Comments From The President

Splendid

Your February number came today, and I have looked it over with so much satisfaction that I yield to an impulse to commend it and commend you and the others—assisting and contributing.

The President's page was especially interesting. He is always illuminating and satisfying. I was glad to read about the "three basic functions" and to realize how they have come, or been brought about. They date back to the early arguments. Bela Hubbard in his memorial and Holmes in his appeals, and Williams in his talks with Morrell, all had Research next to Education. In the early years Education was about all that could be. Research was mainly a voluntary contribution—like Kedzie digging into the soils and finding food for sugar beets, and so starting a great state industry. Or Mills—fussing around with Portland cement, grout, coal tax and what followed; or drafting the Chandler marsh (and, I think, getting Senator Chandler to pay the cost) and so driving out ague and giving the students a chance. The College History is really a romance. Fine that the modern leaders—especially the Shaw administration—realize and work it out so well.

Glad, too, was I, to note proposed honor to Charles Garfield. He deserves it.

Sincerely,

HENRY A. HAIGH, '74.
639 Penobscot Building,
Detroit, Michigan.

See You Soon

I am employed as an agricultural engineer, and am acting as supervising engineer over the CCC Soil Erosion camps and also over three designated watersheds. Dr. Arnold Bauer, '29, is also here and is heading our soil survey work and soil mapping. My wife, the son Charles—age 18 months—and I all plan to be back on the campus for the reunion or what not in June. . . .

HOKEY (H. J.) RATHS, '31.
10 Beechwood Place,
New Brunswick, N. J.

Congratulations

I resigned my position as personnel director of the Kroger Grocery and Baking Company, Toledo, on the 8th of February this year to assume the general managership of the Pack It Company of America, Detroit, along with the vice presidency of the Venitor Corporation of Detroit. The Pack It Company of America is a subsidiary of Awway Corporation of Detroit, while the Venitor Corporation owns all the patents, tools, fixtures, and dies necessary for the manufacture of an exclusive, modernistic automatic sales cabinet, and manufactures these cabinets for Awway Corporation.

Yours very truly,
MARIOND L. JOSLIN, '30,
Venitor Corporation,
Title and Trust Bldg.,
Detroit, Mich.

Beginning

A department you'll enjoy, I'm sure. That is, if you like to read letters and contributions from your many friends who are graduates of Michigan State College.

Of course, this is only a start; won't you help the department along by sending interesting letters about your varied experiences? Letters can deal with your work in the office, in the laboratory, in the factory, or on the farm. But, don't forget to tell us about your achievements.

Let's get the NEWS; this page will tell it to the ALUMNI WORLD.—The Editor.

Surprised

Two elderly strangers stood talking together one day last summer on board an ocean liner. One said to the other: "Then you came from California?" "Yes," said the other. "And where did you come from, may I ask?" "From Michigan," the other replied. "I formerly lived in Lansing, Michigan, and graduated from the M. S. C." "You did? Why, that's where I graduated in '51." "Then will you tell me your name?" said the one from California. "Why, Dr. Hubbard, Detroit, and yours?" "Gammon." "Why, you're Charlie Gammon." They had not seen each other for nearly sixty years. One was on his way to London to sell interests

in his gold mine—the other on a vacation.

Sincerely,

DR. W. A. HUBBERT,
Detroit, Michigan.

South America

The greater part of my time since my graduation has been spent a long distance from my Alma Mater and only on rare occasions have I been privileged to get back to see how things have been moving along. My interest, however, has never lagged. I devour the Record as soon as it arrives and generally look in vain for news of those of 1902 and thereabouts.

I am still down south of the equator and it really seems queer to read of the terrible cold you are having while we here are almost burned up with the heat, in the middle of harvest. . . .

Yours very sincerely,

D. S. BULLOCK, '02,
El Vergel, Angol,
Chile, South America.

Coming To State

My son will enter college this fall and will go to Michigan State for his pre-medical work if this is so arranged that it may be concluded in three years. He will then go to the University of Michigan for his M.D. I have also interested Dr. Bookstaver of Teaneck, in sending his son to Michigan State this year. I have a second son who will enter State in 1937 to study engineering. As a matter of fact, if you do not think it necessary to finish high school, this son might enter State this fall with the other two, the former taking the preparatory course. . . .

Yours very truly,
YOUNG CONTRACTING COMPANY,
By E. M. Young, '15E.,
328 Teaneck Road,
Teaneck, New Jersey.

Where Can He Be?

Mr. Harry E. Moon, one of our Michigan State College track athletes, was a member of the 1904 U. S. Olympic team competing in the sprints and broad jump. I am anxious to secure a picture of him in a track suit and to learn something about his present whereabouts. . . . Nobody seems to know (Turn to page 19)

The Michigan Agricultural College, known since 1925 as the Michigan State College, opened its doors on May 13, 1857, with an enrollment of 123 students. It has since experienced a greatly varied progress in a period during which three wars have occurred and several periods of depression have been felt, three of these with disastrous and long-continued effects.

The enrollment for the fall term of 1935 was 4,005, that of last season's summer school 796, and that of the winter short courses just closed 272 making a grand total of 5073 for a twelve-month period. The recent rapid increase of 1250 students during the last two years seems to indicate that the college is growing in favor and is offering the type of opportunities sought by the youth of Michigan. It is decidedly not our desire to develop a ponderous, unwieldy organization, but in a tax-supported institution student numbers cannot be limited.

More Facilities Needed

By way of lands, buildings, and equipment the college has grown to large proportions. The original farm of 676 acres has been expanded to 1700 acres in one rectangular block, thus providing for future needs for many decades to come. The commodious buildings, already unable to meet present pressing needs, represent an inventory value of over five million dollars. In addition to this the equipment represents a value of two million, thus totalling a more than seven million dollar investment. And this is only the beginning, as ever-increasing demands for greater service have already impressed the urgent need for more buildings and more adequate facilities.

The functionings of the college today are adequately illustrated by the members and classifications of students as presented in the November issue of the Record. The primary objectives of the college were agricultural education, research, and extension. These are still in the forefront, for even after enormous expansion, these projects are given either direct or indirect support by more than 55 per cent of the annual income of the college.

Living Conditions Improved

The acceptance of the provisions of the Morrill Act of 1862 by the Michigan Legislature of 1863 at once converted the institution into a college of Agriculture and Mechanic Arts, although the Engineering Division was not established until 1885. As a result of this step Agriculture and Engineering, closely interrelated (Turn to page 8)

THE COVER

Represents pictorially some of the major activities at Michigan State College since the February issue of the Michigan State College Record. The cover for the June issue will contain pictures of student life on the campus from April to June 19, including commencement views.

Introducing the candidates for the Michigan State College Alumni Association election. They are, left to right: Earl Hotchin, '12, Arthur Knoblauch, '29, George "Carp" Julian, '15, William Taylor, '23, and Einar Ungren, '19.

Election Time Rolls 'Round

Select Your Candidates, Mark Your Ballot, And Mail It To Secretary

Earl Hotchin, '12, Electrical Engineering; position, Fire Prevention engineer, Millers Mutual Fire Insurance Company, Lansing, Michigan; residence, 604 Forest Avenue, East Lansing, Michigan; secretary, Alumni Varsity Club; member, Sigma Nu Fraternity.

Arthur L. Knoblauch, '29, Agricultural Division, M. A. degree, University of Michigan, 1933; attended Harvard University summer of '34; position, Superintendent of Schools, Cassopolis, Michigan; member, Phi Delta Kappa Fraternity, Alpha Zeta, Pi Kappa Delta (U. of M.).

George "Carp" Julian, '15, Agricultural Division, B. S. degree; member of famous "Aggie" teams under Coach John F. Macklin; captain of team, '14; member of Walter Eckersall's all-American team, '13; an organizer and charter member of the Alumni Varsity Club; following graduation became associated with Superior Printing and Engraving Company, of Akron, Ohio; played professional football; became associated with State Department of Agriculture and later with Auditor General's Department of the State of Michigan; for last two years has been with the personnel division of the Olds Motor Works; member, Eclectic Fraternity, Alumni Varsity Club.

William Taylor, '23, Agricultural Division; superintendent and teacher of agriculture at Honor, Michigan, 1923-26; Ed. M. degree, Harvard University, '27; superintendent and teacher of agriculture, Okemos Consolidated School, 1927-33; Superintendent of Schools, Walled

Lake, 1933-35; present position, Superintendent of Schools, Lake Odessa, Michigan.

Einar E. Ungren, '19, Agricultural Division; editor of Holcad, 1918; with Michigan State Farm Bureau since 1921; present position, in charge of advertising and press relations, State Farm Bureau; editor, Michigan Farm News, 1923-36; hobbies, newspapers and fishing.

Claud R. Erickson, '22, Engineering Division, B. S. degree; M. E. degree in 1927; E. E. degree in 1933; C. E. degree in 1934; designed generating station at the campus power house, designed power stations in several other Michigan cities; associated with Board of Water and Electric Light Commissioners, City of Lansing, since graduation; present position, assistant city engineer; hobbies, astronomy, etc. hings, and study of law; member, Lambda Chi Alpha and Tau Beta Pi; past president, Michigan Engineering Society.

Harold J. Plumb, '21, Engineering Division, B. S. degree; present position, engineer, Consumers Power Company, Jackson, Michigan; member, Phi Kappa Tau, Tau Beta Pi, and A. I. E. E.; residence, 728 West Morrell Street, Jackson, Michigan; past president, Jackson Alumni Club; for last two years, treasurer of Michigan State College Association.

Ruth Simmons James, '28, Home Economics Division, (Turn to page 12)

BALLOT M. S. C. Association

President

- Earl Hotchin, '12, E. Lansing
 A. Knoblauch, '29, Cassopolis

First Vice President

- George Julian, '15, E. Lansing
 Claud Erickson, '22, Lansing

Second Vice President

- Wm. Taylor, '23, Lake Odessa
 Einar Ungren, '19, Lansing

Treasurer

- Harold Plumb, '21, Jackson
 C. Van Lopik, '33, Detroit

Member Executive Committee

- Mrs. Plant, '98, East Lansing
 Mrs. James, '28, Flint

Vote! Vote Now! Every alumnus is entitled to vote this year by special action of the Executive Committee.

Mark an X in the square beside the name of the candidate you prefer. Mail your ballots to Glen O. Stewart, Alumni Secretary, M. S. C., East Lansing, Michigan. Ballots must be in the office of the M. S. C. Association by June 11.

Claud Erickson, '22, Harold Plumb, '21, and Mrs. Ruth Simmons James, '28. Pictures of Mrs. Pearl Kedzie Plant, '98, and Clarence Van Lopik, '33, were not available.

Chatting About Campus Life

Their Discussion Deals With Various Social Activities At M. S. C. Today

"What's doing these days, Jack? About time to get out your canoe and paddle up the Red Cedar?" The speaker was Carl, an old grad who stopped at the fraternity house for the week-end. He and Jack, one of the members, were standing in front of the fireplace chatting.

"Yes, it's almost warm enough," said Jack. "Give it another week, however, and the river will be full of canoes."

"You know, I don't think the old college changes so much," Carl remarked. "You get a new building once in a while and the fraternities go national, but you still do the same things we did: Canoeing, parties, wiener roasts at Pinetum. You have more parties I guess. We used to have just four dances a year, and then we had to get the girls in at 11 o'clock."

Jack laughed. "We are a bit better off, but we have to take the co-eds back to the dorms and sorority houses at 12:30 week-end nights."

"What I have been wondering about, Jack, is another angle to this problem of social life. Does the college do anything more in the line of social activity than it used to do for us? My gosh, I'll never forget when I was a freshman here. Green?—Why I don't believe I dared walk down the street with a girl that first year. It doesn't seem as if the college did anything to help us get acquainted, much less tell us how to do things."

"I guess they do try to emphasize that part of college now. We get acquainted anyhow," commented Jack. "When you live in a fraternity or sorority house or in the dorm it is easy

to meet people and there are plenty of chances for blind dates. Independents who live off campus find it harder to get around."

"That's the problem," Carl agreed. "I worked my way through college and lived alone most of the first year, and I am telling you, there wasn't any college life about that."

Jack put another log on the fire. "The problem isn't solved yet, but I think we are getting places. This year, especially, there has been more talk and more organization aimed at giving the independents and off-campus students a chance to solve their social problems."

"What do you mean by the new Independents' organization? I heard something about that. And the dean of men, too? Now, those seem like additions I would have liked to have seen when I was in college." Carl spoke emphatically.

"Yes, they even had a dating bureau at one of the parties last term."

"They did? That certainly sounds interesting; tell me how it all works."

"Well, things began to happen last fall after Dr. F. T. Mitchell was appointed dean of men. A man can see Dean Mitchell any time and get help on his personal problems, and men's organizations go to him. I was talking to Doctor Mitchell the other day about what he had to do as dean and he was telling me about a fellow who asked about a "tux." Of course he didn't tell me his name. It seems this fellow had never been at a formal dance, because he hadn't been able to afford it. Now he suddenly decided to attend some of the parties and wanted Dean Mitchell to tell him whether to buy a dinner jacket or tails and after that how to act at the party. Mitchell asked him why he didn't ask his fraternity brothers about it and the fellow said he was ashamed to because they would laugh at him. I can see how that would be, all right. There has to be someone a fellow can talk to when he is stuck."

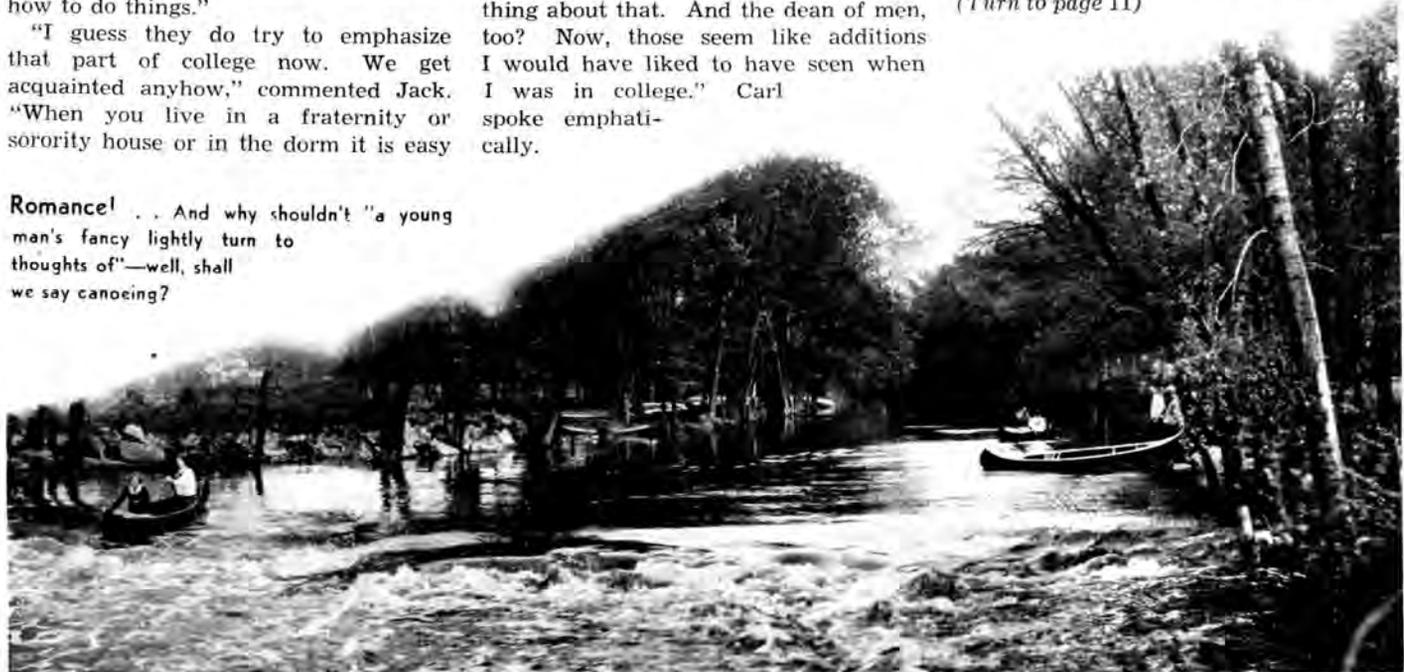

"You know the girls have Dean Elisabeth Conrad to whom they may go for advice," Jack continued.

"Besides more of the girls are in dorms where they have a chance to see how to do things socially anyway, even if it isn't forced on them. They have house mothers in their sorority houses too. But we are getting there. One of the fraternities got a house mother this year, and we are talking about it."

Carl was interested. "That sounds good," he said. "If you had a house mother you could entertain girls in the living room certain hours, couldn't you?"

"Yes, and she would help plan
(Turn to page 11)

Romance! . . . And why shouldn't "a young man's fancy lightly turn to thoughts of"—well, shall we say canoeing?

Students Receive Degrees

At End Of Winter Term 36 Meet Requirements; Four Get Advanced Titles

Thirty-six Michigan State College students were graduated, and advanced degrees were conferred on three others at the end of the winter term, according to a statement issued recently by Miss Elida Yakeley, college registrar.

Four of the graduates completed their four year courses with honor. They are Peter J. Jenema, Three Oaks, Agriculture; Raymond N. Miller, Grand Rapids, Chemical Engineering; Jane Branston, Muskegon, Applied Science; and Claudia E. Ireland, Detroit, Liberal Arts.

The master of arts degree was awarded to Helen Josephine Fuller, Alamosa, Colorado. Arthur B. Bowman, Detroit, and Gilbert Dionne, St. Dacone, Quebec, received the master of science degrees.

Other students receiving degrees and the division in which they completed their work are as follows:

Bachelor of Science degrees: Paul Hackett Kyburz, East Lansing, Agriculture; Karl S. Lindeman, Lansing, Forestry; Edward John Green, Detroit, Civil Engineering; Robert Seaton Heppinstall,

East Lansing, Mechanical Engineering; Harold House, Lansing, Mechanical Engineering; John Edward Manning, Lansing, Chemical Engineering; Joseph F. O'Dell, Lansing, Chemical Engineering; Merland Dale Porter, Blissfield, Chemical Engineering; Herbert B. Robinson, Detroit, Mechanical Engineering; Gordon Leigh Chipman, Lansing, Civil Engineering; Lorraine Philomen DeWaele, Bay City, Home Economics; Margaret Esther Dockery, East Lansing, Home Economics.

Evelyn Phyllis Hogarth, Atlanta, Home Economics; Merle Marie Whyte, Bay City, Home Economics; Elmer Robert Breining, Trevorton, Pennsylvania, Applied Science; Alice Elizabeth Huse, Detroit, Applied Science; Paul Jerome Murdoch, Eaton Rapids, Applied Science; Richard I. Somers, Lansing, Applied Science; Clayton O'Neil Willits, Lansing, Applied Science; David Arthur Burchett, Dunkirk, New York, Physical Education; Charles B. Guzak, Flint, Physical Education; Otis J. Robinson, Elkton, Veterinary Science; Stephen Lange, Detroit, Veterinary Science.

Bachelor of Arts degrees: Eugene H. Baker, Birmingham, Liberal Arts; Perry Elmer Conant, Caro, Liberal Arts; Louis Thomas Friedman, Grand Ledge, Liberal Arts; Martha Elizabeth Spalding, Flint; Harold George Stevens, Plymouth, Liberal Arts; William Lewis Klum, Benton Harbor, Business Administration; Robert Arthur Stoll, Augusta, Business Administration; John Raymond White, Berwyn, Illinois, Business Administration; Warren Osman Seelye, Royal Oak, Hotel Administration.

Commencement Banquet

More than one-hundred graduating short course students celebrated the end of the school year at a commencement banquet held by that division on March 6.

Among the honored students were nine whose excellent scholastic records merited special attention. These students and the courses in which they were enrolled are: first year, sixteen weeks course in General Agriculture, Loren Lietzke, DeWitt; second year, sixteen weeks course, General Agriculture, Spencer Dunham, Caro; winter term course in General Agriculture, Ben Nye, St. Joseph; Dairy Production, Elvin Click, Cassopolis; Dairy Manufacturing, Robert Asselin, Alpena; Poultry, Richard Anthony, Dowagiac; Agricultural Engineering, Marvin Katke, Lansing, and Thomas Moore, Bannister; Practical Floriculture, Mrs. Clara Slater, Lapeer.

Maybe This Is What You Want

Many Michigan peach growers welcomed the news that leaf-curl, a prevalent and destructive funguous disease, can be curbed by proper spraying. This information was revealed by Donald Cation, research assistant in plant pathology, in an article appearing in the last Quarterly Bulletin of 1935.

The author pointed out that the disease might attack peach trees three out of four years. By following simple rules for spraying, the disease can be prevented and the quality and quantity of fruit increased.

If you are interested in game management in Michigan and nearby localities, a recent volume, "Michigan Water-

fowl Treatment," by Dr. Miles David Pirnie, professor of zoology and director of the W. K. Kellogg Bird Sanctuary at Gull Lake, will be exceptionally valuable. The book is one of few in a comparatively new field and offers complete data on Michigan game conditions.

Waterfowl surveys were begun in 1928, and Dr. Pirnie's work is based on his extensive study at the sanctuary as a professor of zoology and as staff ornithologist for the Michigan Department of Conservation. The volume contains more than 300 pages and incorporates some 200 illustrations, most of which are from the author's personal collection.

Students of botany will welcome a textbook of mycology published during the last year by Dr. Ernst A. Bessey, professor of botany and dean of the graduate school. The book differs from the usual laboratory manual, as it doesn't only identify the various groups of fungi but (*Turn to page 14*)

Lawrence Distel Will Edit State News

Following the heaviest voting in campus history, Lawrence Distel, Lansing, Liberal Arts junior, was named editor of the Michigan State News in the annual all-college elections on March 19. David Christian, Liberal Arts junior from Woodland, was chosen to edit the 1937 college yearbook, the Wolverine. Other results of the balloting are as follows:

State News business manager: Donald O'Hara, East Lansing. Wolverine business manager: Fred Belen, Lansing.

Junior Ballot

Student Council: Ronald Garlock, Lansing; Robert Rosa, Schenectady, New York; Lee Henrikson, Detroit.

Union Board: Lois Sherman, Blissfield; James Harryman, Lansing; John Day, Cass City.

Sophomore Ballot

Student Council: Harvey Harrington, Harbor Springs; Lawrence Hamilton, Holly.

Union Board: Virginia Ackerman, Elkton; Joseph Lash, Ferndale.

Liberal Arts Board: Beverly Jane Smith, South Haven; Nelson Lash, Saginaw.

Freshman Ballot

Student Council: Gordon Publow, East Lansing.

Union Board: William Carpenter, Lansing.

President of Associated Women's Council: Jane Shaw, Royal Oak.

The Oldest Living Graduate

Presenting Daniel M. Strange, Class Of 1867; Says He'll Be At Founders' Day May 15

Daniel M. Strange, Grand Ledge, Michigan, who was graduated as one of the five members of the class of '67, ten years after the founding of Michigan State College in 1857, is hoping to witness the celebration of Founders' Day, May 15, on the campus.

His 91st birthday wasn't a major event for Mr. Strange, who was born March 4, 1845, and is the oldest living graduate of the college. Although he has been seriously ill, he is now recovering rapidly.

"I'm going to hang onto this a while longer," he declared.

Refers To Cane

He was referring to an intricately carved cane of yellowing coffeewood which Dr. Kedzie, who came to the college as an instructor in chemistry in 1863, had brought back from Mexico. After his death, his son, Frank Kedzie, decided to give the cane to the oldest living graduate of Michigan State College. On the handle is inscribed:

"To the Oldest Living Graduate of M. S. C. Daniel Strange, '67. Presented June, 1931.

"Why, I knew Frank Kedzie when he was a little boy. I recall when I went up to the college to register in '63. Afterwards I went over and had dinner at his father's house. Frank was seven then. His folks just got a new Webster's *Unabridged Dictionary*, and he said he could find any word I gave him. I picked out "crow." He turned to the back of the book where all the illustrations are together and looked until he found a picture of the bird. Underneath was the page number, and Frank turned to that page and found the picture of the crow. He showed me the word opposite, and he had it all right." Mr. Strange laughed. "I saw him a few years ago, and I told him:

"Frank, I think that's the smartest thing you ever did."

School Only In Summer

At the time when Mr. Strange attended Michigan State, school was open only during the summer. In the winter he earned his expenses, he says, by teaching in Portland, Saranac, Hastings, and Mason.

"I've always held," he stated, "that every boy should teach at least four terms after he's through with his school-

Daniel M. Strange, '67

Enjoys reminiscing about M. S. C., says he will be on the campus, May 17 . . . is standing beside the historic half-way stone.

ing. It's the one way I know to make what he's learned stick in his head for good."

Mr. Strange was also secretary to President T. C. Abbott, a post to which he was appointed at the beginning of his senior year.

Since his graduation, he has been a writer of verses, and is the author of two volumes in prose: *A Pioneer History of Eaton County* and *The Farmers' Tariff Manual*. He claims that he became interested in the latter type of writing while he was selling encyclopedias after he left college.

"I sold more encyclopedias than any person who ever lived," he laughed.

As a farmer, Mr. Strange has been prominent in developing fine apple orchards and giving an impetus to the highest development of state agriculture in his county.

150 Students Doing Graduate Work

Michigan State's graduate school has 150 students enrolled this term. Thirty of them seek doctor's degrees, 116 master's awards, and the remaining four are taking advanced courses, which, at a later date, may be applied to a graduate degree. Liberal Arts Division leads the list with nearly a third of the combined total.

Following is a summary of the ad-

vanced students, their degrees, and the departments in which they are doing work:

Ph. D. Candidates

Agriculture: soils, 1.

Applied Science: botany, 3; chemistry, 13; entomology, 1; physics, 1; zoology, 5; total, 23.

Liberal Arts: sociology, 2.

Veterinary Science: bacteriology, 4.

Master's Degree Candidates

Agriculture: animal husbandry, 1; dairy husbandry, 2; farm crops, 3; forestry, 1; horticulture, 3; poultry, 1; soils, 3; total, 13.

Applied Science: botany, 4; chemistry, 22; physics, 1; zoology, 4; total 31.

Engineering: chemical engineering, 3; civil engineering, 3; mechanical engineering, 1; total, 7.

Home Economics, 6.

Liberal Arts: art, 2; economics, 7; education, 10; English, 7; history, 3; mathematics, 7; sociology, 11; total, 47.

Veterinary Science: animal pathology, 2; bacteriology, 10; total, 12.

Alumni Day Reunions and Commencement

June 13, 14, and 15

Saturday, June 13

- Golden Anniversary Reunion Class of 1886 Induction into Patriarch's Club
- Silver Anniversary Reunion Class of 1911
- Five Year Reunions Classes of 1931 - 1926 - 1921 - 1916 - 1906 - 1901 - 1896 - 1891 - 1881 - 1876
- Sunset Supper—6:00 p. m.

Sunday, June 14

Baccalaureate Address

Monday, June 15

Commencement Exercises

Plan to return for Alumni Day, Saturday, June 13. Write for a complete program.

Membership in the Alumni Association, starting July 1, will be \$1 a year for everyone, with the RECORD being mailed by the college for the present.

Coming From Many States

Michigan Leads Enrollment With 3,701; New York, Second; Illinois, Third

Thirty-seven states, the District of Columbia, and four foreign countries are represented in the student body at Michigan State College. According to accumulative figures issued March 1 by Miss Elida Yakeley, college registrar, Michigan leads with 3,701 students, New York is second with 162, and Illinois, third with 66.

The enrollment, according to states and countries, follows:

Alabama	1	Iowa	2
Arizona	2	Kansas	4
Arkansas	2	Kentucky	1
California	6	Louisiana	1
Colorado	3	Maine	4
Connecticut	6	Maryland	2
Delaware	2	Massachusetts	13
Florida	2	Michigan	3701
Illinois	66	Minnesota	5
Indiana	33	Mississippi	2

Debaters Establish a Record

Michigan State debaters recently established a new record. They advanced farther in the National Pi Kappa Delta tournament than any previous Michigan State delegation in a national contest. Thirty-six other colleges and universities were represented at the convention in Houston, Texas, during the week of March 30.

Before the Spartans were eliminated in the finals, the women's team, coached by O. J. Drake, speech instructor, had won two debates, and the men's squad, under the tutelage of J. D. Menchhofer, assistant professor of speech, had talked its way to four victories.

The Houston tournament was not the only high point of the season. In the Intercollegiate contests at Albion on February 14 the men's team won twice on the negative side and lost twice upholding the affirmative. The women's team entered the Annual Michigan Intercollegiate tournament at Kalamazoo, February 21-22, and ended up as part of an odd eight way tie in which each school represented in the meeting won and lost two debates. Michigan State's entry in the Michigan Oratorical contest, Donald C. Hittle, East Lansing, placed among the first four in the preliminary race, but was eliminated in the final trials.

Montana	1	Utah	2
Nevada	1	Vermont	3
New Jersey	19	Virginia	3

Comments From The President

(Continued from page 2)

and interdependent, became associated side by side in the same organization.

The third factor in the more complete development of the college was the organization in 1895 of the Home Economics Division, which has contributed much to improve conditions of home living in both rural and urban areas of the state. Although study of science had been basic from the very beginning, a Division of Applied Science with a four-year course was not formally established until 1921. Science was one of the chief means of teaching agriculture up to 1890, when agricultural textbooks began to appear in adequate supply. Applied Science is of paramount importance, for it provides basic foundations for the more than a dozen technical courses offered by the college and has made easily possible the establishment of courses in Veterinary Medicine, Medical Biology, Physical Education, and Police Administration.

While the Liberal Arts Division with its several courses was not formally organized until 1924, the subjects contained therein had for a long time been an essential factor for all courses. The division includes the teaching of English, Modern Languages, Mathematics, History, Political Science, Economics, Sociology, Music, and Art. Realization of the need for these subjects as a liberal and cultural supplement to Agriculture, Engineering, Home Economics—in fact, all technical courses—is growing constantly. Their presence either alone or in conjunction with the teaching of science has made it possible to offer strong courses in Business Administration, Hotel Administration, etc.

There has been no specific attempt to organize a Liberal Arts school within the college or to wander too far from

the primary aims of the institution. A careful regrouping of the Science and Liberal Arts subjects already in operation has merely made possible a wider range of courses to meet the varying needs of students and thereby render a more complete and satisfactory service to the supporters of the college at very little additional cost. The college continues to function in accordance with the federal and state organic acts upon which it was founded.

Their Works Remain As Monuments

Mrs. Ella M. Kedzie

One of the former faculty members of Michigan State College, and a resident of East Lansing for fifty-two years, to whose home many graduates made annual visits, will be missed when alumni gather for reunions in June. She is Mrs. Ella M. Kedzie, who died last fall after several years of ill health.

Mrs. Kedzie was the sister-in-law of Dr. Frank Kedzie, former president of the college. Her two children, Dr. W. Roscoe Kedzie, of Eaton Rapids, and Mrs. Louis S. Plant, of East Lansing, are alumni of Michigan State College.

Mrs. Kedzie was a graduate of Kansas State College, in Manhattan, Kansas, her birthplace. In 1876 she was married to William S. Kedzie, professor of chemistry at that college, who later became a member of the Oberlin College staff. Following the death of her husband she became head of the Art Department at Olivet College, and eight years later joined the faculty of Michigan State College.

Robert D. Maltby, '04

Robert D. Maltby, '04, southern regional agent for the Vocational Education Division of the United States Office of Education, died February 15, in the Georgetown University Hospital. Mr. Maltby was a resident of Ballston, Virginia, and was active as a teacher, supervisor, administrator, and Federal agent in the development of vocational education programs since 1906.

Shortly after his graduation from Michigan Agricultural College, now M. S. C., Mr. Maltby began his teaching career as a member of the staff of the Baron de Birsch School, of New Jersey. In 1910 he became head of the department of Animal Husbandry at the University of Florida. Subsequently his work took him to South Jersey and then to Georgia where he organized the first vocational program in that state.

Mr. Maltby was called to the Board of Vocational Education in 1920. Since that time he acted (Turn to page 13)

William Austin, '37

To get money for an education Mr. Austin repairs clocks. He's shown here checking the mechanics of the master clock in Union building.

abled him not only to service college clocks, but to supervise similar systems in Lansing high schools and industrial plants. His skill is not necessarily confined to timepieces, but includes bell systems and fire alarms. For six years he has made his hobby pay for his high school and college education.

That skull cleaning job certainly is out of the ordinary. In preparation for a new course in mammalogy to be added to the curriculum of the Zoology Department next year, a collection of animal skulls is being made. Walter Obenauf, Muskegon Heights, Michigan, a senior in Applied Science, is getting the animal skulls ready for class and display purposes.

Hundreds of students are paying portions of their college expenses this year from funds of the National Youth Administration. At Michigan State College this year there have been 520 working in 287 federal projects on the campus in offices and on the grounds. One-fourth of the students receiving N. Y. A. checks are girls.

The ingenuity that characterizes those who have the most unusual means of earning money while in school is more interesting and probably more permanent.

Two Bay City, Michigan, girls are in partnership in a clothing store over

A, and played on the freshman football team last fall. Yet he finds time to sell hosiery, has a part time job on the campus, and tutors less successful students. Although he had no previous preparation in Spanish before coming to college, he finds a ready sale for his time in brushing up the rough spots in Spanish as it should be spoken.

Then there is that horse burying job. That is history now, but the grave is still marked, for the horse was famous. A Percheron mare, Maple Grove Leila, of the college's valuable stock, died a year ago. Harry Wilt, whose home is in Coldwater, Michigan, took on the undertaker's part to provide a suitable burial and collected a fee for his work. At present he has an unusual job. He finds jobs for other students, as a college service to the deserving.

Inventors play their part in augmenting ready cash for school expenses. New tools and apparatus are being invented for use in Veterinary Science by Grayson Eidt, veterinary course junior from Mt. Pleasant, Michigan. The grasshopper plague of 1935 added income for Ralph R. McNitt, Okemos, Michigan. He invented equipment for spreading poison bait to control the pests.

There are some barbers among the students. One is Paul Burger, Brooklyn, New York, who plies comb and scissors in a public shop. Bob Peterson, Oak Park, Illinois, has a practically complete monopoly of the trade of his fraternity brothers. The hours are somewhat irregular, however. Sometimes the barbering job needs to be done as early as 6 A. M., while at (Turn to page 15)

So They Become Industrious

Seeking a Liberal Education Is Their Motive For Finding a Job Providing Money

Fifty per cent of the students on the campus of Michigan State College have found ways and means of defeating that bugbear of college life—how to meet expenses. The processes by which these young men and women are defeating their personal depressions make fiction-like truths of their abilities to get along in life.

Bury a horse, resilver party shoes, run a store on a partnership basis, complete inventions, clean skulls? Michigan State College students are willing. In fact these jobs and others have been done and are being done by them to pay tuition fees, buy books, clothes, food, and lodging.

Take the case of William Austin, a Lansing, Michigan, junior. His chief duty on the campus is to service all timepieces in the Union building so that co-eds using that building as a dormitory can avoid late minutes.

For two summers Austin was employed by jewelry and recorder firms, and his training in that field has en-

abled him not only to service college clocks, but to supervise similar systems in Lansing high schools and industrial plants. His skill is not necessarily confined to timepieces, but includes bell systems and fire alarms. For six years he has made his hobby pay for his high school and college education.

W. K. Kellogg made a donation to the college more than a year ago that has made work for one student. Sylvester Graff, a junior in Veterinary Science whose home is in Hart, Michigan, is an experienced jockey and has ridden on some of the best race tracks in the country. Kellogg's gift was that of two Arabian horses, a mare, and a stallion. They need exercise and Graff rides them with pleasure, for it means training and practice and having pocket money for school expenses.

There is "get up and go" in the makeup of Jack Lacey, a freshman in Business Administration from Ashland, Ohio. He sends home grades of straight

Ruth Halladay, '37

Doing her own cooking is one of Miss Halladay's ways of making it financially easier to acquire a college education. Here she is shown making practical use of her training in Home Economics, the department in which she is majoring.

Enthusiasm In Alumni Clubs

Mr. Stewart Attends Meetings In Various Cities; Reports "More Interest Than Ever"

At no time in the last five years have alumni shown so much interest in meetings as in the past few months. Revived interest in group meetings has made it necessary for Secretary Glen Stewart to travel almost constantly to fill engagements.

Flint—March 3.

To Lewis D. Snider, '29, who was appointed program chairman by the president of the Flint Junior Chamber of Commerce, goes much of the credit for publicizing Michigan State College in that vicinity. To him also goes much of the credit for the successful "Michigan State Night," attended by more than one hundred persons.

Headliners on the program were John A. Hannah, secretary of the college, Charles Bachman, Spartan football coach, and Glen Stewart, who acted as master of ceremonies. The women of Flint have organized an alumnae league branch under the guidance of Miss Thelma Plow, '35.

Berrien County—March 18.

Berrien County alumni sponsored the annual "Michigan State Night" at the Jefferson School in St. Joseph with nearly one hundred alumni and friends present. The program was in charge of Past-President Frank L. Daniels, '27, in the absence of Art Knoblauch, '29, president. The main speakers, Coach Charles Bachman and Secretary Stewart, summarized activities at Michigan State College, and urged alumni cooperation in securing much needed improvements. Arthur W. Edison, '12, of Berrien Springs, was elected to direct the club during the coming year, and Earl Steimle, '32, of Benton Harbor, was named secretary.

Toledo, Ohio—March 20.

Threatening floods failed to dampen the enthusiasm of members of the Toledo Alumni Club, who attended the annual meeting at Toledo University. Secretary Stewart explained the changes, policies, and needs of Michigan State College, and exhibited colored movies of the campus and football games. Mrs. Neenah Mullen Sweitzer, w'10, was in charge of arrangements for the meeting. The following officers were elected: Dr. W. P. S. Hall, '20, president; Mrs.

Clara H. Grigsby, '07, vice president; and C. E. Johnson, '23, secretary.

Lafayette, Indiana—March 28.

Silent tribute to Professor W. C. Latta, one of State's most loyal alumni who died in December, was paid by members of the Michigan State College Alumni Club of Indiana, at its annual meeting at the Purdue Union. James Troop, class of '78, was honored for his work in agriculture. E. B. Baugh, Purdue alumni secretary, welcomed the forty Spartans to the Purdue campus.

Arrangements for the affair were in charge of Daniel DenUyl, '22, of the Purdue Forestry Department, and Clifford Skiver, '21, of the Purdue Extension staff. The next annual meeting will be held at Indianapolis, and Joseph F. Ryan, '18, of that city, was elected president, and Mrs. Dorothy Curtis Doyle, '21, of Purdue University, was chosen secretary.

Rochester, N. Y.—April 1.

More than thirty enthusiastic alumni and their friends met in Rochester for dinner and an evening of reminiscing. Secretary Stewart conducted the meeting, and after a talk and a program of movies, he brought out many interesting sidelights concerning the college in an informal question-box period. Because of the splendid interest shown by the present officers, Calvin A. Brown, '23, and Harlan R. Bigham, '28, they were re-elected president and secretary, respectively.

On April 2, in company with D. A. "Sam" Brice, '13, Secretary Stewart visited three high schools in Rochester to answer student questions concerning Michigan State College.

Niagara Falls, N. Y.—April 2.

With eleven undergraduates from Niagara Falls acting as publicity agents, it is only natural to expect increasing interest in Michigan State College among the high school graduates of that city. In conjunction with Secretary Stewart's visit, several State students and a number of graduates arranged for the showing of colored movies of the Michigan State College campus in the high school auditorium. More than one hundred students attended the meeting, and Secretary Stewart was kept busy answering their inquiries.

Buffalo, N. Y.—April 3.

Cold weather and high water couldn't keep some fifty Buffalo alumni from making their April 3 meeting a success. The platform of the group in-

cluded the following planks: showing of the colored campus movies and M. S. C. vs. Michigan football game picture, both designed to drive apathy from the bones and stir up dormant loyalty; pep talk by Al Bibbins, who never misses a bet to boost M. S. C. and round up some good students and athletes; a fine dinner prepared especially for the crowd by the Chef of the Touraine Hotel; speech by Mr. Stewart; poll tax of \$1.25 a head; parents of undergraduates on a Dutch treat basis and prospective students free. John J. Harris, '12, and C. W. Knapp, '12, president and secretary, respectively, were in charge of arrangements.

Officers for the following year are: O. D. Dales, '04, of Niagara Falls, president, and George L. Merkle, '33, of Buffalo, secretary. Sufficient funds were collected during the evening to place a large oil-tinted aerial picture of the campus in one of the leading high schools of Buffalo.

During his stay in Buffalo, Secretary Stewart spoke to the assembly at Technical High School where Gordon Ryther, '12, is assistant principal. He also represented Michigan State College at the College Day Conference held at Bennett High School. More than forty colleges and universities were represented.

Cleveland, Ohio—April 4.

With the movie projector almost hot from constant use, Secretary Stewart arrived in Cleveland, April 4, to find nearly fifty alumni and friends gathered for the annual meeting of the Cleveland club. Much interest was evinced in the movies shown by Mr. Stewart, and President George Francisco, '02, expressed the hope that the college would make similar movies available to alumni clubs each year. The following officers were elected: L. L. Appleyard, '00, president; Roy LaDue, '09, vice president; Mrs. Amy Pearsol, '17, secretary; and Mrs. P. O. Fleming, '19, treasurer.

Cincinnati, Ohio—April 21.

Not to be outdone by sixty other colleges and universities holding alumni meetings in Cincinnati during the annual convention of the American Alumni Council, more than thirty loyal M. S. C. alumni met in down-town Cincinnati on Tuesday, April 21. Myrl Bottomley, '16, was in charge of arrangements for the party, and Secretary Stewart was the main speaker.

An anonymous alumnus of the College of the City of New York recently gave \$100,000 to the student aid fund of the college.

One of the chief concerns of Dean F. T. Mitchell is to help students adjust their social problems. William Chandler, '38, seeks advice.

Chatting About Campus Life

(Continued from page 5)

meals and parties and things. I think it would be swell!" Jack was enthusiastic.

"But you haven't told me about the other things yet, the Independents' organization, the dating bureau and what not. You know, the Independents were talking about having an organization when I was in school; but they just never got together. How is it going, anyway? Is it going to cut in on fraternity membership?" Carl asked.

"No, Dean Mitchell says it won't. Most of the Independents who are interested in an organization would have joined a fraternity if they had had the money. As it is, they are organized into wards blocked off in different sections of East Lansing, and they have parties, intramural sports, dancing classes, dramatics, and what not. The Independent girls are organizing too.

"The dating bureau in the Union was another thing," Jack went on. "One of the fellows in the house tried it out and he had a dilly of a good time. He had to fill out a blank telling how tall he was and what color his eyes were and whether he preferred blonds or brunettes, how much he had danced, and so forth. The girl in charge of the bureau matched it with a similar blank from some girl and told him who the girl was. Then he had to call her by telephone and ask her to the party."

"This dating bureau was only for the one party, though?" Carl asked.

"Yes, but it isn't as hard to get acquainted here as you said it was when you were a freshman. There are

all-college mixers, freshman week, and tea dances at the Union twice a week during most of the year. There are parties where you can stag. And then there is the Student Club organized last spring by the Y directors. This club has informal parties every Friday night and once in a while a dance. I don't think anyone needs to be lonesome up here if he doesn't want to be." Jack went over to the bookcase. "If you want to know more

about the social activities at the college I'll show you some State News stories about the Mortar Board lecture series on social life."

"What are those, etiquette lectures?"

"Well, yes; but they were more similar to discussions on what to talk about, how to make a good first impression, and student-faculty relationships. The story I am looking for was about the lectures on the ideal co-ed and the ideal college man. Here you are." Jack pulled from a stack of papers a State News and handed it to Carl.

"Gentlemen Prefer Brunettes," the grad read.

"Yes," Jack laughed. "Prof. R. S. Linton, in the Education Department, talked on the ideal co-ed. He made a survey of 100 men to get their ideas and most of them voted for brunettes. He didn't ask me, though, but I agree. Are you down where it lists the traits of an ideal co-ed yet?"

Carl read, "...poise, intelligence, neatness, sociability, femininity, refinement, patience, promptness, sense of humor, and the ability to dance and cook..." Sounds all right," he said. "So you object to highly colored fingernails and the use of liquor by girls?" Carl was reading further.

"Right," Jack said emphatically. "Read what Mrs. W. E. Bunney, a sorority patroness, said about the ideal college man."

"The ideal college man is one who is honest, dependable in a crisis, immaculate in his appearance, scholarly without talking about it, in short, a he-man but a gentleman," Carl read. "That must have been an interesting lecture. Who gave the other talks on the series?"

"In another part of the story you'll find their names."

"Do you know most of the faculty members personally?" Carl asked, after looking over the list. "That's one of the best things I got out of college, knowing these older men and women. But now I suppose the college is so large it is harder to meet them."

"Oh, I don't know," Jack said. "It depends on who the faculty member is and how the student makes the contact. I think many members of the faculty really put themselves out to encourage student friendships. I know at least one who makes it a point to invite students from his classes to drop in at his home on Sunday afternoons. Other professors take different ways of becoming acquainted with the students."

"I think you realize more how much faculty friendship means the longer you go to school," Carl broke in. "Now when I come back, there are scarcely any alumni around that I knew in school; but there are still many faculty members who extend friendly greetings and with whom I enjoy spending as much time as possible."

"That's it," Jack agreed. "And it seems to me that just the last year or two the faculty members have shown more interest in meeting the students and seeing that the students participate in social activities. Secretary Hannah presented it to the students quite clearly when he gave his talk on the Mortar Board social series. Here, Carl, read this quotation in the State News before you leave."

"If you have not acquired the ability to feel at home among people of refinement by the end of your college course, it has been practically valueless to you, no matter how much knowledge you may have acquired otherwise," Carl read. "That was my idea exactly," Carl commented. "And that was why I asked you about the social life at Michigan State. Sometimes an old grad wonders what is going on at his Alma Mater."

Robey Named Electrical Inspector

Harvey D. Robey, '34, was recently named electrical inspector for Ingham County by the Michigan Electrical Administrative Board. He is the son of O. E. Robey, '13, extension specialist in Agricultural Engineering at the college, and is a graduate of the Electrical Engineering Division.

Robey's new duties will consist mainly of inspection of all electrical construction in the county outside of the city of Lansing.

Baseball . . . Track . . . Tennis

These Sports, Along With Golf And Spring Football, Provide Keen Competition At State

Never in the history of the college has there been such a huge turnout for spring sports as has greeted the coaching staff this year. The increased enrollment has resulted in record numbers of athletes trying out for the various teams.

This year there are varsity teams in baseball, track and field, golf and tennis. Schedules call for the teams to meet the stiffest competition that can be found in the middle west and east. In addition, Athletic Director Ralph H. Young is carrying on a comprehensive program for freshmen. Any student at the college who desires to participate in athletics finds many outlets for his energy.

The baseball team opened the campaign in an auspicious manner, making a complete sweep of all the games played on the southern trip. Coach John Kobs' charges lost three decisions to the weather man, but were able to overcome their collegiate rivals with ease. They defeated Wake Forest, 4-1; North Carolina State, 13-5; Newberry College,

Steve Sebo

His ability as a catcher makes him one of the main cogs in Coach John Kobs' baseball team.

5-0; and Clemson College, 18-0.

Coach Kobs was well satisfied with the results, especially as he had a completely new infield, one inexperienced outfielder, and only one veteran pitcher. Sterling catching by Steve Sebo, some excellent pitching by Warren (Lefty) Walters, a Buffalo, N. Y. sophomore who promises to give State some great pitching in the next three seasons, and all-around hitting ability kept the team in winning stride.

Coach Young has another strong list of candidates for his track and field team. The Spartans produced a dual meeting victory over Marquette indoors in the late stages of the winter, won a university class medley distance relay at the Butler relays in record breaking time, and clearly showed signs of successfully defending its state championship in May.

Track is laboring under a handicap this spring. Due to adverse weather conditions that prevailed last winter, it has been impossible to put the new track in condition for the early spring meets and practice. Coach Young is happy, though, for he knows the new layout, located outside the stadium walls, will be one of the best in the nation when it is finally completed. It will have two 220-yard straight-aways, the latest in the way of field event pits, and have other features that are in line with the latest developments in the sport.

Football is at a feverish pitch this

spring. With four starting line jobs and at least two starting backfield jobs to be vacated by seniors this year, there is a hot chase on for the berths by aspiring freshmen and reserves from last year's squad. Coach Charley Bachman was delighted with a record breaking turnout of ninety candidates this spring.

Generally speaking, the new material compares favorably with the boys who have helped give State the winning teams of the last two years. It is a little early to be making predictions, but Coach Charley Bachman is not wearing a frown. He has a likely looking squad of huskies, many of whom did not report for either varsity or freshman football last fall.

Tennis has the services of the first three men of last year's squad while golf is favored with more strength than ever before. Tom Brand, amateur champion of West Virginia, is a sophomore who is attracting a lot of attention. Included among the freshmen track candidates are Wilbur Greer and William Strehl, two boys who won dash championships in Michigan. Coach Young rates them the best freshmen sprinters he has ever coached and has expressed the hope that Greer, at least, will make this year's Olympic team. He has already beaten the 220-yard freshman mark that the great Fred Alderman hung up here.

Election Time Rolls 'Round

(Continued from page 2)

B. S. degree; home economics teacher, 1928-'31, Flint South Junior High; home economics teacher, Lowell, Michigan, 1931-'32; married Edwin S. James, 1930; member, Alpha Xi Delta, Omicron Nu, and State Home Economics Club; graduated from Merrill Palmer school; present vice president, Flint Alumni Club; residence, 625 Thayer Street, Flint, Michigan.

Clarence Van Lopik, '33, a native of Grand Haven; has been assistant steward of Statler Hotel, Detroit, now a sales promotion man for same Hotel; recently elected to the Board of Directors of the M. S. C. Alumni Club of Detroit; former editor of Michigan State News; member of Lambda Chi Alpha, Pi Delta Epsilon, Excalibur, Board of Publications, and Student Council.

Mrs. Pearl Kedzie Plant, '98, Home Economics Division; member, Alpha Phi; wife of L. C. Plant, professor of mathematics; two children, Robert and Margaret, graduates of the college; residence, 231 Oakhill Avenue, East Lansing, Michigan.

Pick Your Game

Alumni who may be baseball fans still have plenty of time to see the Spartan team in action. Eleven games remain on the schedule for the current season, including six home games. Here they are:

- May 13—Colgate University, at Hamilton, N. Y.
- May 14—Cornell University, at Ithaca, N. Y.
- May 16—Michigan State Normal at Ypsilanti.
- May 22—Ohio State University, home.
- May 23—Ohio State University, home.
- May 29—University of Michigan, at Ann Arbor.
- May 30—University of Michigan, home.
- June 3—University of Iowa, home.
- June 4—University of Iowa, home.
- June 6—University of Notre Dame, at South Bend.
- June 13—Western State Teachers College, home.

Track Schedule

If you're interested in track and field events, you can still see M. S. C. in action. There are two major meets on the campus and five in other parts of the country. Here's the remaining schedule:

Saturday, May 16—Twenty-first Annual State Intercollegiate at M. S. C.

Saturday, May 23 — Thirtieth Annual State Interscholastic at M. S. C.

Saturday, May 30—Sixtieth Annual I. C. A. A. A. A. at Philadelphia.

Friday, June 5—Eleventh Annual Central Intercollegiate at Milwaukee.

Saturday, June 13—Third Annual West Michigan A. A. U. at Grand Rapids.

Saturday, June 20 — Fifteenth Annual National Collegiate at Chicago.

Saturday, June 27 — Thirteenth Annual Michigan A. A. U. at Detroit.

Their Works Remain As Monuments

(Continued from page 8)

as agricultural education agent for twelve southern states.

He was a native of Brighton, Michigan.

Ray R. Tower, '03

Ray R. Tower, '03, a former Michigan State College athlete and a student of chemistry under the late Professor Frank Kedzie, died at the George Washington University Hospital in Washington, D. C., March 21. During his undergraduate days Mr. Tower was popularly known as "Uncle Ray," and was active on the Spartan football, basketball, and baseball teams.

Following his graduation from college, Mr. Tower spent nineteen years as chemist with several leading paint manufacturers. While serving as superintendent of a paint firm in Providence, Rhode Island, he was stricken with paint poisoning and was forced to find outdoor employment.

Beginning as a common laborer on a Florida golf course, Mr. Tower was soon promoted to greenskeeper and general manager of the course. The depression forced him from this position, and slightly more than a year ago he received an appointment to the Soil Conservation Service in Washington, which position he held until his death.

Coming To The Tenth Anniversary?

All roads lead to East Lansing on May 17. Of course, they do any time, but on that day, particularly, jump into your car for a spin to the College town where the Peoples Church is celebrating the 10th Anniversary of its modern building, completed May 16, 1926.

Naturally, it will be a great day to rub elbows with old church and college friends, but the committee has also planned a program.

Part of the program includes a sermon by Dr. N. A. McCune, at 10:30, a Glee Club Concert, directed by Professor Fred Patton, at 7:30 in the evening, and the presentation of gifts to the Tenth Birthday Fund.

The idea of a community church was conceived about twenty-five years ago by a group of four professors. Now four denominations support the church, and the Y. M. C. A. and Y. W. C. A. programs are incorporated in the organization. The Peoples Church was built with the plan of extending student programs. Nearly 6,000 people come and go each week.

State Enters Olympic Regional Tryouts

All amateur athletes dream of it; one in a hundred tries for it; an estimated one in a thousand makes the United States Olympic Track and Field team, and yet Michigan State College has a good chance of being represented once, twice, yes, even three or four times, in the races to be run in Berlin this summer.

There are a half dozen Spartans who merit national recognition in their events. Thomas C. Ottey, who covered himself with medals and his college with glory during his four years at Michigan State, qualified and ran in the 1932 Olympics at Los Angeles. Ottey took first place in the final United States tryouts for the 10,000 meter race prior to the '32 Olympics, and bids fair to make the grade for the 1936 team. He was graduated in '35 and now lives in Philadelphia.

Earnest Crosbie, 50,000 meter walk specialist, was rated as America's number one walker in 1935. In the annual national championship walks since his Olympic debut in 1932, Crosbie has been defeated each time by a Canadian, thus he actually is the best American in this event. He attended Michigan State

in '33 and '34, and resides in East Lansing.

In addition to these veterans there are three Spartans in school who deserve mention as Olympic material. Francis Dittrich, Detroit, co-captain of State's track team this year, will enter the broad jump event. Dittrich has been chosen as one of the twenty-seven physical education students to represent the United States in the International Physical Education Congress to be held at Berlin in conjunction with the Olympic games. Consequently he is assured of attendance.

James H. Wright, Berkley, Physical Education sophomore, was named for the All American Track and Field team last year in the 800 meter distance, and Robert W. Hill, Flint, has proved himself a threat both in the steeplechase and the 400 meter hurdles. These men plan to enter the midwest regional tryouts to be held in Milwaukee in June. If successful in Milwaukee, they will be sent to New York for the national finals.

Michigan State's Olympic adventures date back to 1904 when Harry E. Moon competed in St. Louis in sprints and broad jump. From 1904 there is a long gap in the story, and the next Spartan to enter the international contests was Fred P. Alderman who journeyed to Amsterdam in 1928. Alderman took part in the 1600 meter relay, and his team won the race and established a new world's record.

Francis Dittrich

Here's the co-captain of State's track team. Recently he was chosen as one of twenty-seven physical education students to represent the United States in the International Physical Education Congress to be held in conjunction with the Olympics in Berlin this summer.

—And Speaking Of Scholarships

55 M. S. C. Students Get All A's And a Sprinkling Of B's At The End Of Winter Term

Of the fifty-five students at Michigan State College who attained exceptional scholastic records for the winter quarter, forty-nine represent various districts in Michigan. Of the total number, fifteen received an "all-A" average, four others received grades of "A" in all academic subjects, and thirty-five received "A" in all subjects but one, and that one a "B".

Students who achieved the coveted "all-A" record and the division in which they are enrolled follow:

Liberal Arts: Eleanor Florence Andem, East Lansing; John H. Dart, Mason; Marvita B. Kreag, Lansing; T. R. Martin, Lansing; George Ann Shaw, East Lansing; and Helen Margaret Wilson, Traverse City.

Applied Science: Robert John Bessey, East Lansing; Mrs. Katherine B. Bradt, Lansing; Charles T. Knepper, Waynesboro, Pennsylvania; Curtis Worth White, East Lansing; and Louis A. Wiesner, Alpena.

Physical Education: Daniel J. Reck, Lansing.

Business Administration: Glenn C. Breitenwischer, Manchester; and John A. Lacey, Ashland, Ohio.

Agriculture: Morell B. Russell, Burr Oak.

Home Economics: Gertrude R. Seckinger, Clarks Lake.

The following four students received "A" in all academic subjects:

Engineering: James Morely Ballenger, Flint; Torpja Alex Lapenas, Scottville.

Liberal Arts: Jane Edith Shaw, East Lansing.

Business Administration: Virginia B. Thompson, Detroit.

Those receiving grades of "A" in all subjects except one and that a "B" are:

Liberal Arts: Isabel H. Beckett, Bay City; Joyce W. Bluel, Wauwautsa, Wisconsin; Bray P. Bradley, Eaton Rapids; Arnold Bruce Come, Lansing; Warren L. Fleischauer, Lansing; Frances Amanda Fowler, Detroit; Dorothea E. Hilliard, Lansing; Lela M. Keener, Lansing; Alice B. Korstange, Marne; Martin L. Krauss, Lansing; Robert Harold Martin, Lansing; Harold M. Richter, Manchester, Connecticut; Beatrice L. Tinglan, Vassar; Lois Thompson Tyler, Lansing; Jean Smith Warren, Bancroft; and Alice G. Wrigglesworth, Howell.

Applied Science: Phillip J. Baker, Lansing; Alice E. Huse, Detroit; Virginia Lucille Ross, Lansing; and Rosemary B. Thompson, Buchanan.

Agriculture: Frank O. W. Anderson, East Lansing; Morris Edwin Austin, Galesburg; Clare A. Becker, Mt. Morris; and George Hyatt, Manitou Beach.

Engineering: Frank G. Dewell, Detroit; Arthur E. LaRocque, Jamestown, New York; William E. Melching, East Lansing; and Bruce E. Warner, Mt. Clemens.

Home Economics: Evelyn E. Craun, Jackson; Josephine Gardner, East Lansing; Edith Johnson, Iron River; and Elizabeth Keegstra, Grand Rapids.

Business Administration: Joseph R. Vickers, Vulcan.

Forestry: Earl J. Hodgkins, Wayne.

Veterinary Medicine: Robert Ferber, Flushing, New York

Maybe This Is What You Want

(Continued from page 6)

covers fully the histories and relations of the more important families.

The volume is the product of many years of research and study, having been begun in 1915, at which time the author felt his knowledge of the subject was not sufficient. In 1930 Doctor Bessey began the book anew, revising the sections.

In answer to questions regarding the history of silk culture and the economic soundness of such an industry in the United States, an article, "Silk Production," by Professor Ray Hutson, of the Entomology Department, and F. C. Bradford, associate professor of Horticulture, appears in the first Quarterly Bulletin of 1936.

The co-authors trace the development of the industry from early times to now and cite information from surveys which question the adaptability of the industry to the United States.

"It does not appear," writes the authors, "from the available evidence that silk-growing offers promise of establishment in Michigan."

One of the most active research workers in the Geology Department is Professor S. G. Bergquist. A recent study he has made of the "Sand Dunes of the Grand Sable Area of Lake Superior" will soon be published, and a survey of "Cambrian-Ozarkian Contact

in Alger County," conducted by him, has been completed. Professor Bergquist's latest venture in the field of research is a problem dealing with the "Occurrence of Spore Coal in the Williamston Basin." In this work he is collaborating with the paleo-botanist at Illinois.

Where and how many of the cities, towns, and localities of Michigan received their names is the interesting topic of toponomy research being done by Paul C. Morrison, instructor in geography. His findings will be published soon.

Know Where These Athletes Are?

Lost, strayed, or stolen—the addresses of many former Spartan athletes. If you know the whereabouts of these men and can supply their full names please write to Lyman L. Frimodig, assistant athletic director, at the college gymnasium. Alumni cooperation is necessary to complete the mailing list of that department.

The names of those men for whom no address is recorded follow:

- 1878: Alphens L. Kerr, James P. Lewis.
 - 1885: J. L. Morris.
 - 1886: Walter E. Gammon.
 - 1887: Robert W. McCullough, H. G. Sheppard.
 - 1888: W. C. Clark, W. L. Learned, Robert H. Stanley, Dr. Herbert Thurtell, George M. Van Atta.
 - 1889: H. L. Avery.
 - 1890: J. H. Hooper, Arthur C. Perrin, J. R. Stack, Earl D. Weideman, — Wheaton.
 - 1891: Samuel Boyd, C. Perrin, Fred Stone.
 - 1892: Frank Bauerle, Edwin W. Davendorf, Robert D. Gardner, Edward C. Tryon.
 - 1893: P. A. Barlow, — Madden, Arthur H. Munn.
 - 1894: Hugh M. Mulheron.
 - 1895: Joseph Beauvais, Dr. William Bernhart, Charles Harmon, Fred W. Herbert, Harry R. Parish, Charles E. Pork.
 - 1896: Reuben E. Bateson, — Bishop, Joseph B. Brady, L. Brown, — Paton, William A. Rider.
 - 1897: Albert E. Brown, Scott Elliott, Albert E. Hurley, Oswald H. Reed, Clarence R. Tock, Frank Yehena.
 - 1898: W. H. Marsh, J. H. Vanderstaple, — Walker.
 - 1899: Charles H. Adams, A. C. Clark, Charles C. Eltman, Leroy B. King, G. D. Miller, R. M. Osborn, E. W. Pursel, William E. Russell.
 - 1900: Charles G. Tate.
 - 1901: Rollo L. Bigelow, Roy L. Brown, Earl A. Brown, Fred S. Curtis, Delmar B. Finch, Daniel W. Hickok, Samuel J. Kennedy, Aldrich L. McLouth, Franklin E. Olsen, Frank M. Owen, — Prentiss, Wilfred Picamore, Earl J. Smith, Lawrence H. Taylor.
 - 1902: William J. Boone, Harry L. Kimball, William F. Neibling, H. P. Weydemeyer.
 - 1903: Herbert Barrington, Pearce B. Bland, James A. Cooper, John A. Frazer, — Hillman, Ray Himebaugh, Karl P. Hodges, R. M. Kedzie, — Malone, F. S. Shelton.
- (To be continued in the June issue of the Record)

"CLOSE BESIDE THE WINDING CEDAR"

Carl Sandburg's "American Songbag," a collection of colorful historical ballads, will provide the theme for the annual Water Carnival, highlight of spring term activities. The theme, selected by a faculty committee from ideas submitted by college students, was suggested by David Ruhe, of Allentown, Pennsylvania, a senior in the Applied Science Division.

The event is held each year on the Red Cedar River, and each fraternity and sorority of the campus is represented by appropriate floats. The announcement that Ruhe's theme had been selected not only makes him the winner of a cash prize, but also makes him an ex-officio member of the carnival committee.

* * *

Eleven junior engineering students whose scholastic averages placed them in the upper eighth of their class, were recently initiated into Tau Beta Pi, national honorary engineering society. The initiates were: Bernard F. Benning, Niles; Harold N. Bogart, Detroit; William K. Gibbs, Laingsburg; John R. Hamman, Hartford; Jack E. LaBelle, East Lansing; Arthur E. LaRoque, Jamestown, N. Y.; George L. Love, Farmington; Robert A. Russell, Bangor; John M. Sangster, East Lansing; A. Edward Ward, Lansing; and Harold J. Whitman, Benton Harbor.

* * *

Student talent, rather than professional, will provide entertainment for local music lovers during the spring term, when advanced pupils in the music division present the annual series of recitals. The first performance was presented April 13 by pupils of Lewis Richards, Fred Patton, Michael Press, and Alexander Shuster, professors in the Michigan State College Music Department. The programs will continue each Monday evening throughout the term.

* * *

Continuing its policy of maintaining the campus of Michigan State College as one of the beauty spots of the state, the buildings and grounds department of the school expect the arrival of a carload of trees and shrubs. When these are planted, every variety of shrubs adaptable to this climate will be represented on the campus. Professor Fields, of the Entomology Department, assisted with the order.

The regular members of the Spartan basketball team of the 1935-'36 season,

Daniel J. Reck

recently honored Daniel J. Reck, a Lansing senior, by selecting him honorary captain of the squad. Reck, in his prep days, was a star on the Lansing Central High School five, and since entering Michigan State, has seen three years of active service on the varsity squad. Not only has he played brilliantly at guard and forward positions, but he has also distinguished himself scholastically. During the fall term Reck received five grades of A and one of B, and during the winter quarter he attained an "all-A" record.

* * *

Workmen began excavating April 13 for the new addition to the Union Memorial Building, approved by the Board of Agriculture at its last session. The new wing will be erected at a total cost of about \$85,000, and upon completion will house the offices of the Michigan State News, the Wolverine, the Art Department, and will contain twelve classrooms. Under the WPA, workmen are still at work completing the original building, in which there will be a new cafeteria and lounge. This is the first sizeable building program at the college since the completion of the animal clinic in 1931 at a cost of \$100,000.

* * *

Twenty-eight advanced military students of the R. O. T. C. cadet corps were initiated into Scabbard and Blade, military honorary society, at the annual winter term ceremonies in March. The officers who were inducted are: Charles Anthony, Massilon, Ohio; George Branch, Detroit; William Barber, Lapeer; Arthur Brandstatter, Ecorse; Paul Brinen, Muskegon; Edward Bechtold, Bronx, New York; Francis Caluory, Battle Creek; David Christian, Woodland; Bart Collings, Detroit; Cort-

land Cromwell, Birmingham; Jack Hamman, Hartford.

Donald Hittle, East Lansing; David Johnson, East Lansing; Edgar Jones, Lansing; Edward Killian, Detroit; Harold Lamb, Monroe; Jack LaRock, Flint; Martin List, Sebawaing; Robert Madison, Lansing; Donald MacGrain, Detroit; Edward McNamara, Lansing; Charles Meinzing, Northville; Donald O'Hara, East Lansing; Charles Pearson, Lansing; Robert Perrin, Saginaw; Richard Pilkington, Washington, D. C.; Robert Rosa, Schenectady, New York; and James Thomas-Stahle, Philippine Islands.

* * *

Lieutenant Royce A. Drake, Michigan State College cavalry officer and secretary of the R. O. T. C. horse show executive committee, recently revealed that the fourteenth annual show will be held Friday and Saturday, May 29 and 30. The show will be staged in Demonstration Hall on the college campus.

So They Become Industrious

(Continued from page 9)

other times many of the boys decide they need a haircut just ahead of the party that night.

Cooperative living and self help that extends to kitchens present the other side of expenditures, where economies are effected and school costs cut.

Ruth Halladay, junior from Tecumseh, Michigan, who manages a canning factory, raises chickens, ducks, strawberries, and popcorn during the summer months, and is employed in the Home Economics Department during the school year, has worked out a system. With her sister, Lucille, Miss Halladay has reduced living expenses by putting to practical use the knowledge she has gained as a foods major at the college. They also have reduced expenditures by doing their own laundry and housework. Miss Halladay, who does not neglect the social side of her campus life, was recently named co-ed editor of the Michigan State News.

Families send canned meat, butter, cheese, eggs, vegetables to their sons and daughters. Girls in eight apartments and four houses have permission from the dean of women to cook their own meals. Costs range from fifty cents a week to two dollars a girl, depending on home supplies.

So education plays the part of prime factor in stimulating hundreds of Michigan State College students to find their way in life, experience that will stand them in good stead.

Mirroring The Alumni World

In Which You Will Observe How Some Other Staters Are Establishing Themselves

Patriarchs

Dr. James F. Baldwin, '85, believed to be the first graduate student at Michigan State College, died at his home in Columbus, Ohio, January 20. Considered to be the oldest active surgeon in the United States, Dr. Baldwin was a special student of chemistry at M. A. C. under Dr. R. C. Kedzie about 1870. He was the founder of the Grant Hospital in Columbus and one of the organizers of the Ohio Medical University.

Orlando D. Russell, with '63, died at his home in Sturgis, Michigan, on August 29, 1935, at the age of 96. His grandson, **Orlando C. Russell**, was graduated from the college in 1930.

The city of Alma, Michigan, lost a citizen when **William A. Bahlke**, '83, prominent banker and business man, died on November 21, 1935. He is survived by his widow.

Willis Leisenring, '84, died in the University of Michigan Hospital, Ann Arbor, on February 23, 1936, following a month's illness. For more than forty years Mr. Leisenring was active in Pontiac, Michigan, business circles, operating a chain of drug stores until 1928 when he became druggist for the Pontiac State Hospital. He is survived by one daughter.

Death ended the serviceable career of **Dr. Wilford C. Stryker**, '84, on March 29, in a Glendale, California, sanitarium. Dr. Stryker opened his office in Pasadena in 1906 and practiced dentistry there until 1933, when he retired and made his home in Los Angeles. He is survived by his widow and one son.

1891

The Alumni Office recently received word of the death of **Robert J. Crawford**, former Macomb County agent for the State Welfare Commission. Mr. Crawford died at his home in Armada.

V. S. Hillyer is an orchardist near Marquette, Michigan.

1892

Harvey N. Peck died in St. Petersburg, Florida, on January 2. For the past fifteen years Mr. Peck was in suburban real estate business in Battle Creek. He had been in poor health for about two years and spent his winters in Florida.

John Randolph Frank is farming near Calumet, Michigan.

1894

Rupert A. Bentley is farming near Whittemore, Michigan.

1895

Dr. James H. Kimball, the guardian angel of many a transatlantic flyer, recently was appointed to succeed Dr. James H. Scurr as New York's new weather man. Dr. Kimball is an outstanding authority on north Atlantic weather and has plotted the courses and given the "word" to Charles A. Lindbergh, Richard E. Byrd, and Baldo Balbo's Italian air armada.

1896

Robert B. Buck, publisher of the Richmond (Michigan) Review for twenty years, died in Port Huron Hospital February 25 after a long illness.

1897

Edmund T. Paterson has moved in Detroit to 2529 Seminole Avenue. Paterson is in real estate business under the name of Paterson Brothers Company, of 3050 E. Grand Boulevard.

1898

Thomas L. Hankinson, head of the Zoology Department at Michigan State Normal College at Ypsilanti, died December 3, 1935, following a short illness. Professor Hankinson became professor of zoology and physiology at Illinois State Normal school in 1902 and remained there until 1920, when he left to become ichthyologist for the Roosevelt Wild Life experiment station in Syracuse. In 1921 he returned to Michigan and joined the faculty at the Ypsilanti college. He was an active member of nine science groups and societies and held offices in many of them. His specialties were ornithology, aquatic biology, and habits and life histories of fish.

1901

Sidney A. Rochester gives his address as 309 N. Webster Street, Greenville, Michigan.

1902

Maud Briley Marshall (Mrs. William J.) may be reached at 615 Woodford Street, Missoula, Montana.

1903

Mr. and Mrs. (04) Charles M. Blanchard are living in Elk Rapids, Michigan.

Francis Morrison has moved in Jersey City, New Jersey, to 257 Academy.

1904

Henry N. Hornbeck heads the department of Natural Science in Union High School, in Grand Rapids, Michigan, where he lives at 324 Sunset Avenue N. W.

1905

Mrs. Robert H. Gordon (Ivah Dell Aldrich) gives her address as 3306 Gladstone Avenue, Detroit, Michigan.

A. A. Fisk is in the insurance business with Aetna Life in Milwaukee, with offices at 735 N. Water Street.

1907

Word has been received of the death on April 6 of **Oscar A. Kratz**, of Covington, Kentucky. A more complete story of his life will appear in the next issue of the Record.

Ira W. Cargo is pastor of the Methodist Episcopal Church in Gladstone, Michigan.

1908

Verne Gongwer is located in Knoxville, Tennessee, with the TVA, and lives at 128 E. Wells Avenue.

Norma Hopkins teaches home economics in Detroit, where she lives at 5535 Kensington.

Walter and Jean Bliss Hopson are living in Gladwin, Michigan. Hopson is forestry superintendent at the CCC Camp F22, at Bitley.

1910

Lou Allen Thrush (Mrs. Richard W.) is living in Washington D. C., at 1721 37th Street N. W.

Muriel Twiggs Chilson teaches in Detroit and lives at 5121 West Chicago Boulevard.

Chase Crissey gives his address as 80 W. Warren, Detroit.

Charles A. Lemmon has a new address at Saranac Lake, New York. Last fall he pur-

chased Glenwood Estates there and reports a lot of fun with alterations and repairs.

Mabel Rogers is enjoying her work at Stout Institute, Menomonie, Wisconsin.

Clyde E. Weed is general manager of the Cananea Consolidated Copper Company, of Cananea, Sonora, Mexico.

1911

Huber C. Hilton visited the campus on December 30, when he gave his new address at 2636 Fairfax Avenue, Denver.

1912

Mrs. David Eason (Donna Edwards) is located at 980 N. Summer Street, Salem, Oregon.

Regional forest inspector, in Milwaukee, is **Earl C. Sanford**, who lives at 2756 N. Cramer.

1913

The sympathy of the class is extended to **Glen H. Myers**, '14, in the death of his wife, **Minna Baab Myers**, on February 10, at their home in Detroit.

George F. Barton gives his business address as 7338 Woodward Avenue, Detroit, and remarks that he is a manufacturer's representative.

Howard H. McIntyre, who returned to the college and received his D. V. M. in 1915, is putting that learning to work in Peterborough, New Hampshire, where he resides at 9 Prospect Street.

1914

Karl N. Fasoldt manages a farm on Route 1, near Libertyville, Illinois.

J. C. Johnston was on the campus last August 27, his first visit in twenty-one years. Well, Texas is rather a long step from East Lansing, and that's where Johnston is located, with the Continental Oil Company at Borger.

In case you should be singing "California, Here I Come," remember that **Verne C. Pickford** lives in Santa Paula, 521 Main Street.

1915

Eleanor Chadwick Butterfield (Mrs. D. O.), teaches in the Pottersville (Michigan) High School.

Addie Gladden Donald teaches foods in one of the Detroit schools, and lives at 25 E. Palmer.

George R. Gage, who received his M. S. in 1915, is professor of botany at Vanderbilt University in Nashville, Tennessee. (Turn to page 18)

Annie E. Johnson

Annie E. Johnson, daughter of Mr. and Mrs. Charles Johnson, both of the class of '99, died after a week's illness with pneumonia at the Belding Hospital on March 1.

Miss Johnson was graduated from Michigan State Normal in 1929, following which she took four terms of graduate work at Michigan State College. Previous to her death she had been teaching in the Pierce School near Portland, Michigan.

She is survived by her parents, four brothers, and a sister. Three of the brothers are graduates of Michigan State College: Charles E., '23; Henry A., '27; Alfred, '35. One sister, Evelyn, is a sophomore this year.

STATE GRADUATES IN THE NEWS

Dr. Bagley Attends Fraternity Anniversary

Another prominent alumnus recently in the news was Dr. William C. Bagley, '95, when he attended the unveiling of a bronze tablet commemorating the twenty-fifth anniversary of Kappa Delta Pi, honorary educational fraternity, on the University of Illinois campus.

The memorial tablet, unveiled February 20 in the Union Building at Illinois, lists Doctor Bagley as one of the founders. Pictured with Doctor Bagley is a charter member, Jessie McHarry Rice, of Rantoul, Illinois. Thirty charter members are named on the tablet.

Doctor Bagley, Professor of Education, Teachers College, Columbia University, frequently returns to East Lansing to renew friendships with his classmates of the late nineties.

—Courtesy Illinois Alumni News.

Dr. W. C. Bagley recently took part in the program commemorating the founding of the Kappa Delta Pi, honorary educational fraternity, at the University of Illinois. With the distinguished educator is a charter member, Jessie McHarry Rice, Rantoul, Illinois.

Brooks Gives Lectures On Dowmetal

Exceptional interest was shown by members of the Faculty Club and students of chemical engineering in two talks on Dowmetal, delivered here, March 4, by Manley E. Brooks, '25, who, as staff metallurgist for the Dow Chemical Company, has become an authority on the new alloy developed in Michigan.

Manley E. Brooks

In commenting on the metal and recent progress made in this field Brooks said: "In some respects magnesium (Dowmetal) is an infant among metals. Metallurgical knowledge and progressive engineering account for the relative speed with which this metal is finding its way into a highly diversified list of products and uses."

According to the speaker Michigan State College graduates make up the majority of this "progressive" staff of technicians. Among the alumni and former Michigan State students now in

the employ of the company are: A. W. Winston, '20; L. B. Grant, '22; O. E. Grant, w'22; H. W. Schmidt, '23; C. E. Topping, '23; G. Gunn, w'26; F. L. Reynolds, '27; M. O. Robinson, w'28; H. W. Dove, '29; W. S. Loose, '34; and P. M. Jensen, w'34.

Brooks was graduated with honor from the Chemical Engineering Division of the college, and since receiving his B. S. degree, he has taken advanced work at the Pennsylvania State College. In 1926 Brooks was employed by the Dow Company as foundry superintendent. After a year of graduate study he returned to the same firm as a metallurgist.

D. B. Falconer Receives Master's Degree

David B. Falconer, of Scottville, who was graduated from the Agricultural Division of Michigan State College in 1934, was awarded the master of science degree in dairy technology at Ohio State University, March 20. The degree was presented at the winter quarter convocation at the university, at which time twenty-seven other graduate students, representing colleges of the middle west, received advanced degrees.

While attending Michigan State College, Falconer was a member of Alpha Gamma Rho Fraternity and participated in many campus activities. He served as treasurer of his graduating class, and in 1934, as a member of the Officers'

Club, he was appointed to the Military Ball committee.

As a student of agriculture Falconer was a member of the Dairy Club, the Student Grange, and the staff of the Michigan Agriculturist.

She Directs Home Information Service

When the national headquarters of Better Homes in America were moved from New York City to Purdue University late in 1935, Mrs. Dorothy Curtiss Doyle, a graduate from the Home Economics Division of Michigan State College in 1921, was placed in charge of the Home Information Service.

Mrs. D. C. Doyle

Mrs. Doyle was a member of the Home Administration staff at Purdue University since 1933. In her new position she will play a large part in the Better Homes in America movement, begun at the suggestion of ex-President Harding. The organization emphasizes the importance of the home in national and community life, encourages thrift for home-ownership, and gives helpful suggestions regarding the selection and building of the home.

Summer School Session Begins June 22

Forty departments of Michigan State College will offer more than 200 courses during the twenty-third annual summer session which starts on June 22. Professor S. E. Crowe, director of the Summer Session, has received inquiries from twenty-three states, and indications point to a large enrollment.

Several new courses, of special value to teachers, have been added to the curriculum, including Health Education, Abnormal Psychology, Geography of Europe, Supervising High School Publications, and Banking Acts. Lecturers of national prominence have been engaged for the summer lecture course, and negotiations for motion pictures are in progress. Catalogues listing the requirements and the complete list of courses may be secured by writing to the Director of Summer Session, Michigan State College.

Foresters Convene

Daniel DenUyl, '22, was in charge of a dinner meeting of Michigan State College foresters, held January 27 during the annual meeting of the Society of American Foresters at Atlanta, Georgia. Fifteen M. S. C. graduates attended the dinner. Professor P. A. Herbert, of the Forestry Department, told of the recent work of the division and described the five upper class options open to forestry students after this fiscal year.

Other alumni who attended the meeting were: Harry L. Baker, '11; Frederick G. Wilson, '11; G. Harris Collingwood, '11; R. P. Holdsworth, '11; Earl W. Tinker, '13; George Phillips, '22; Don Clark, '24; Harold J. Lutz, '24; Frank J. Gibbs, '27; Karl Schuster, '28; Donald Weddell, '28; Theodore Liefeld, '29; Robert Campbell, '32; Carl Thoresen, '33; and Professor H. S. Newins, head of the Forestry Department of the University of Florida.

Christopher Granger, '07; Samuel Eisenburg, '35; and C. F. Howland, '27, were present at the convention but were unable to attend the dinner.

In Lansing, Henry G. Sommer assists the foreman in the tool design department at the Olds Motor Works.

Norman O. and Louise Kling ('22) Weil have moved to their new home at 67 Iroquois Road, Mohegan Heights, Tuckahoe, New York.

1918

Dr. Edgar Anderson has returned to St. Louis where he may be reached at the Missouri Botanical Garden.

Grace Anderson Brownrigg (Mrs. W. G.), is located in Sacramento at 2939 24th Street.

Lloyd R. Dunstan is a resident of Milwaukee, 3819 West North Avenue.

Through the courtesy of Central News and Photo service we have added to our files a picture of Howard V. Jordan, technologist for the U. S. D. A. in Austin, Texas.

We have recorded a new address for Harry E. Thompson, 19319 San Juan Drive, Detroit.

Hay Broker James A. Venner has offices in the Olds Tower in Lansing.

1919

Karl B. Hanson, of Keeseville, New York, died January 14 in the Milwaukee (Wisconsin) General Hospital, of pneumonia. He is survived by his widow.

Richard E. Uren, a former highway engineer in Michigan, died in the Veterans' Hospital in Hines, Illinois, on January 7. His widow survives him.

Marjorie Black is connected with the National Cannery Association in the home economics division, and is located in Washington, D. C., at 1739 H Street N. W.

Charles O. Butler is a Ford dealer in Tecumseh, Michigan.

According to the November, 1935, issue of Sales Management, Edward E. Rothman, for many years in the Detroit office of Campbell-Ewald Company, has become assistant general manager of that concern's New York office.

Mr. Sweeney's son, Ralph, works for the New York State Health Department as sanitary engineer in the Albany district. His headquarters are at the State Office Building in Albany.

Ruth Fern Musselman (Mrs. Grant Fox) died at her home in Simeo, Ontario, February 2, following a short illness. Burial was in Leamington, Ontario. Ruth was a sister of Harry H., '08; Forrest F., '19; and Dale T., '21.

1920

Raymond E. Addis insures the residents of Holly, Michigan, via the Franklin Life Company.

I. V. Anderson gives his address as N. R. M. Experiment Station, Federal Building, Missoula, Montana, but fails to divulge the meaning of that portion of the alphabet.

Herbert J. Andrews, M. D., announces the opening of offices at 1433 Westwood Boulevard, Los Angeles. Mrs. Andrews was Madge Heany.

Roy G. Bennett superintends the schools of Manton, Michigan.

Merrill E. Fortney, salesman for National Cash Register Company, has for his home address 705 Dickinson Avenue, Memphis, Tennessee. Mrs. Fortney was Mildred Bennett, '21.

Edward A. Malasky's place of business is 200 Transportation Building, Detroit, where he is a "tax collector."

Last July 1, John F. Yaeger left the Lapeer County Press to become director of the organization for the Michigan State Farm Bureau in Lansing.

1921

Arthur Gettel teaches in Detroit's Post Intermediate School, and lives in Dearborn at 7629 Calhoun.

Everett and Ruth Ketcham ('27) Sackrider are living in St. Joseph, Michigan, while Everett

manages a soil conservation project in Benton Harbor.

Claude Stover engineers for Oceana County, with headquarters in Hart.

R. E. Yeatter serves the Illinois State Natural History survey at Urbana as game specialist.

1922

Harold and Catherine Watkins Bigford live in Grand Rapids, Michigan, at 552 Ardmore S. E.

The secretary-manager of El Cajon Valley Citrus Association is Shayler Coleman, who resides at 1504 Fern Street, San Diego.

Mark Small, in photograph, came to us through the courtesy of Central News and Photo Service, which avers that Mark is located at 1019 Gloyd Building, Kansas City, Missouri.

Marshall, Michigan, is headquarters for Manley E. Young, supervisor of rural resettlement. He and Mrs. Young (Beulah Woodland, '32) reside at 341 N. Madison.

1923

The death of Roy M. Hodges on April 8, in the prime of an engineering career, came as an unexpected shock to his many friends. He had been ill a short time with pneumonia. Mr. Hodges had been road engineer for Calhoun County since 1926. He was well known and admired throughout the state by county road and other engineers not only for his splendid personal qualities but for his ability as a highway engineer. He gave to Calhoun County the highest type of engineering efficiency. A member of 119th Field Artillery, 32nd Division, Mr. Hodges saw active service in France. He is survived by a son, John, seven years old; Mrs. Hodges died in January.

Mrs. James W. Berry (Elsie Gelinax) is assistant dietitian at the Michigan Home and Training School in Mt. Pleasant, Michigan.

B. W. Lafene practices the art of Hippocrates in Marysville, Kansas.

The Ralston brothers live in California, Milo J., in Oakland, 421 Staten Street, and Merle C., '24, in Hollister.

1924

Benjamin V. Halstead has an executive position in a trust company in Chicago, where he lives at 1205 Madison Park.

1925

J. C. Linebaugh, Golda Morford, and Ralph M. White reel off quantities of instruction in the respective schools of Ionia, Detroit (Golda lives at 16534 Blackstone), and Morral (Ohio).

1926

Carlisle Hill, in Chillicothe, Ohio, has a new resident in the person of E. F. Biehseheimer, of the U. S. Forest service.

Ben Dobben is spreading the gospel of life insurance in Cleveland, Ohio, where he lives at 1626 Lincoln Avenue.

Lieut. J. D. Hawkins is stationed at Fort Wayne, Detroit.

Captain Marshall Lane is located in Burns, Oregon, with the 1626th Company CCC. In a recent letter Lane described his work at camps near Higgins, Idaho, and Beulah, Oregon, before going to his present location.

Laurence E. Skellenger, who gets his mail at Box 64, Wellston, Michigan, superintends the CCC camp at Irons.

1927

Charles H. Burton, senior administration assistant in the ECW, has returned to East Lansing, where he lives at 131 Beal Street.

Box 753, Rockford, Illinois, is the address of Paul M. Hackett, field representative for General Motors Acceptance Corporation.

Albert Matthews, soils engineer for the State Highway Department, lives in Lansing at 303

Mirroring The Alumni World

(Continued from page 16)

Samson Liph is located at 19 West Jackson Boulevard, Chicago, as assistant western manager for the Jewish Agricultural Society.

Standish W. Robinson gives his new address as Commerce Clearing House, Inc., 120 Broadway, New York.

Major Don Stroh is assigned to the 26th Infantry, 1st Division, at Plattsburg Barracks, New York.

1916

Among the Michigan State rooters at the game with Loyola on November 16 was Henry A. Jessop, who lives in Redlands on West Pioneer Avenue.

1917

Herbert C. Bartlett has a fur farm near Whitehall, Michigan, where he specializes in mink raising.

Arthur W. Billings is vice president of the Finance and Discount Corporation of Los Angeles, where he lives at 3476 Westmount Avenue.

The man who guards the law in Kent County, Michigan, is Hugh Blacklock, who has been elected sheriff. Blacklock lives in Grand Rapids at 226 Louis N. W.

Leo C. Moskowitz returned to the old campus for Homecoming last fall and gave his address as 440 Rock Beach Road, Rochester, New York.

Charles Ritchie teaches the high school students of Kent City, Michigan, all about science.

Let's Read The Letters

(Continued from page 2)

where he is at the present time so far as I can learn, but it is possible some of his friends will have a track picture of him which they can loan to me so that I may have a duplicate made to place in the gymnasium.

Sincerely yours,

RALPH H. YOUNG,

Director of Athletics.

Wanted: An Address

When I was on the faculty of M. A. C. (1906-1912) two men named Hallen came there from Norway—Christiana. One was called Odd. I do not recall the name of the other one. Odd and I became very good friends. I am planning to go to Norway the coming summer and I should like to find him. If you have his address, will you send it to me?

Very truly yours,

THOMAS C. BLAISDELL,

English Department,
Florida Southern College,
Lakeland, Florida.

Sorry, Mr. Blaisdell, but the Alumni Office has no information concerning Mr. Hallen. Can any alumnus supply Mr. Blaisdell with the information?

J. Michel Ehrlich is assistant biochemist at the P-G Hospital, 330 Second Avenue, New York City.

Milton Hoagland does a heap of figuring as statistician for the Timken-Detroit Axle Company in Detroit.

Here's a New Idea

Reorganization of Michigan State College alumni into new service groups has been announced by Glen O. Stewart, alumni secretary. Michigan will have thirty-two districts, corresponding to senatorial election districts. The rest of the United States will be divided into areas determined by the number of alumni residents in each area.

A district and lieutenant governor will be chosen for each section to develop the following activity committees: membership, meetings, scholarships, endowments, new students, publicity, and public relations.

Active alumni clubs already existent within the new districts will form six functional committees: social, educational, placement (employment for alumni), financial, recruiting, and public relations.

Ohio State University and Notre Dame have been successful in using this same plan of alumni organization, Mr. Stewart says, adding that the idea was suggested to him during a convention of the American Alumni Council, of which he is national secretary.
