangor, Michigan, received his B. S. degree here in 1917, and an M. S. at Cornell in 1922. He knows fruit from actual commercial growing as well as from scientific experiments in the laboratory.

J. T. BREGGER, '17

During the past eighteen years he has taught botany at Oregon State college, conducted surveys for the government in plant disease campaigns in Michigan and Oregon, spent one year at the Alaska Experiment Station as horticulturist, as well as four years in research with Stark Brothers nurseries. The latter connection led him in 1927 to Sebastopol, California, as superintendent of the Luther Burbank experiment farm, where he described and catalogued the hundreds of new

fruit varieties, left to the world by Luther Burbank at the time of his death. He has just completed a year as visiting professor in pomology at Cornell after serving for three years as an extension horticulturist at Washington State college.

In college Bregger was a member of the Phi Kappa Tau fraternity, a member of the band and active in Campus affairs. He is the son of L. A. Bregger, '88, and a brother of L. B. Bregger, '26.

## Suggestions for Alumni Reading

**T**HE Michigan State college library cannot afford a program of alumni reading guidance at this time, although several new experiments in recreational reading on the Campus have been initiated since last year.

Each month the College library can undertake to suggest three or four good books to alumni, books worth buying and owning or probably obtainable in any local public library of average size.

The College library does not loan books to individuals but will loan to other libraries for individuals. In this way the books on the following list might be borrowed. It was not possible to buy additional copies, and if requests prove too numerous we shall have to disappoint those who make them.

At any rate, here is the fifth suggested list. The descriptive notes were written by Miss Charlotte Jackson, cataloger in the College library.

**Sullivan, Mark. Our Times. 1904-1914. Scribner. 1932.**

This is the fourth volume of the notable social history of America which the well-known Washington correspondent, Mark Sullivan, has been writing out of his rich experience and careful investigation. In these books the great, the trivial, the intimacies of presidents and the popular vogues are woven into a fabric which really represents the times as they are. The fourth volume passes from the picturesque and strenuous days of Roosevelt and the new nationalism to the dramatic period when irresistible forces began to draw the United States away from isolation.

**Belloe, Hilaire. Napoleon. Lippincott. 1932.**

This new book on Napoleon is in some ways the most bril-

liant and suggestive biography which Mr. Belloe has written. It is composed chiefly of a series of chapters, each relating one episode which has seemed significant in a study of the career and character of the great military genius. In a longer preliminary chapter is set forth the author's thesis that when Napoleon was eventually conquered at Waterloo, he had almost accomplished a great and necessary task which still awaits fulfillment—the unification of Europe.

**DeKruif, Paul. Men Against Death. Harcourt. 1932.**

Among the death fighters and microbe hunters whose achievements are so magnificently told in these chapters are Banting, discoverer of insulin, Minot, who proved the efficacy of liver feeding for pernicious anemia, Spencer, conqueror of spotted fever, Finsen, who discovered the curative effect of light rays, and Rollier, the sun doctor. Dr. de Kruif has a splendid gift for making his stories exciting and human. The steps by which success was eventually gained, the puzzles, the difficulties along the way, the human qualities of the discoverers and their associates, are arranged with that masterly narrative skill.

## Teller, '88, Among Pioneer Chemists

**A**MONG the 42 pioneers in American chemistry who attended the Columbian Exposition in Chicago in 1893 and were guests of honor at a dinner September 14 of the American Chemical Society at the Century of Progress Exposition, in Chicago, was George L. Teller, a Michigan State college graduate with the class of 1888.

It is interesting to note that chemists from the leading laboratories of America and Europe joined with the national officers of the American society to honor these patriarchs of the "Old Guard". Michigan State college was represented by Dean R. C. Huston, and Professors A. J. Clark and C. A. Hoppert.

Speakers at the banquet pointed out that during the lifetime of the honored guests, creative chemistry had "smashed foreign monopolies in essentials of peace and war, insured the nation against shortages in food, oil, and rubber, changed the diet of all civilized peoples, provided employment for unknown numbers of workers, added millions to the national wealth, strengthened the national defense and inaugurated a new era in the whole realm of American industry".

**W**HILE not the oldest patriarch of American chemistry, George L. Teller has lived an interesting and eventful life. Entering Michigan State, then M. A. C., from Colon, Michigan, he used his athletic vigor in ditch digging, onion hoeing, and general farm work for the sum of eight cents an hour. Following graduation in 1888 he became assistant chemist at the local Experiment Station and served two years. While serving as chemist and agriculturist at the University of Arkansas from 1890 to 1899 he pursued advanced chemistry and received his M. S. degree at Michigan State in 1893.

According to Dr. F. S. Kedzie, one of the important changes in Mr. Teller's interesting career came in 1899 when he moved to Chicago to become chemist for the Chidiow Milling and Baking institute. It was this position that led him in 1902 to the position of chief chemist and later president of the Columbus laboratories, Chicago, analytical and consulting chemists and bacteriologists. For more than 30 years George L. Teller and his associates have been well known to the milling and baking trades, and today he is recognized as one of the leading cereal chemists of this country. Among the booklets written by him are "Flour Grades and Standards", "Wheat Protein and Bread", and "Gluten as a Factor in Grading Wheat".

Mr. Teller in addition to being a lifetime member of the American Chemistry society, is a member of the Society of Chemistry Industry, A. A. A. S., Dutch Settlers' Society of Albany and a member of the Chicago Collegiate club. In college he was a member of the Olympic fraternity. His home is at 92 Kimbark road, Riverside, Illinois.

HEY FROSH! Smash that line! Bully to see you old man! Have a good summer? ah! 'Tis September again. Indian summer, traces of forest fire smoke, first touches of color on Campus leaves, cool evenings with a glorious moon overhead, life returning to the old College after a brief period of rest since the close of Summer School football!

What a time to live! Some folks question whether business is really picking up, less-old individuals are a bit melancholy at the turn of events, but here on the Campus is youth, there is a promise of better times ahead, there is present hope and faith awaiting an outlet of expression.

Stanley Weitz, captain of last year's Spartan tennis team and holder of the state intercollegiate championship, defeated Carl Fisher of Detroit at Grand Rapids on August 27 and won the title of state closed singles champion for 1933.

Charles Bachman and Mike Gasteel have been in East Lansing most of the summer, cooking up thunder for the football season. "Bach" is strong for the new rules, says they aren't new at all, simply makes it necessary for officials to see that the game is played the way it was meant to be played all the time.

Michigan Master Farmers and their families met on the Campus August 18 for their annual summer picnic. In the absence of President Shaw, who was in Chicago on business, Dean E. L. Anthony acted as host to the visitors and was ably assisted during the day by Director Gardner and Professors Card, Hallinan, Millar, Rather, Hudson and Brown.

Changes in the organization of the financial administration and the music department of the College were ordered at a meeting of the State Board of Agriculture on August 9. Charles O. Wilkins, comptroller for the past 7 years was given the additional duties of college treasurer, succeeding Jacob Schepers, who was retained as college cashier. The state board placed the music department under the liberal arts division of the College and abolished the fee-splitting system for music instructors. By this action the music department is completely divorced from the Michigan State Institute of Music and Allied Arts.

—familiar walk along the old circle.

Local alumni of districts five and seven have not definitely decided about alumni meetings in connection with the teachers institutes next month. Plans may be completed shortly and notices will be mailed each alumni in the district. Watch for announcements and posters at the meetings at Marquette and Cadillac.

Alumni in Detroit will again join with the U. of M. grads at a stag luncheon on Friday noon prior to the October 7 game at Ann Arbor. This meeting has become a traditional function attended by more than 400 enthusiastic football fans. Coaches from each institution are listed to speak.

Furthering its campaign to make the Campus safe for pedestrian traffic, many of the broken-edged sidewalks are being repaired this month. The administration building, formerly the old library to you naughty miners and on back has also come in for considerable repairing and redecorating. The tower on the back wing and the cornice of the entire building have been rebuilt and painted. And in addition, Don Bremer has a new supply of official "O.K." tags for undergraduates who can still afford to use a car around East Lansing and on the Campus.

A systematic attack on the problems of uses for the land taken out of wheat, tobacco, cotton and other production by the government's acreage reduction campaigns is getting started under J. F. Cox, former dean of agriculture, who recently assumed his new duties in the Department of Agriculture at Washington. For the past several months Mr. Cox has served as special collaborator with the Farm Credit Administration, working with seed growers' associations financed by the farm board. His new job will be to assist farmers in shifting production from the surplus basic commodities to other crops.

Hope of better times ahead must be strong in many alumni hearts this fall, according to L. L. Frimodie, assistant director of athletics and distributor of the 50-yard football seats. "Frim" states that the response for tickets for the reserved seat home games has started earlier than usual. If it isn't a result of more buying power perhaps it's the lure of the home schedule. Local and state sports writers declare the Spartan home program to be the best ever offered at East Lansing. The card offered is costing a lot of money in guarantees it's a test case will the Spartan fans support it?

The Union cafeteria has joined the NRA and are also members of the local hotel and restaurant association. Food costs around East Lansing have advanced some this month in conformity with the swing of prices. And not the least of the complications under the New Deal is the fact that though staff members have now been on reduced incomes for some time, the greatest reductions have come just at the time the cost of living has begun to soar again.

Alumni Secretary Stewart spent September 15 and 16 at Sky Top Lodge in Eastern Pennsylvania attending a meeting of the executive board of the American Alumni Council, of which he is vice-president. This group is attempting to organize an American Student credit union, a corporation, which might be empowered to borrow money from the Reconstruction Finance corporation, to supplement loan funds for needy students.

Beaumont, Smith and Harris  
Union Guardian Bldg.  
Detroit, Mich.

Harry E. Emmons gives his address as 8719 Dumbarton road, Detroit, Michigan.

Frank Robson may be reached at R. 3, Box 56A, Ann Arbor, Michigan.

1883

Frank F. Rogers, Secretary  
700 W. Washtenaw St., Lansing, Mich.

Herbert M. Weed lives in Lansing at 616 S. Grand.

Sarah Ellen Wood Stevens is living in Bay City, Michigan at 923 Third street.

1895

M. G. Kains, Secretary  
Suffern, N. Y.

During General Balbo's passage from Orbetello, near Rome, to Chicago thirty radio stations including twelve on Italian vessels along the sea route, United States and Canadian weather bureaus, and ships at sea in general cooperated in keeping weather information up to date. This was flashed to New York, analyzed by Dr. James H. Kimball, flying weather expert, and Professor D. Montanari, Italian meteorologist, and sent on to the planes. This same system, in general, was used during the flight back to Italy.

1897

Hubert E. VanNorman, Secretary  
5844 Stony Island Avenue  
Chicago, Illinois

H. E. VanNorman lives in Chicago at 5844 Stony Island avenue.

L. J. Cole is professor of genetics at the University of Wisconsin in Madison.

1902

Norman B. Horton, Secretary  
Fruit Ridge, Mich.

D. S. Bullock may be reached at Casella 2-D, Angol, Chile, South America.

1905

V. R. Gardner, Secretary  
East Lansing, Mich.

Clyde W. Stringer is an engineer in the Body Engineering department of the Cadillac Motor Car company in Detroit. He lives at 12819 Second avenue, Highland Park. His son, Carl B., was graduated this last June from the College.

1906

L. O. Gordon, Secretary  
Interlaken, North Muskegon, Mich.

M. Bert Langelier lives in Chicago at 2703 East 76th place.

1907

George Brown, Secretary  
East Lansing, Mich.

J. Harvey Tryon lives in Lansing at 810 N. Walnut street.

George A. and Ella Lentz ('12) Brown have moved in East Lansing to 948 University drive. George is professor of animal husbandry at the College.

Carrizo Springs, Texas, is the new address for W. W. DeLange.

1908

Harry H. Musselman, Secretary  
East Lansing, Mich.

James R. Campbell may be reached at 613 East 5th street, Flint.

Samuel W. Horton has moved from Los Angeles to Pasadena where he lives at 848 S. Madison avenue.

Francis O'Gara lives in Detroit at 17567 Wildemere avenue.

1909

Olive Graham Howland, Secretary  
513 Forest Ave., East Lansing, Mich.

If C. G. Burroughs' son, Charles, proves as adept at learning the fine points of basketball as in hurdling the intricacies of mechanical engineering the University of Wisconsin will acquire a prize prospect for the squad this coming year. Young Burroughs was a freshman at the University of Wisconsin last year and during the past semester secured the greatest number of grade points per credit of anyone in the freshman engineering class of 155 students. A complete A record gave him the maximum number of points. Burroughs, now six feet five inches in height, weighing about 200, is only 19. He was too young and too light to compete in athletics at the West high school where he prepped. He graduated from high school in two years. He plans to try for a berth on the varsity basketball team in the fall. The Burroughs family lives on Route 4 out of Madison, on the Burroughs' Poultry farm, a well-known hatchery in Wisconsin.

Ellsworth L. Lake lives at 1400 Colfax avenue, Route 4, Benton Harbor, Michigan.

1911

James G. Hays, Secretary  
213 Bailey St., East Lansing, Mich.

Elton L. Jewell has moved in Chicago to 4922 N. Kilbourne avenue.

1912

C. V. Ballard, Secretary  
East Lansing, Mich.

R. B. Delvin is an electrical engineer with offices at 107 Craig street W., Montreal, Quebec, Canada. He lives in Montreal at 3468 Hingston avenue, N. D. G.

1913

Robert E. Loree, Secretary  
East Lansing, Mich.

William A. McDonald writes from 1035 Woodside Drive, Flint, Michigan: "Here's an item for the foresters of the classes of '13 and '14. A few weeks ago I looked up Sandy Harvey, of Alba, who was foreman of Ward Lumber camp No. 18 in 1911, when the foresters of the class of 1913 had their summer camp on Sand Lake, eight miles from Alba. They boarded at Camp 18 with the lumberjacks. Sand Lake is in the middle of thousands of acres of the most complete desolation imaginable. The country around there is call-

ed 'the wilderness'. There are no living trees for miles. When the foresters of '13 were in school at this place it was surrounded with beautiful beech, birch, maple and hemlock forests. Then I went to the site of old camp 7 of the White Lumber company where the class of '14 held their summer school. It is near the east end of Thumb Lake. I looked up the site of the old dance hall that used to stand over the lake, and from which the students used to dive. Peterson, who was foreman of this camp, was in Boyne Falls the day before I was there. There is nothing left to indicate where these old camps were located. One can only tell approximately because of the ravages of time, fire, and the changing location of roads."

1915

Rolan W. Sleight, Secretary  
Laingsburg, Mich.

Captain Don A. Stroh may be reached at Fort Mason, California.

1916

## Service For You, Too!

**YOU** can have the same service on collegiate merchandise as college students. We strive to give service to students, faculty and alumni alike. The Book Store is the college people's own store, handling text books, books of current literature, student supplies, stationery, jewelry, felt goods and novelties marked with the college seal.

Perhaps you have intended buying a new book on history, fiction or biography for your bookshelf. We can save you money.

A postal card will make our service yours.

Tyne, England: "This is rather a long way from the parts of the world with which I am familiar, and it is harder than you might imagine to obtain news of the old familiar places. For which reason I would appreciate it if you would forward the alumni magazine to me at the above address. I recently returned from London after spending two weeks there. It's a great city and I managed to see a great deal of it. I have been to all of those places you read about in books—Limehouse, Soho, Trafalgar Square, Hyde Park, Rotten Row, National Picture gallery Leicester Square, Cheapside, Fleet street, The Strand, British Museum, London Bridge, The Tower, Piccadilly, Regent Park, the Bank (which has never closed, the Old Lady of Threadneedle street), Charing Cross, and the rest of them. The English love their gardens, and they have beautiful parks. It is a green land, and a land where life is slower, a country that breathes security even in these parlous times. It is a nation proud of its traditions. But mostly it's a conservative country, and slow it seems to me to the acceptance of modern ideas. The American isn't particularly worshipped here."

1933

George Culp, Secretary,  
Box 974, East Lansing, Mich.

Mrs. L. R. Arnold may be reached at R. 2, Lansing.

F. Donald Berles is working in the treasurer's office at M. S. C.

R. F. Durfee has moved to R. 4, Howell, Michigan.

Stewart Flechter is assistant office manager of the Continental Products, 1805 Michigan avenue, Chicago. He lives at the Hyde Park Arms Hotel, 5316 Harper.

Scottville, Michigan, will reach Esther I. Gowan.

George Merkel is a salesman for the Beumann-Marshall company of Lansing and lives in the Dean Apartments, East Lansing.

George Thomas is working in the comptroller's office at the College.

## MARRIAGES

CAWOOD-FISHER

Frank N. Cawood, '26, and Jennie D. Fisher were married July 31, 1933, in Paris, Kentucky. Mrs. Cawood is a graduate of the University of Kentucky and received her master's degree in home economics at Michigan State college in 1931. She has been employed as research chemist for the Institute of American Meat Packers at Chicago. Cawood is connected with the Pere Marquette railroad in Detroit.

CHAPMAN-NORTHCOTT

Charles Ronald Chapman, '33, son of Professor and Mrs. C. W. Chapman of East Lansing, and Mary Northcott of Lansing, were married at the home of the bride's parents on July 17, 1933.

DRAPER-CULVER

Harry O. Draper, w'31, and Elizabeth Culver (Hillsdale College) were married October 1, 1932, in Hillsdale, Michigan. They make their home in Jackson, Michigan, at 607 Garfield street. Draper travels for Liggett and Myers Tobacco company.

EDWARDS-NIEBLING

O. F. Edwards, '31, and Lucile Niebling, '28, were married July 2, 1932 at South Bend Indiana. They are at home in New Haven, Connecticut, where Edwards plans to attend Yale university.

KIBLINGER-KINNEY

John Kiblinger and Wilma Kinney, '31, were married December 25, 1932, at the Peoples church in East Lansing. They are living in Decatur, Michigan.

McELROY-WALLS

James K. McElroy, '28, and Annie-Laurie I. Walls, '26, were married September 2, 1933, at the home of the bride's parents in Chicago. They will make their home for the next two months in Huron county, Michigan, where Jim is an appraiser for the Federal Land bank.

SPURWAY-CAWOOD

Dr. Charles H. Spurway and Margaret Cawood, '26, were married at the home of the bride's mother in East Lansing, August 5, 1933. They will make their home at 208 S. Holmes street, Lansing. Mrs. Spurway has been research assistant in sociology at the College for several years and Dr. Spurway is research associate in soils.

VOGEL-CRANDALL

Alfred R. Vogel, '26, and Helen Elizabeth Crandall were married August 5, 1933, at the home of the bride's parents near Howell, Michigan. They will make their home in Ludington temporarily where Vogel is landscape foreman for the civilian conservation corps. Later they may be reached in care of the Brighton Nursery, Brighton, Michigan.
