

# DEMONSTRATION

## THE PEOPLE VS THE CIA

This Wednesday and Thursday, Nov. 19th and 20th, CIA recruiters arrive on our campus to exploit the people's unawareness of the link between corporate power and CIA practice. In these days of economic hardship, desperation and competition override moral and human considerations. This condition is conducive to the CIA's national operation to enlist students, in particular minority students for participation in their immoral and corrupt activities. Throughout this depraved mission they have been faced with strong opposition and intense demonstrations, illustrative of the increasing skepticism towards the Govt. and its policies (REFLECT ON VIETNAM, WATERGATE, AND CHILE).

It is our responsibility to protest the CIA penetration of the MSU community since it contradicts our basic human rights and values.
